

LEELA BHARATH PEDDI

DATA ANALYST

South Plainfield, NJ | peddileelabharath@gmail.com | +1 201-765-8285 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with over 3 years of experience in turning complex data into actionable insights. I am proficient in SQL, Python, R, and Excel for advanced data analysis, and skilled in Tableau, Power BI, and Cognos for reporting and dashboard development. Experienced in ETL processes using Informatica, SSIS, Spark, and AWS Glue, as well as statistical modeling (A/B testing, regression analysis). Strong background in database management (MySQL, PostgreSQL, SQL Server) and big data tools (HDFS, Scoop). Adept at data storytelling, KPI tracking, and business intelligence, with a proven ability to collaborate with stakeholders and drive data-driven decision-making.

EXPERIENCE

Data Analyst | JPMorgan Chase & Co, NJ - USA

May 2024 – Present

- Automating data processes and building advanced **Excel models (PivotTables, VLOOKUP)** using **Python (Pandas, NumPy)**, improving reporting efficiency by **40%** and reducing manual workload.
- Developing **interactive Tableau dashboards** and **Python visualizations (Seaborn, Matplotlib)** to uncover sales trends and customer insights, driving a **15%** increase in marketing campaign **ROI**.
- Optimizing **MySQL/PostgreSQL databases** through query tuning and indexing, accelerating data retrieval speeds by **50%** for real-time analytics.
- Building **Informatica ETL pipelines** to integrate disparate data sources, while leveraging **regression analysis (Python/R)** to predict customer churn and improve retention strategies by **25%**.
- Designing **KPI dashboards** to monitor marketing and operational performance, reducing reporting time by **30%** while increasing data accuracy.
- Managing analytics codebases in **Git/GitHub** and collaborating with cross-functional teams to deliver data solutions **20%** faster through agile workflows.

Data Analyst | Infosys Limited, Hyderabad, India

Aug 2021 – Apr 2023

Client: Southern California Edison (SCE), Rosemead, CA

- Utilized Big Data technologies (**Snowflake, Hadoop, Talend**) to optimize **ETL** processes, achieving a **40%** improvement in data processing efficiency and reducing operational costs.
- Led **Hadoop** to **Snowflake** migration projects, reducing data transfer time by **50%** and enhancing system scalability for enterprise-level data solutions.
- Collaborated with cross-functional teams to implement scalable solutions, improving project delivery times by **25%** and ensuring alignment with business goals.
- Optimized cloud-based data solutions by integrating **AWS Glue, ETL** and **AWS Athena**, streamlining financial data processing and reducing manual intervention by **40%**.
- Leveraged **MySQL** to build and manage complex stored **procedures, triggers**, and indexing strategies, significantly improving database performance and reducing query execution time by **40%**.

SKILLS

Data Analysis:	SQL, Python (Pandas, NumPy), R, Excel (Advanced Formulas, PivotTables, VLOOKUP)
Reporting Tools:	Tableau10.5, Pandas, Seaborn, Matplotlib, Cognos, Excel, SAS, SAS Enterprise Miner and Power BI and Google Analytics
Database Management:	MySQL, PostgreSQL, Microsoft SQL Server
ETL Tools & Statistical Analysis:	Informatica Power Centre 9.6, 9.0, 8.6., Stream sets, SSIS, HDFS, Spark, Scoop and AWS Glue, Hypothesis Testing, Regression, A/B Testing
Version control tools:	Git and Github
Business & Analytical Soft Skills:	KPI Tracking, Dashboard Development, Data Storytelling, Market Trend Analysis, Business Intelligence (BI), Problem-Solving, Critical Thinking, Strong Communication, Stakeholder Management, Team Collaboration, Time Management

PROJECTS

COVID-19 Spreaders Identification

- Developed a web application using machine learning to identify COVID-19 spreaders, achieving 90% accuracy in predictions. Applied a multiplex approach for data analysis, providing valuable insights for public health strategies.

Marks Master

- Created a web application for assessing student marks using Spring framework and MVC model, reducing assessment time by 40%. Implemented PDF data export functionality, improving data accessibility for faculty and administration.

House Pricing Prediction

- Analyzed AMES dataset using advanced regression techniques (Ridge, Lasso, Random Forest, XGBoost), achieving 85% accuracy in price prediction. Provided actionable insights for real estate stakeholders to optimize pricing strategies and increase profitability.

EDUCATION

Master in Business Analytics - Rutgers University, New Jersey, USA

Bachelor of Engineering in Information Technology – Osmania University, Hyderabad, INDIA
