

Technical Skills

Programming: R (Advanced), Python (Basic), SQL (Fundamentals)

Analytics: Statistical Modeling, Regression Analysis, A/B Testing, Time Series Forecasting, Data Cleaning

Tools: Excel (Advanced), RMarkdown, Tableau (Fundamentals), Power BI (Fundamentals), Bootstrap, Google Earth Engine (GEE), Google Suite

Languages: English, Hindi, and Gujarati (Fluent), French (Intermediate - DELF B2 Certification)

Certifications: IBM Data Analyst Certificate, Google Data Analytics Professional Certificate

Education

University of North Carolina at Chapel Hill

Bachelor of Science in Statistics and Operations Research | Graduated May 2025

- Relevant Coursework: Statistical Inference, Probability, Data Science, Regression & Modeling, Time Series Analysis, Optimization, Actuarial Science

Professional Experience

TatvaSoft - Software Development and Analytics Intern

January 2023 – August 2023

- Conceptualized and deployed five accessible and responsive web pages for a global NGO platform using HTML, CSS, and JavaScript; improved user engagement metrics by 15% through enhanced UI/UX features.
- Conducted A/B testing on interface elements, using statistical analysis to optimize navigation and improve click-through rates by 12%.
- Assessed user behavior data, cleaning, and standardizing datasets to identify navigation bottlenecks and improve user flow.
- Collaborated with QA and development teams to resolve functionality bugs ahead of deployment deadlines.

Plascon Paints – Accounting and Analytics Intern

May 2022 – August 2022

- Executed daily data quality checks on vendor master data, identifying and correcting 20+ data entry errors weekly, ensuring data integrity for accurate reporting and analytics across all financial systems.
- Single-handedly entered 50+ data points into the client interaction database per week, using SQL and Excel to maintain accuracy and integrity, contributing to enhanced data-driven decision making.
- Inspected financial data and investigated discrepancies during monthly closing, which resulted in identifying and correcting three critical accounting errors, preventing potential misstatements in financial statements.

Lotus Technologies – Marketing and Analytics Intern

January 2021 – July 2021

- Designed and executed a targeted email marketing campaign based on customer segmentation and behavior analysis, resulting in a 10% increase in click-through rates and a 5% boost in conversion rates.
- Pinpointed 15 critical UI/UX bugs during beta testing, directly contributing to a 15% improvement in the user retention rates in the first week after Lotus Technologies' flagship product launch.
- Analyzed user behavior metrics, including time spent on page and bounce rate, and implemented targeted content updates, leading to a 22% increase in user engagement on key product pages.

Academic Project Experience

Economic Freedom Index Analysis - UNC Chapel Hill: Built linear regression models using R to predict economic freedom scores based on eight indicators; achieved a 3.57 average prediction error using cross-validation and economic theory.

Time Series Forecast of Atmospheric CO₂ - Mauna Loa - UNC Chapel Hill: Forecasted CO₂ levels (2015-2025) using ARMA(2,1) models, achieving accurate 95% confidence intervals and validated assumptions via STL decomposition.
