SUMMARY

Software Development Engineer with hands-on experience in full-cycle software development and cloud-based deployments. Demonstrated ability to translate requirements into robust, scalable solutions and optimize CI/CD pipelines in dynamic environments. Experienced in mentoring junior engineers and collaborating with cross-functional teams to deliver measurable performance improvements.

EDUCATION

Pace University, New York Master of Science in Computer Science Coursework: Advanced Database Management, Parallel Computing, Internet Computing, Computational Statistics, Deep Learning, Mobile Web and Application Development, Systems, AI . SR Engineering College, Warangal, India Bachelor of Engineering in Computer Science & Engineering	Sept 2023 - May 2025 GPA - 3.79 July 2018 - May 2022 GPA - 8.14
---	--

WORK EXPERIENCE

Advanced Application Engineering Associate <i>Accenture</i> - Engineered and automated CI/CD pipelines using Azure DevOps and Key Vault, integrating robust software development practices to streamline deployments and enhance code reliability. - Developed and deployed 10+ scalable applications on Azure using Visual Studio, GitHub, and Bitbucket, applying multi-tier design principles and continuous integration to reduce deployment time and minimize errors. - Orchestrated the cloud migration of 20+ applications to Azure IaaS & PaaS, collaborating with cross-functional teams to optimize resource utilization, bolster security measures, and produce comprehensive deployment documentation.	Aug 2022 - July 2023 <i>Bengaluru, India</i>
Advanced App Engineering Associate Trainee <i>Accenture</i> - Completed an intensive hands-on training program in cloud computing, deploying, scaling, and monitoring applications on AWS and Azure while practicing the full software development cycle from design to maintenance. - Constructed full-stack web applications using Node.js, TypeScript, and Angular, developing responsive, component-based user interfaces with real-time data handling and rigorous API development. - Developed and integrated complete applications for cloud deployment, emphasizing best practices in version control, modular coding, debugging, and comprehensive documentation.	May 2022 - July 2022 <i>Bengaluru, India</i>

PROJECTS

Smart Healthcare Management System <i>NodeJs, ReactJs, ExpressJs, PostgreSQL, JWT, AWS, Jenkins, Jira</i> - Developed a full-stack Smart Healthcare System with React.js, Express.js, and PostgreSQL, enhancing patient-doctor interactions with JWT authentication. Integrated real-time scheduling, prescription tracking, and role-based access, improving usability by 60%. - Optimized database queries and API responses, reducing load times by 30%, improving system performance, and enhancing user experience by 40%.
Go-Cart <i>React Native, GCP, Firebase, Clerk</i> - Built a cross-platform shopping app using React Native, with 95% UI responsiveness and Firebase for real-time data. Deployed backend on GCP, improving load performance by 40%. - Implemented secure user authentication using Clerk, enabling 100% session persistence and reducing log-in-related errors by more than 60% through streamlined auth workflows and error handling.
Automated attendance system <i>Python, Numpy, Pandas, OpenCV, Haar cascade classifier, LBPH, Tkinter, XML</i> - Developed an automated attendance system using OpenCV face recognition and machine learning, achieving more accuracy 95% in student identification. - Developed a Tkinter-based GUI application with real-time face tracking, automated attendance marking, and CSV-based record management, improving operational efficiency by 45% and accuracy by 98%.

SKILLS

Software Development: Software Development Life Cycle (SDLC), Agile Methodologies.
Programming Languages: Python, C, Java, SQL, PL/SQL, R, HTML, CSS, JavaScript, JQuery, JSON, XML, Typescript.
Tools & Softwares: MySQL, PostgreSQL, MongoDB, pgAdmin, AWS (EC2), Microsoft Azure, GCP, Firebase, Docker, Kubernetes, Jira, Jenkins, Microsoft SQL Server, Git, Linux, CI/CD, Github, Android Studio.
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Tkinter, Django, Angular, Scikit-learn, TensorFlow, Keras, Seaborn, PyTorch, NodeJS, ReactJS, ExpressJS.
