

Manisha Miriyala

San Jose, CA | (669)212-0216, manishamiriyala7@gmail.com | [linkedin.com/in/manishamiriyala](https://www.linkedin.com/in/manishamiriyala)

EDUCATION

Master of Science in Software Engineering, San Jose State University, San Jose, CA

Aug 2022 - May 2024

Bachelor of Computer Science and Engineering, KL University, India

Aug 2017 - Jun 2021

Specialized in: Operating Systems, Parallel and Distributed Computing, Computer Architecture, Advanced Algorithms and Data Structures, Embedded Systems

TECHNICAL SKILLS

- **Languages:** Python, SQL, PL/ SQL, Spark
- **IDEs:** Google Colab, Anaconda, Jupyter, Android studio
- **Packages:** NumPy, Pandas, Matplotlib, SciPy, SeaBorn, Scikit-Learn
- **Visualization Tools:** Tableau, Power BI, Advanced Excel [Pivot, VLOOKUP, Data Analysis], Google Analytics
- **Data Analytics Techniques/ ETL:** Data Warehousing, Data Cleaning, Data Visualization, Data Integrity, Data Warehouse, SSIS, SSRS, SSAS
- **Databases:** MySQL, SQL Server, MS Access, PostgreSQL
- **Cloud Technologies:** AWS (Redshift, Lambda, S3, EC2, NACL, IAM, Lambda, CloudFormation, CloudFront)
- **Tools:** Talend Studio, Git Bash, Eclipse, IntelliJ, GitHub, Jira, Snow Flake, Bitbucket, Data pipelines, MS Visio, MS Office Suite, Informatica, Salesforce CRM
- **Version Control Tools:** Git, Git Hub
- **ML Concepts:** Linear Regression, Logistic Regression, Random Forest, Xgboost, K-mean, KNN and Neural Network, Regression Analysis, Classification Models, Clustering and Principal Component Analysis

EXPERIENCE

Software Engineer, NeuroLeap, San Jose, USA

Apr 2024 - Present

- Designed and maintained ETL pipelines using Python and SQL, automating data ingestion and transformation, leading to a 40% reduction in processing times, and successfully migrating on-premise databases to AWS Redshift, boosting data retrieval speeds by 30%.
- Developed and deployed Tableau dashboards for portfolio performance, client trends, and system analytics, enhancing reporting efficiency by 25%.
- Created data-driven microservice analytics systems with real-time data streaming, using OpenAPI specs for API development, which increased data scalability by 15% and reduced integration issues by 30%.
- Implemented robust data quality frameworks, performing anomaly detection, validation checks, and data consistency audits across structured and unstructured datasets.

Program Analyst, Cognizant, India

Jan 2021 - Dec 2021

- Built detailed dashboards using SQL queries and Python scripts, and Tableau for data visualization, delivering insights into client metrics and achieving a 30% reduction in reported discrepancies.
- Collaborated with cross-functional teams to optimize SQL queries and Python scripts, enhancing client applications' functionality and improving system performance for 5,000+ users.
- Conducted data validation and integrity checks across multiple databases using SQL and Python, ensuring high-quality data for analysis and boosting reporting accuracy by 20%.
- Automated data cleansing procedures with Python, reducing manual data preparation by 50%, while gathering client requirements to provide insights, leading to a 15% improvement in client satisfaction and faster project delivery.
- Monitored and optimized database performance, implementing indexing, partitioning, and query tuning strategies for faster data retrieval.

ACADEMIC PROJECTS

Service Connect: GPT-Powered Service Booking Platform

Jan 2024 - May 2024

- Designed and implemented microservice systems with real-time data streaming capabilities, utilizing OpenAPI specifications for API development, leading to a 15% boost in system scalability, a 30% reduction in integration issues, and enhanced API usability. Conducted detailed data analysis on user interaction patterns and booking trends, improving customer satisfaction by 15%.
- Collaborated with cross-functional teams to define technical specifications for embedded systems, applying design patterns and real-time processing techniques, which accelerated development timelines by 40%. Led the development of an application and account entitlement system using microservices, enhancing data security by 35%.
- Implemented a quality assurance strategy with CI/CD, performance testing, and code reviews, boosting code quality and release efficiency. Analyzed user data to optimize service delivery and offerings.
