EDUCATION

UNIVERSITY AT BUFFALO, THE STATE UNIVERSITY OF NEW YORK

Jul 2024 - Jun 2025

Master of Science, Management Information System (STEM), GPA: 3.9 / 4.00

Relevant Coursework: System Analysis & Design, Cloud Data Warehousing, Predictive Analytics, Cloud Computing

SAVITRIBAI PHULE PUNE UNIVERSITY, INDIA

Aug 2017 - Jul 2021

Bachelor of Engineering, Electronics and Telecommunication, GPA: 8.70/10.00

TECHNICAL SKILLS

Languages and Framework: Python, Java, SQL, Flask, REST API

Cloud Platforms: AWS

DevOps & Tools: Linux/Windows, Terraform, Docker, Jenkins, Git/GitHub, CI/CD, Grafana, VS Code, Postman

Database & Data Visualization: MySQL, PostgreSQL, Tableau, Power BI

PROFESSIONAL EXPERIENCE

Senior Software Engineer | CAPGEMINI TECHNOLOGY SERVICES LIMITED

Oct 2023 - Jun 2024

- Designed and built a Flask-based REST API to automate data comparisons between mainframe and AWS datasets, parsing large .txt, .csv, and EBCDIC files, storing results in PostgreSQL, and generating downloadable reports—improving verification efficiency by 20%.
- Automated the data analysis process and displayed the output on Grafana dashboards to make it easier to track and understand the differences and simplified the migration process from mainframe to AWS by reducing manual data handling and enabling quicker decision-making with clear visual reports.
- Created a validation pipeline triggered through GitLab CI, streamlining post-migration data checks and improving audit-readiness.

Software Engineer | CAPGEMINI TECHNOLOGY SERVICES LIMITED

Aug 2021 - Oct 2023

- Integrated AWS CloudTrail and CloudWatch with Lambda-driven workflows to process and analyze over 1,200 events per second, enhancing security monitoring effectiveness and improving compliance response times by 20%.
- Performed root cause analysis and troubleshooting of CI/CD failures and infrastructure issues using AWS monitoring tools and scripting.
- Provisioned repeatable cloud infrastructure using Terraform to manage EC2, S3, and IAM services, reducing environment spin-up time by 20% and standardizing deployment across teams.
- Implemented cost-optimization strategies in AWS S3 by fine-tuning access controls and lifecycle policies, contributing to a drop in storage costs.

Software Engineer Intern | ZENSAR TECHNOLOGIES

Dec 2019 - Jan 2020

- Assisted in designing Oracle database schemas and optimizing SQL queries to enhance data retrieval and application performance.
- Collaborated in Agile team activities including sprint planning, daily stand-ups, and retrospectives across sprints, gaining hands-on experience in the end-to-end software development lifecycle and contributing to timely and structured delivery.
- Executed 50+ manual test cases during feature QA, identifying bugs and improving defect detection by 25%, which led to smoother client demos and feature acceptance.

PROJECTS

BUFFALO CENTER OF ART AND TECHNOLOGY (INTERN) (SALESFORCE)

- Optimized Salesforce CRM for Buffalo-CAT, streamlining migration of 1,000+ student records, automating welcome emails and engagement alerts, configuring role-based access for 3 user groups, and creating 5+ dashboards to monitor enrollment and engagement KPIs, ensuring BPSS compliance and enabling data-driven program decisions.

SERVERLESS AI PHOTO MANAGER (TERRAFORM | AWS S3 | AWS LAMBDA | API GATEWAY | CLOUDFRONT | ML | REKOGNITION)

- Built and deployed a fully serverless image management platform with 95% infrastructure automation via Terraform, supporting scalable uploads and global distribution via CloudFront.
- Integrated Amazon Rekognition to process 100% of images for quality scoring, automatically filtering low-quality inputs with 90%+ accuracy—reducing manual curation efforts in production workflows.

SMART DATA BACKUP SYSTEM (PYTHON | AWS S3 | BOTO3 | GPT - 4)

- Developed an automated backup system that uploads over 100 files to AWS S3 with MD5 integrity validation, logging, and error handling, and integrated GPT-4 to generate user-friendly, dynamic summary notifications based on real-time backup outcomes, enhancing system transparency and reducing manual report effort by 90%.

CERTIFICATION

AWS Certified Developer – Associate, Salesforce AI Associate, HashiCorp Terraform Associate, Google Cloud Workspace Administration
