EDUCATION

Master of Science (M.S.), Computer Science, GPA: 4.0

Dec 2023

University of North Carolina at Charlotte, NC

Bachelor of Technology in Information Technology, GPA 3.8

Jul 2021

Jawaharlal Nehru Technological University, Hyderabad, India

SKILLS

Languages & Frameworks: C#, .NET Core, ASP.NET Core, LINQ, Python, Java, SQL, JavaScript, HTML, CSS, C, C++, Flask, RESTful APIs

Architecture & Practices: Event-Driven Architecture, Microservices, High Availability Systems, Agile (Scrum, Kanban), CI/CD, SDLC

Cloud & Messaging: AWS (S3, Lambda, SQS, CloudWatch), Amazon SQS, Kafka (Migration), Real-Time Streaming Pipelines

Databases: MongoDB, Snowflake, SQL Server, MySQL

Security & Compliance: OAuth 2.0, JWT Authentication, PGP Encryption, Secure Data Transmission

Monitoring & Logging: Dynatrace, MongoDB Transaction Logging, Application Performance Monitoring, Performance Optimization

Productivity & Collaboration: GitHub Copilot, Windsurf, AI-Assisted Code Review, Automated Documentation, API Contracts, System Architecture Documentation

EXPERIENCE

Software Engineer, CrossCountry Mortgage, Charlotte, NC

May 2024 – Present

- Developed backend services in **C#/.NET Core**, integrating APIs and implementing event-driven workflows with **Amazon SQS** and **SignalR**.
- Built a **high-performance alert pipeline** processing **1M+ records/run** with MongoDB, AWS Lambda, and S3, and implemented secure workflows.
- Architected and documented LMS integration** for Non-QM loans by defining **REST API contracts, secure data flows, and encryption protocols**, delivering a scalable solution that enabled seamless loan transfer and reduced manual processing time by **60%**.
- Engineered and integrated communication workflows** across loan systems using **secure APIs, event-driven processing, and real-time synchronization**, enabling 1,000+ monthly requests (locks, extensions, profile changes) and reducing loan status update delays by **50%**.
- Enhanced system monitoring and scalability by creating **Dynatrace dashboards (cutting MTTD by 30%)** and migrating messaging pipelines from **Kafka to Amazon SQS**.
- Leveraged **AI-powered tools (GitHub Copilot, AI-assisted code review)** to accelerate development, improve code quality, and automate documentation.

Software Engineer Intern, CrossCountry Mortgage, Charlotte, NC

Jan 2024 – April 2024

- Built a real-time event streaming pipeline** in C#/.NET Core to publish structured loan data to **Snowflake**, reducing reporting latency from **24 hours to under 1 minute**.
- Created consolidated diagnostic APIs** to aggregate multi-collection loan data, improving support team efficiency and accelerating issue resolution.
- Developed a high-availability lock expiration service** with **Amazon SQS** event publishing and automated loan officer notifications, reducing missed expirations by **20%** and increasing proactive renewals by **35%**.

Graduate Teaching Assistant, University Of North Carolina at Charlotte, NC

Aug 2022 – Sept 2023

- Supported graduate-level Algorithms & Data Structures course** by grading assignments, evaluating **Java/Python code submissions**, preparing solutions, and organizing course materials, while providing feedback that improved overall student performance.

Software Engineering Intern, Seneca Global, Hyderabad, India

Feb 2021 – July 2021

- Developed “Good Reads” web app** using **Python, Flask, MongoDB, and SQL Server**, designing backend logic, building REST APIs, and implementing features like search, filtering, and bookmarking, while contributing to debugging, testing, and deployment in an **Agile environment**.
