Motivated and analytical Registered Nurse with extensive experience in patient care and clinical data analysis, seeking to leverage a solid understanding of healthcare systems and strong problem-solving abilities in an entry-level Data Scientist position. Proficient in data collection, analysis, and visualization, with a growing expertise in Python, SQL, and machine learning techniques. Passionate about leveraging healthcare experience and analytical skills to drive insights, improve patient outcomes, and solve complex problems through data science in a healthcare or technology-driven environment.

SUMMARY OF QUALIFICATIONS

- ✓ Provide leadership during medical emergencies, assisting physicians, preparing patients for procedures, administering treatments, and ensuring advanced life support
- ✓ Provide effective coordination of the Gynecological Oncology Cancer patient across multiple settings, including diagnostic, treatment, surgery scheduling, and follow-up phases of care
- ✓ Implemented changes based on data analysis, resulting in a decrease in net loss in the department and the hiring of two advanced practice providers
- ✓ Developed training material and conducted sessions to educate new hires on department-specific Epic functionalities
- ✓ Contributed to feedback that resulted in Epic system enhancements to improve user experience
- ✓ Detail-oriented with strong organizational skills
- ✓ Analyzed data to identify trends, patterns, and opportunities for process improvement
- ✓ Educate patients and family members on disease process and prevention, medical-surgical procedures, and other aspects of therapeutic regimens, including medication and pain management
- ✓ Proficient in MS (Word, Excel, Access & Outlook) and adept at new technology and software

PROFESSIONAL EXPERIENCE

The Southeast Permanente Medical Group, Atlanta, GA Aug. 2021- Present

GYNECOLOGY ONCOLOGY CARE COORDINATOR

- Maintain continuity of patient care and serve as a liaison between physicians, patients, and other services, including medical oncology, radiation oncology, surgical oncology, interventional radiology, and pathology

- Develop the Gynecological Oncology program, including policies, procedures, consent forms, and patient education materials, in consultation with the project manager, department chief, business operations, and clinical team.
- Provide coordination, delegation, and support to clinical staff assigned to support the gynecological oncology patient
- Provide continual guidance and emotional and physical support to the patient and family/caregiver during all phases of the treatment program
- Provide leadership for day-to-day operations within the department by demonstrating competency in clinical activities.
- Maintain clinical competency by attending tumor board meetings and in-service education.
- Utilize Q-genda, health connect, and op-time to assist providers with scheduling surgery, department meetings, and tumor board conferences
- Develop and analyze department metrics to evaluate department productivity and forecast future business needs
- Manage and adjust the provider's template based on patient load, operational needs, clinic staff, and clinic closures
- Present Quarterly Gyn-onc dashboard data to senior leadership
- Establish and maintain relationships with surgical leadership at Northside Hospital, Emory Midtown, and Emory St. Joseph
