Meggna Karthikeyan

Wichita, Kansas | meggnakarthikeyan8@gmail.com | (774)704-0262 | linkedin.com/in/meggnakarthikeyan | Willing to Relocate

Data Analyst with **5+ years** of experience building **SQL**-driven reporting pipelines, **Power BI** and **Tableau** dashboards, and ad hoc business analyses across enterprise and research data environments. Proven track record of improving reporting accuracy by **30%** and cutting query response time by **60%**.

Work Experience

Humana — **Remote, IA**
Data Analyst — *Sep 2025 – Present*

- Wrote complex **SQL** queries joining, filtering, and aggregating data across **5 source systems** to extract and manipulate reporting datasets for stakeholder dashboards, cutting manual data-pull time by **42%**.
- Automated **8 recurring Excel** and **Power BI** reports using **PivotTables** and scheduled refresh workflows, eliminating manual report assembly and improving on-time delivery by **36%**.
- Partnered with **4 cross-functional stakeholder groups** to present ad hoc analysis findings and define data quality checks, reducing reporting errors by **29%** ahead of monthly business reviews.

University of Massachusetts Dartmouth — **Dartmouth, MA**
Data Analyst and Graduate Research Assistant | *NSF-funded Research* — *May 2024 – Jul 2025*

- Translated **1.5M+** gravitational wave detection results into interactive **Power BI** and **Tableau** visuals, surfacing recurring trend patterns for faculty-led research decisions and lifting reporting accuracy by **30%**.
- Ran statistical analysis on **KPI** accuracy and match-rate trends across research pipelines, identifying anomalies for faculty stakeholders and cutting validation time by **25%**.
- Standardized recurring metadata documentation and automated version-controlled data quality logs across research datasets, cutting manual rework by **50%** for reproducible faculty reporting.

Cognizant (Client: Bayer) — **Chennai, India**
Data Engineer — *Feb 2021 – Jun 2023*

- Converted manual **Tableau** pivot logic into optimized **SQL** queries against the enterprise data warehouse, cutting report refresh time from hours to under **5 minutes** for business stakeholders.
- Engineered **Python** validation frameworks with automated test cases to catch data quality issues before reporting handoff, achieving **95%** data accuracy and full QA compliance across pipeline outputs.
- Migrated legacy **SQL Server** reporting datasets into **BigQuery** using dimensional modeling and table partitioning, cutting average query response time by **60%** for downstream business reporting teams.
- Designed **dbt**-based ELT transformations with automated anomaly detection for **3 Bayer reporting modules**, reducing data quality incidents by **35%** ahead of stakeholder reviews.
- Presented ad hoc analysis and post-release findings to cross-functional **AEMEA** stakeholder teams, resolving change requests and maintaining **100%** SLA adherence across reporting deliverables.

Selected Projects

Spotify Data Analytics | *PostgreSQL, SQL, pgAdmin, Jupyter Notebook* | GitHub

- Modeled a denormalized streaming dataset in **PostgreSQL** using **CTEs**, window functions, and aggregations, producing a normalized schema that identified engagement patterns across a catalog of **1B+** streams.
- Optimized analytical **SQL** with targeted indexing and **EXPLAIN ANALYZE**, reducing query execution time by **97%** (from 5.59 ms to 0.09 ms) while preserving reusable, dashboard-ready query logic.

Uber Data Analytics | *Python, Mage AI, GCS, BigQuery, ETL, Dimensional Modeling, Looker Studio* | GitHub

- Designed and orchestrated an end-to-end **ETL pipeline** using **Mage AI**, **GCS**, and **BigQuery** to ingest and transform **NYC TLC** trip records into a **dimensional data model** with fact and dimension tables, enabling scalable analytics across **3M+** trip records.
- Built an interactive **Looker Studio** dashboard surfacing revenue patterns, tipping behavior, and peak demand trends, revealing that **credit card users tipped 2x more** than cash users and that only **24.6%** of riders tipped, identifying **2 peak surge windows** that concentrated demand across the NYC metro network.

Skills

Analytics and Reporting Tools: Power BI, Tableau, Advanced Excel (PivotTables), Looker Studio
Programming and Data Wrangling: SQL, Python, R, pandas, NumPy, Matplotlib
Cloud and Data Warehousing: BigQuery, AWS, GCP, GCS
Databases and ETL: PostgreSQL, MySQL, SQL Server, dbt, Airflow, ETL/ELT Development
Core Competencies: Data Quality and Validation, Ad Hoc Analysis, KPI Reporting, Statistical Analysis, Cross-functional Stakeholder Communication, Agile Collaboration
Certifications: Microsoft Certified: Power BI Data Analyst, Tableau Certified Data Analyst, SnowPro Core Certification, dbt Fundamentals, Oracle Analytics Cloud 2025 Certified Professional, Alteryx Designer Core Certification, Google Data Analytics, Databricks Fundamentals

Education

University of Massachusetts Dartmouth — **Dartmouth, MA**
Master of Science in Data Science | *GPA: 3.87* — *Sep 2023 – Aug 2025*
