SUMMARY

Passionate and dedicated professional with experience in software development, business intelligence, and education. Skilled in Power Platform, Power BI, and full-stack development with Java and React. Strong interpersonal, communication, and organizational abilities. Eager to leverage technical and analytical expertise to contribute to innovative technology projects and drive organizational success.

TECHNICAL SKILLS

- Languages: Java, JavaScript
- Frameworks: React, Spring Boot
- Databases & Tools: MySQL, MySQL Workbench, Thymeleaf, SharePoint, REST APIs
- Platforms: Power BI, Power Apps, Power Automate, Azure DevOps Pipelines

PROFESSIONAL EXPERIENCE

Junior Software Developer — Bunzl North America August 2024 – Present

- Acted as the primary point of contact for stakeholders, promptly addressing and resolving reported issues, and ensuring timely communication of resolutions.
- Scheduled and led stakeholder meetings to gather inputs, clarify requirements, and ensure applications and dashboards met business needs.
- Maintained clear documentation and status updates to keep stakeholders informed throughout the development lifecycle.
- Designed and developed Power BI reports for HR, PMO, and business teams, ensuring accurate insights from large datasets.
- Built Power Apps and Power Automate flows to automate business processes and

improve operational efficiency.

- Managed environment migrations, moving apps, flows, and solutions across Dev, Test, and Prod environments.
- Created and configured SharePoint sites and lists for collaboration and secure data storage.
- Developed Pipeline Managers to streamline deployment and version control.
- Worked on sensitive HR projects, including salary management, with strict adherence to data security and compliance.

Elementary Teacher — Euro International School, Pune November 2013

— September 2015

- Delivered engaging Grade 1 lessons tailored to diverse learning needs, improving student performance and classroom engagement.
- Partnered with parents, administrators, and counselors to address academic and behavioral challenges, fostering student growth.

PROJECT EXPERIENCE — Elementary School Library Management System

— Launch Code Capstone Project

- Designed and developed Learner's Library, a web-based application to organize library content and improve student services
- Integrated Google Books API to provide access to book metadata (title, author, description, cover).
- Built Student Management (CRUD) functionality to create, update, and maintain student records seamlessly
- Configured MySQL database with user profiles and implemented secure environment variables to protect sensitive data
- Tech Stack: Java, Spring Boot, CRUD, API, Thymeleaf, MySQL

EDUCATION

- Launch Code, Web Development Program — 2024
- Thakral College of Technology, Bachelor of Engineering in Information Technology, 2004- 2008
