

Michael Koopmann

EPPG PLANNER & DATA WRANGLER

Dubuque, IA 52001 | 563.451.6568 | michaelkoopmann45@gmail.com

Objective

Detail-oriented Data Analyst with a strong background in data wrangling, business intelligence, and automation. Experienced in using Power BI, Tableau, SAP Hana, and Excel to transform data into actionable insights. Seeking to leverage data analytics and software engineering skills in a challenging data-driven role to drive decision-making and business efficiency.

Experience

John Deere | EPPG Planner & Data Coordinator 2022-Current

- Spearhead data integrity improvements by identifying and resolving discrepancies in material and service request data across systems (Excel, SAP Hana, Databricks).
- Developed automated workflows using Power Automate to streamline SAP reporting, enhance accuracy, and reduce manual intervention.
- Designed and maintained Power BI/Tableau dashboards to communicate performance metrics and project outcomes to stakeholders, including executive leadership.
- Conduct monthly meetings with cross-functional teams to review data issues, process enhancements, and supply chain performance.
- Coordinated hardware and part procurement for critical offsite rebuild projects, ensuring timely sourcing and contributing to over \$100K in added value.
- Authored training guides to drive adoption of data systems and support internal knowledge transfer.

Fareway Stores Inc. | Meat Clerk 2017-2022

- Maintained accurate department signage and pricing through manual tracking, ensuring data consistency.
- Applied standards for freshness, food safety, weights, measures, and refrigeration, utilizing data to track product life cycles and sales trends.

Fareway Stores Inc. | Morning Stocker 2016-2017

- Led merchandising and shipment processing, with an emphasis on organization and data management for inventory and sales tracking.
- Effectively resolved customer complaints, maintaining a data-driven approach to customer service improvements.

Education

Iowa State University, BS of Science 2024

Major: Software Engineering | Minor: Data Science

Skills & abilities

- **Data Analytics & Quality:** Power BI, Tableau, Excel (Advanced), Databricks, SAP Hana
- **Programming & Automation:** Python, SQL, R, DAX, VBA, Power Automate, SAP Scripting
- **Systems & Tools:** SAP, MySQL, Git, EDL, AWS
- **Soft Skills:** Cross-functional communication, process improvement, training development, stakeholder

Leadership & Volunteer Experience

- **Dubuque Weatherization Volunteer:** Organized groups and managed material distribution for local weatherization projects, ensuring data on materials and labor was tracked efficiently.
- **Dubuque Food Pantry:** Supported operational data collection and reporting efforts to optimize inventory management.
- **Parish Fundraising Events:** Managed financial data collection and reporting for church events.

Projects

- **Allergy Prediction Website:** Developed a machine learning model using a neural network to predict allergy symptoms based on environmental factor
- **Political Tweet Database:** Designed and formatted a MySQL database to store and manage political tweets during the 2016 presidential race, allowing for data-driven insights into public opinion.
- **Photo Uploader/Album App:** Built a React-based web application integrated with AWS Amplify to handle user photo uploads and album management, demonstrating full-stack development and cloud integration skills.
