

Mihir Sisodiya

Carmel, IN | 317-556-6867 | msisodiy@iu.edu | mihirisisodiya07@gmail.com | [LinkedIn](#)

Education

Indiana University – Luddy School of Informatics, Computing, and Engineering

B.S. in Computer Science – Expected May 2026 Minors: Data Science, Informatics

Technical Skills

Languages: Python, Java

Web: HTML/CSS, JavaScript

Tools: GitHub, VS Code

Databases: PostgreSQL

Cloud: AWS

Other: Data Analysis, Problem Solving, Team Collaboration

Experience

Brite Systems Inc., Indianapolis, IN – Salesforce Intern

June 2023 – Aug 2023

Gained hands-on experience with SOQL, Salesforce Lightning, and Apex while assisting on a state government project and collaborating with a 10-member cross-functional team.

Projects

Audio Signal Processing with FFT & STFT (Python)

- Built a Python application to analyze audio using FFT, IFFT, and STFT.
- Combined spectra, reconstructed time-domain signals, and visualized spectrograms.
- *Technologies: Python, NumPy, SciPy, Matplotlib, Sounddevice*

ElectroHub – Electronics Shop System (Java, Decorator Pattern)

- Designed Java app using Decorator Design Pattern to model electronics shop orders.
- Implemented pricing logic for devices, shipping, and tipping options via CLI.
- *Technologies: Java, OOP, Decorator Pattern, UML*

Time Series Analysis & Graph Algorithms in Python

- Conducted exploratory time series analysis on a dataset of 50,000 records, including visualization, decomposition (trend/seasonality), and smoothing with SMA and EMA.
 - Performed stationarity testing using the Augmented Dickey-Fuller (ADF) test and applied differencing to stabilize the series.
 - Implemented Dijkstra's Algorithm for shortest path calculation and Prim's/Kruskal's Algorithms for Minimum Spanning Tree construction on weighted graphs.
 - *Technologies: Python, Pandas, NumPy, Matplotlib, Statsmodels, NetworkX*
-

Summary

Computer Science senior graduating May 2026. Skilled in software development, database management, and data analysis with experience in both academic and professional projects. Seeking a full-time software engineering and Data Analyst opportunity to apply technical expertise and grow within a collaborative team.
