Professional Summary

A versatile and analytical Life Science Professional with a strong foundation in biology and over 5 years of impact across data analysis, process optimization, and technical writing within healthcare and medical device sectors. Known for translating complex scientific data into actionable strategies—cutting lab turnaround times by 15% and improving system efficiency by 17%. Adept at crafting SOPs, validation reports, and training materials in strict alignment with HIPAA and FDA standards. Bring a rare combination of scientific insight, operational acuity, and regulatory fluency that elevates team performance and organizational outcomes.

Experience

Broncus Medical

Remote

Data Analyst, Treatment Planner

December 2021 – Present

- Generated personalized patient treatment plans by conducting quantitative analysis of high-resolution CT scans, directly supporting physician decision-making and enhancing clinical outcomes.
- Improved operational process efficiency for treatment plan programs by 17% through systematic development, optimization, and maintenance of workflows.
- Authored and contributed to critical Validation & Verification (V&V) reports for medical devices, processes, and software, ensuring compliance with US and EU regulatory standards.
- Developed and standardized training documents and Standard Operating Procedures (SOPs), improving team performance and streamlining the onboarding process.
- Partnered with cross-functional R&D, engineering, and clinical teams to refine treatment planning systems, contributing to key software and operational innovations.

Quest Diagnostics at Adventist HealthCare White Oak Hospital

Silver Spring, MD

Medical Laboratory Scientist

February 2021 – December 2021

- Initiated and led a data-driven analysis of sample processing workflows, identifying key bottlenecks that impacted laboratory turnaround times (TAT).
- Reduced average sample TAT by 15% within three months by developing and implementing optimized workflows based on data analysis and presenting insights to lab teams.
- Performed complex analysis of biological samples across hematology, microbiology, and chemistry, ensuring timely and accurate delivery of critical patient results.
- Managed quality control protocols, equipment troubleshooting, and inventory, maintaining rigorous compliance with CAP/CLIA and other regulatory requirements.

Self-Employed

Remote

Private Science and Writing Tutor

January 2019 – December 2020

- Designed custom learning plans and instructional materials for high school and college students.
- Improved student academic performance by an average of 21.4%, receiving a 98% client satisfaction rate.

Chief Emergency Room Medical Scribe

Lanham, MD

Scribe America at Doctor's Community Hospital

February 2017 – June 2019

- Developed and scaled the medical scribe program by training over 10 new hires and expanding services to include Physician Assistants, increasing departmental service coverage by 30%.
- Managed team schedules and led monthly meetings to analyze performance metrics and drive workflow efficiency.
- Authored comprehensive, real-time clinical documentation in EMR systems (Cerner), capturing patient encounters, procedures, and physician consultations with high accuracy.

Student Researcher

College Park, MD

University of Maryland, College Park, MD & USDA

July 2013 – July 2017

- Authored and contributed to literature reviews, manuscripts, grant proposals, and clinical reports,

Miriam Moumena

resulting in contributions to peer-reviewed publications.

- Designed and presented research findings at academic conferences, receiving recognition for innovative data visualization techniques.
- Developed and optimized novel laboratory assays in Neuroscience and Analytical Chemistry, significantly improving data accuracy and experiment reproducibility.

Education

University of Maryland, College Park

Bachelor of Science, Neurobiology and Physiology. GPA 3.98

University Honors Program Scholar

College Park, MD

May 2018

Core Competencies

Data Analysis & Visualization: Quantitative Analysis, Metrics Monitoring, Data Interpretation, Process Mapping

Process Improvement: Workflow Optimization, Root Cause Analysis, SOP Development, Lean Principles, TAT Reduction

Technical & Scientific Writing: Validation & Verification (V&V) Reports, SOPs, Training Manuals, Clinical Documentation, Manuscripts, Literature Reviews

Healthcare & Laboratory: EMR Systems (Cerner, Sunquest), CT Scan Analysis, Sample Processing, Quality Control (QC), Assay Development

Regulatory & Compliance: HIPAA, GDPR, FDA Regulations (Medical Devices), CAP/CLIA

Software & Tools: MS Office Suite (Advanced Excel, PowerPoint, Word, Project)

Certifications

HIPAA Compliance Training

GDPR: Data Protection and Privacy
