EDUCATION

Drexel University – LeBow College of Business

Master of Business Analytics | GPA: 3.8/4

Philadelphia, PA

Sep 2023 - Mar 2025

Coursework: Introduction to Deep Learning, Database Analysis and Design Business, Data Mining for Business Analytics

Rajalakshmi Engineering College

Bachelor of Engineering in Computer Science | GPA: 3.0/4

Chennai, India

Aug 2017- May 2021

WORK EXPERIENCE

Drexel University

Graduate Research Assistant

Philadelphia, PA

May 2025 - Present

- Employed comprehensive data analysis using statistical methods such as Linear Discriminant Analysis (LDA), and models like linear regression, decision trees, logistic regression to identify patterns and support data-driven decision-making.
- Automated 5-fold cross-validation workflows across multiple datasets, showcasing expertise in model evaluation and performance analysis.
- Completed two courses, Applied Data Analysis and Data Visualization; and two capstone projects prior to being a part of the research and its publication.

The Yiddish Arts and Academics Association of North America

Data Analyst

Remote

Jun 2024 -Sep 2024

- Conducted a full-year analytical summary of website performance identifying key trends in total views and user regions by collecting, cleaning, and analyzing web traffic data.
- Developed and implemented a predictive model using R (ARIMA, exponential smoothing) to forecast 2024 website performance, achieving over 90% accuracy in monthly traffic projections.
- Designed and executed a targeted SEO and marketing strategy based on analytical findings, leading to a 25% increase in organic traffic and improved regional engagement within 3 months.

Rama Pure Water Pvt Ltd

Product Analyst

Chennai, India

Jun 2021 - Aug 2023

- Generated detailed ad-hoc reports in Excel and SSRS, delivering critical insights that guided executive strategic decisions; improved reporting speed by 30% while ensuring data accuracy across all presentations.
- Led monthly customer review analysis, identifying key trends to enhance both existing products and new product launches.
- Partnered with the Data Engineering team to strengthen data governance practices, ensuring accurate and efficient collection & analysis of customer data over 70+ data fields.
- Conducted an in-depth analysis of product material sources, successfully reducing sourcing costs by 55% by identifying and negotiating with alternative vendors and reducing the transportation cost by 4 lakhs every month.
- Coordinated with external organizations to conduct comprehensive price analysis, resulting in the identification of cost-saving opportunities that optimized product importation expenses into the United States by 15% annually.

PROJECTS

Precisely Data Enrichment and Analysis Capstone Project

Drexel University|Sep 2024 – Dec 2024

- Developed a Python-based data enrichment pipeline leveraging the Precisely API, improving data retrieval efficiency by 40% and enabling enhanced decision-making through enriched demographics, flood risk, and property attributes.
- Conducted comprehensive geospatial and demographic analysis, uncovering key correlations between property values, flood risks, and economic segments, increasing predictive accuracy by 30% for market assessment

Datathon | 2025 Drexel LeBow / Bloomberg Datathon Winner

Drexel University|Feb 2025

- Led a team in analyzing complex business data to solve a real-world financial challenge. Used statistical analysis and data visualization to deliver actionable insights, earning top honors in a competitive field.
- *Business Analytics Competitor*: Analyzed and presented a data-driven solution to a panel of judges, utilizing data wrangling, visualization, and predictive modeling to address business problems.

Sentiment Analysis and Text Mining (Python)

- Analyzed 10,000+ Drexel Co-op feedback using Python and text mining to identify employer preferences; built an interactive dashboard to highlight insights into the co-op experience and hiring trends.

SKILLS

Databases/Big Data: SQL Server, MySQL, Hive, Excel, Access, PostgreSQL, Oracle, Azure DB, Mongo dB

Analytics/Visualization/CRM: Tableau, Power BI, Adobe Analytics, Google Analytics, Looker, Domo, Salesforce

Tools/Technologies: HTML, Alteryx, SQL Server Management Studio

Programming: R, Python, C++, Java, JavaScript
