Projects

DBT Project: Silver ScreenJan 2025 - Feb 2025
[Project link](#)

- Evaluated the relationship between rental costs and revenue to assess the efficiency of three Silver Screen movie theaters.
- Processed and cleaned movie catalog data, aggregated financial metrics, and built an ROI model to derive insights.
- Utilized SQL and dbt for data modeling, transformation, and validation to ensure data integrity.

Mastery Project: TravelTide Reward ProgramOct 2024 - Nov 2024
[Project Link](#)

- Designed a data-driven rewards program to improve customer retention and loyalty through targeted incentives.
- Analyzed customer behavior, segmented users, and optimized engagement strategies to enhance participation.
- Built a dashboard for visualizing insights and developed a database schema using SQL (PostgreSQL/MySQL) for managing rewards data.

Mini Project: MarketFlashOct 2024 - Nov 2024
Marketing Services
[Project Link](#)

- Built a data infrastructure and dashboard to track marketing performance across channels, audiences, and locations.
- Designed an ER Diagram, implemented a SQL database, and developed a Tableau dashboard to generate insights.
- Visualized marketing trends, audience engagement, and location-based performance using SQL-based ETL and Tableau.
