WORK EXPERIENCE

Skyview Travel Services

Manager / IT Support / Travel Agent

Jan. 2018 – Present

Hamtramck, MI

- Used Excel pivot tables and Tableau to create financial reports and graphics to measure business sales monthly
- Managed sales data using QuickBooks Online and excel to provide business sales insights
- Cater to customers' needs to assure retention rate
- Following up on customers to ensure business sales
- Designed and managed the business site
- Implemented 2 factor authentication for business security
- Maintained business software by keeping it up to date and handling any troubleshooting issues
- Updated security precautions to better handle sensitive customer information
- Communicating with customers about travel needs to help them with the correct travel plans

PROJECTS

I Incorporated – Unity game sponsored by Ford – Senior Capstone project

- Participated in weekly scrum meetings with team members and sponsor to keep track and update project goals
- Learned unfamiliar software to begin development of sponsored project
- Worked closely with teammates to debug the project left by the previous development team
- Documented the development process to ensure smoother future development
- Delivered presentations and demos to our sponsor

DND character sheet — Website

- Created a SQL database to store and retrieve user data
- Worked with cohorts to develop the back end of the site to add functionality using express and Node.js
- Collaborated with teammates using CSS3 and HTML5 to design the character sheet and site
- Developed a basic login system for our site using Node.js to allow returning users to save their character sheet
