SUMMARY

Graduate student in Healthcare Informatics at the University of Central Florida with hands-on experience in Electronic Health Records (EHR) systems, SQL, and data analysis. Passionate about leveraging data to enhance healthcare delivery and operational efficiency. Adept in managing large datasets, supporting system training, and collaborating across teams to drive process improvements. Strong understanding of Health Insurance Portability and Accountability Act (HIPAA) compliance, healthcare operations, and informatics tools including Excel, PowerPoint, and Visio. Proven background in healthcare research and clinical documentation as a medical scribe. Native speaker of English and Farsi, with professional proficiency in Spanish. Recipient of the Provost Scholarship and participant in the Honors and Scholars Program at The Ohio State University.

EDUCATION

- **University of Central Florida, (UCF)** Orlando, FL
M.S. in Healthcare Informatics 2024-Present
 - **GPA:** 4.00
 - **Coursework:** Healthcare Data Analytics, Database Systems & SQL, Health Information Systems, EHR Technologies, Project Management in Health IT, Healthcare Supply Chain Management
- **The Ohio State University** Columbus, OH
B.S. in Biology — Minor in Pharmaceutical Sciences 2016 - 2020
 - **GPA:** 4.00

PROFESSIONAL EXPERIENCE

- **Medical Scribe** Remote
Confidential Practice 2024 - Present
 - Document patient encounter in real time using EHR systems including Epic, NextGen, Intergy)
 - Enhance physician workflow and clinical documentation accuracy by over 30%
 - Strengthen familiarity with clinical terminology, coding, and health system operations
- **Kent State University** Independence, OH
Graduate Researcher – Epidemiology and Infectious Disease 2021 - 2022
 - Conducted microbiological sampling across five community sites in Cleveland
 - Identified bacterial seven strains and tested for antibiotic resistance
 - Trained and supervised ten undergraduate students on lab safety and analysis
 - Completed relevant course work including anatomy, physiology, genetics, ethics and research methods
- **The Ohio State University** Columbus, OH
Laboratory Assistant – Oral Cancer Research 2017 - 2019
 - Worked on drug delivery mechanisms for targeting oral cancer cells
 - Performed drug purification, micelle encapsulation, and dosage testing
 - Participated in research presentations and data review sessions
- **The Ohio State University** Columbus, OH
Undergraduate Research Assistant – Breast Cancer Research 2017 - 2019
 - Cultured cancer and healthy breast tissue cells for treatment response studies
 - Analyzed cell growth rates and therapeutic efficacy of Coumarin 6
 - Led grant-writing efforts and contributed to experimental design

PROFESSIONAL AFFILIATIONS

- **Healthcare Information and Management Systems Society (HIMSS)** 2024 - Present
Engaged in ongoing education and networking related to digital health, interoperability, and healthcare IT trends, Member.

PROJECTS

- **ChronoMedix Patient Scheduling System**

- Designed a Scalable, Secure, and Accessible Patient Scheduling Architecture: Successfully led the system design for ChronoMedix
- Enhanced Scheduling Efficiency and Workflow Integration across Systems: Developed a scheduling system that streamlined appointment workflows by integrating seamlessly with existing EHR, billing, and communication systems
- Applied Agile Development Principles and Usability-Centered Design: The design focused on usability for both medical staff and patients

- **EHR System Security Design**

- Conducted a Comprehensive Security Risk Analysis (SRA): Assessed potential threats and vulnerabilities in the EHR system by applying HIPAA guidelines and NIST standards, and documented risk mitigation strategies
- Designed and Implemented an EHR Security Framework: Developed a security architecture using HITRUST and NIST Cyber security Frameworks, incorporating access controls, encryption, and authentication measures
- Created HIPAA-Compliant Policies for Access, Privacy, and Disaster Recover: Drafted policies addressing data access privileges, breach notification procedures, cloud/BYOD security concerns, and formulated a disaster recovery plan to ensure business continuity

- **Northwoods Community Medical Center**

- Led the End-to-End Design and Planning of a CPOE System: Successfully served as the lead project manager in designing a comprehensive Computerized Provider Order Entry (CPOE) system
- Developed Structured Project Governance and Risk Mitigation Framework: Created a detailed project charter outlining the project's scope, objectives, and resource plan while proactively identifying risks, potential triggers, mitigation strategies, and assigning risk owners.
- Ensured Timely and Cost-Effective Execution
- Utilized Microsoft Project to build a detailed Work Breakdown Structure (WBS) and Gantt chart to allocate tasks and resources efficiently

- **Dental insurance company**

- Established a comprehensive and normalized database structure that accurately models the operations of a dental insurance company, including entities, relationships and cardinalities.
- Resolved complex relationships such as many-to-many associations and subtype/supertype hierarchies, improving data integrity and enabling accurate tracking of individual vs. family plans and multiple payment methods.
