Summary

Data Analyst with 5+ years of experience utilizing SQL, Python, and Tableau to drive data-driven decision-making; recognized for reducing reporting time by 60% through automated dashboards across multiple business units. Collaborated with stakeholders to uncover \$700k in low-impact investments, reallocating funds for improved returns. Seeking a senior analytics role to leverage expertise in standardizing KPIs and delivering impactful insights through advanced data analysis techniques.

Skills

- **Data Analysis & Business Intelligence:** Data Mining, Data Wrangling, Statistical Analysis, A/B Testing, Forecasting, Time Series Analysis, Predictive Modeling, Prescriptive Analytics, Market Analysis.
- **Programming & Data Science:** Python (Pandas, NumPy, SciPy, Scikit-learn, Matplotlib, Seaborn, Plotly), R (ggplot2, dplyr, Shiny), SQL (MySQL, PostgreSQL, SQL Server, Snowflake), Apache Spark.
- **ETL & Data Engineering:** Talend, Informatica, SSIS, Alteryx, Data Pipeline Automation, Cloud Data Integration.
- **Data Visualization & Reporting:** Tableau, Power BI (DAX, Power Query), Excel (Pivot Tables, Charts, VBA), SSRS, Google Data Studio.
- **Cloud & Big Data Technologies:** AWS (S3, Redshift, Quick Sight), Microsoft Azure, Google Cloud, Hadoop, Apache Kafka, Airflow.
- **Project Management & Tools:** Agile (Scrum), Waterfall, SDLC, JIRA, Confluence, GitHub.
- **Soft Skills:** Strategic Thinking, Problem-Solving, Stakeholder Management, Leadership, Cross-functional Collaboration.
- **Operating Systems:** Windows, Linux

Experience

Staffigo | Oakland, CA | Business Analyst

Sep 2024 - Current

- Reduced manual reporting by 22 hours monthly by building Tableau dashboards and enabling leadership to track campaign performance, customer reach, and initiative ROI in real time across five business units using Tableau's calculated fields.
- Collaborated with asset owners and business stakeholders in Agile ceremonies (standups, sprint reviews) to define data collection requirements, prioritize backlog items, and ensure timely delivery of analytics inputs accelerating reporting cycles by one sprint.
- Evaluated infrastructure program efficiency using advanced SQL, uncovering \$735K in low-impact investments and driving immediate budget reallocations to improve return on spend across modernization efforts by analysing asset performance and maintenance delays.
- Orchestrated nested queries, window functions, and CTEs in SQL to cleanse and validate datasets for 17 telecom/electrical assets containing 1M+ records; data accuracy improved by 25%.
- Automated data ingestion from diverse sources using Python-based ETL pipelines; processed 250K records daily, improving data accuracy for sales dashboards supporting five departments
- Standardized 12 campaign KPIs across marketing and finance eliminating metric confusion and reducing duplicated reporting efforts by 75%.
- Developed and maintained 5+ ad hoc Python scripts to automate data extraction and preprocess financial data, allowing accurate forecasting, and minimized reporting errors by 15% across 12 campaigns.
- Extracted 300K+ pole loading calculations (PLCs) from Documentum, parsed PLCs using AWS Textract, and transferred structured data to Foundry database; analysed outputs with Excel VLOOKUPS to ensure compliance and prevent \$1M in regulatory penalties.

Capital One Financial | Boston, MA | Data Analyst

Mar 2024 - Sep 2024

- Engineered SQL queries across 40K+ user sessions to pinpoint inactivity thresholds based on login frequency and engagement, triggering re-engagement email campaigns boosting user retention by 15%.
- Developed Python automation scripts using Pandas to generate and format stakeholder dashboards, saving 12 hours weekly, reducing manual errors by 90%, and accelerating decision-making across fundraising and campaign strategy teams.
- Directed donor conversion prediction models using scikit-learn, improving email segmentation precision by 18% and boosting average click-through rates across three consecutive campaigns.
- Collaborated with fundraising teams to define six core KPIs, reducing weekly reporting rework by 50% and streamlining donor performance review cycles for executive reporting.

Mimecast | Boston, MA | Analytics

Jun 2022 - Dec 2022

- Designed 30+ interactive Tableau dashboards visualizing global campaign performance, accelerating data-driven decisions and cutting reporting time by 15 hours weekly, leading to more effective campaign optimizations.
- Automated Tableau Server dashboard refreshes using Python and scheduled scripts, reducing manual effort for 10 analysts and ensuring timely data delivery, which improved stakeholder access to insights and accelerated daily decision-making.
- Designed Lucid chart diagrams visualizing lead-to-close funnels, aligning marketing and sales on handoff stages and reducing qualification cycle delays by 20%

Hexaware technologies | India | Data Analyst

Mar 2020 - Aug 2021

- Automated Excel-based reporting workflows using Python and Power Query to consolidate and transform multi-source data, reducing delivery time by 60%, minimizing manual errors, and enabling faster client reporting for telecom and healthcare stakeholders.
- Built Tableau dashboards and standardized KPIs, reducing SLA breaches and client response times by 30% by reducing redundant reporting.
- Revamped PL/SQL jobs and integrated QA checks, improving dashboard stability and reducing critical data defects by 40%, accelerating BI deliverable signoffs.
- Conducted A/B testing in R and Excel to optimize outreach content, boosting email open rates by 12% and driving higher user engagement.
- Orchestrated cross-functional workshops to capture critical business needs, translating insights into 3 technical specifications enhancing client operations that reduced support tickets by 15% in the first quarter.

Education

Northeastern University | Boston, MA.

Sep 2021 - Dec 2023

Master of Science in Engineering Management
