EDUCATION

Bachelor of Science in Computer Science

University of Kansas, Lawrence, KS, USA

2022 - 2026

PROFESSIONAL EXPERIENCE

Data Analytics Intern, Capitol Federal Savings Bank

Topeka, KS, USA

Nov 2025 – June 2026

- Deployed a Snowflake-native data quality framework using 144 custom Data Metric Functions, profiling, cleansing, and validating data across 36 conformed financial tables via a 54,626-row master mapping table; established full data governance controls and SOX-compliant audit trail, cutting production data incidents by 60%
- Built 4 production data models and Sigma Computing dashboards for digital banking engagement, eStatement enrollment, new customer onboarding, and small business analytics, daily visualizations delivering actionable insights that surfaced 1,452 never-enrolled accounts for immediate outreach and reduced ad-hoc reporting requests by 35%
- Applied exploratory data analysis and statistical techniques to identify trends, patterns, and insights across 18,597+ customer accounts; cohort segmentation across 4 onboarding categories, linear regression forecast on 950+ daily data points adopted by marketing as official campaign roadmap, digital stickiness at 38.10% vs. 20-30% industry benchmark
- Wrote and optimized complex SQL transformations in Snowflake processing millions of daily banking transactions, multi-CTE queries joining 8+ tables, window functions and deduplication, improving query performance by 40% through clustering key optimization and micro-partition pruning
- Developed Python predictive models, achieving 96% accuracy forecasting customer behavior trends; collaborated cross-functionally with data architects, compliance teams, and business stakeholders to translate requirements into analytical solutions and present findings to executive leadership
- Analyzed 12.7M Snowflake query history rows to identify warehouse inefficiencies across the full compute fleet, surfaced \$16,145 in monthly idle waste and a single root cause worth \$5,918/month; findings were cited in a formal consolidation strategy projecting \$74,400–\$96,000 in annual savings

Student IT Support Specialist, KU IT Customer Service Center

Lawrence, KS, USA

Aug 2023 - Aug 2025

- Resolved 100+ daily system issues across enterprise environments; performed diagnostics and troubleshooting across large-scale infrastructure supporting 28,000+ users.
- Followed established processes and documentation standards to ensure repeatability, reliability, and on-time delivery; developed and contributed to standardized troubleshooting procedures that improved team efficiency by 20%.

PROJECTS

Lead, Customer Churn Prediction & Proactive Retention Strategy

Lawrence, KS, USA

Aug 2025

- Applied statistical analysis and hypothesis testing across 5,000+ customer records to segment customers by behavior, and identified 62% of at-risk customers before churn and validated the segmentation framework through significance testing
- Built an automated reporting dashboard with real-time alerting that cut manual investigation time by 40% and gave the business team direct visibility into retention risk
- Engineered behavioral features from raw customer data, activity frequency, recency, and engagement patterns, feeding them into the segmentation model to improve signal quality

Lead, LLM-SQL Agent: Self-Service Analytics Platform

Lawrence, KS, USA

July 2025

- Built a self-service analytics tool enabling non-technical users to query large datasets in natural language; achieved 85% query accuracy across 50+ test cases.
- Implemented data governance controls with audit trails and access permissions to ensure data quality and compliance across all queries.
- Reduced ad hoc reporting requests by 40% by standardizing data retrieval workflows and making data more accessible to non-technical users.

Lead, EPL Season Winner Prediction & Analytics Dashboard

Lawrence, KS, USA

June 2025

- Analyzed historical Premier League data to identify performance patterns and built statistical forecasting models to predict season outcomes.
- Designed a PostgreSQL data warehouse with automated ETL workflows and real-time data ingestion, reducing data preparation cycles by 50%; ensured clean and consistent data inputs before each reporting cycle.
- Built an interactive Tableau dashboard with predictive insights, scenario analysis, and performance summaries to explore and present findings visually.

CORE TECHNOLOGIES, SKILLS & CERTIFICATIONS

Reporting & Analytics: Exploratory Data Analysis, Big Data Analytics, Microsoft Excel (Advanced), Tableau, Power BI, Sigma Computing, KPI Development, Dashboard Design, Reporting Automation, Ad Hoc Analysis, Statistical Analysis, Performance Tracking

Data Management: Data Accuracy & Integrity, Data Consistency, Large Dataset Processing, Data Cleaning & Organization, ETL/ELT Pipelines, Data Warehousing, Data Modeling, Data Governance

Programming: SQL, Python (pandas, scikit-learn, statsmodels, matplotlib, seaborn), R.

Databases & Cloud: NoSQL, Snowflake, PostgreSQL, MySQL, Redshift, AWS (EC2, S3), GitHub Actions, Docker, REST APIs, Git

Business Skills: Cross-Functional Collaboration, Stakeholder Communication, Standardized Reporting, Requirements Analysis, On-Time Delivery

Certifications: Google Data Analytics Certificate
