

Muneeza Sultana

331-274-1370 • muneezasultana16@gmail.com • LinkedIn

Computer science graduate student with hands-on industry experience in software development, GIS, and quality engineering. Proficient in Java, .NET, databases, and testing practices, with a strong foundation in problem-solving and system design. Eager to contribute to a collaborative team and grow as a technology professional in a full-time role.

EDUCATION

Governors State University

May 2025 - May 2025

Master of science Computer Science
University Park, IL

WORK EXPERIENCE

Software Engineer

Nov 2021 - Jun 2023

Capgemini Technology Services Limited India

- Developed and executed detailed test cases for enterprise applications using JIRA and Agile methodology, reducing post-deployment defects by 30%.
- Conducted System, Integration, and User Acceptance Testing (ST, SIT, UAT) to validate application functionality, improving overall system stability for 100+ end users.
- Automated regression testing workflows using Selenium, decreasing manual testing time by 40% per sprint.
- Tracked, prioritized, and resolved defects in JIRA, enhancing sprint velocity by 15% and accelerating bug resolution.
- Collaborated with cross-functional teams and clients to gather requirements and translate them into actionable solutions, improving stakeholder satisfaction by 20%.
- Participated in Agile ceremonies (stand-ups, sprint planning, and retrospectives) to improve sprint visibility and predictability, achieving 95% on-time story delivery.
- Supported deployment and post-production verification for multiple applications, ensuring zero critical defects in release cycles.
- Developed scripts to automate routine QA tasks, reducing testing effort by 2 hours per cycle and improving efficiency.
- Analyzed system performance logs to identify bottlenecks, improving application responsiveness by 15%.
- Documented test scenarios, results, and best practices, standardizing QA processes and enabling faster onboarding of new team members.

GIS Developer

Dec 2020 - Oct 2021

Kshema General Insurance Limited India

- Utilized QGIS to visualize, edit, and analyze geospatial datasets for land records and insurance workflows, increasing data accuracy by 25%.
- Developed interactive web maps using JavaScript, HTML, CSS, and Leaflet, boosting accessibility and engagement for internal stakeholders by 30%.
- Created choropleth and heatmap layers to represent insurance risk zones, reducing decision-making time for risk assessment by 20%.
- Performed spatial and time-series analysis on large datasets, supporting downstream applications and improving analytics data availability.
- Streamlined GIS workflows by digitizing layers, standardizing visualization practices, and reducing onboarding time for new analysts by 50%.
- Integrated GIS data with internal dashboards, enhancing data literacy and enabling quicker operational decisions.

- Managed coordinate systems and spatial projections, ensuring consistent map outputs across 50+ projects.
- Collaborated with business teams to design GIS solutions tailored to operational requirements, resulting in 20% faster project delivery.
- Automated map generation and reporting processes using QGIS tools, saving 10 hours per week and increasing productivity.
- Maintained, documented, and improved GIS datasets, ensuring high data quality and supporting strategic decision-making across the organization.

SKILLS

Programming Languages: Core Java, JavaScript, HTML, CSS, SQL

Backend & Frameworks: Spring Boot, RESTful APIs

GIS & Visualization: ArcGIS, QGIS, Leaflet, StoryMaps

Development & DevOps: Git, Jenkins, Postman, Selenium, MySQL, Web GIS, UI/UX

Agile & Tools: JIRA, Agile (Scrum, Backlog Grooming, Sprint Planning)

ACHIEVEMENTS AND CERTIFICATIONS

Digital Storytelling Fellow: Selected for a competitive fellowship where I designed and developed interactive narratives using advanced GIS and StoryMaps techniques.

Integrated front - end technologies, multimedia content, and sophisticated data visualizations to analyze and highlight critical environmental issues (e - waste hotspots and renewable energy adoption).

This project served as a significant contribution to civic data research and demonstrated expertise in translating complex spatial data into engaging, publicly accessible digital content.

ILGISA MOOC: A Gentle Introduction to Location Technologies

Esri Technical Certification: ArcGIS Developer Foundation 2201

Generative AI: Introduction to Generative AI | Google Cloud Skills Boost

Career Essentials in Generative AI by Microsoft and LinkedIn

Capgemini University: Core Java, Python, Full Stack BDD (Cucumber, Selenium), SDET, API Testing, QA Automation

iCompass: SDET, API Testing, Full Stack (FS)

ISRO (Indian Space Research Organization): Basics of Remote Sensing, GIS, GNSS, Web GIS Technology, and Geoprocessing with Python
