Profile

As a Fullstack Web Application Developer, I have experience in designing, developing, and maintaining high-performance web applications. I also have knowledge in data analysis and reporting.

Professional Experience

2023/04 – 2024/07

Fullstack Engineer

Uzmar Technologies

- Built and managed ERP functionalities using Grails and MSSQL, ensuring efficient integration and performance.
- Created and automated detailed reports with iReport and MSSQL, enhancing data accessibility and decision-making.
- Developed the company's website using HTML, CSS, and PHP, focusing on responsive design and improved functionality.
- Implemented a secure and scalable authentication system using Next.js and Redux, enabling seamless user login and session management.

2022/09 – 2022/12

Intern Frontend Developer

Mahrek Technology

- Built a modern, user-friendly website using ReactJS and Ant Design, leveraging pre-built components to create a polished and intuitive interface that enhances user experience.
- Utilized Redux for state management, ensuring smooth data flow, scalability, and optimal performance across the application.

2022/06 – 2022/07

Intern Fullstack Developer

Viral Software

- Identified and fixed UI/UX issues, ensuring a seamless user experience and improved functionality across the application.
- Built a dynamic and responsive movie and series website using PHP, HTML, CSS, and JavaScript, focusing on interactive design and user-friendly navigation.

2021/07 – 2021/08

Intern Fullstack Developer

Kiğili

- Built a personal CV website using Laravel, HTML, CSS, and JavaScript, ensuring a professional and responsive design.
- Developed a dynamic photo gallery website using Laravel, MySQL, HTML, CSS, and JavaScript, focusing on smooth navigation and interactive features.
