SUMMARY

Experienced Business Data Analyst with 3+ years of experience in transforming complex business requirements into actionable data insights, optimizing decision-making through advanced analytics, and delivering high-impact dashboards. Skilled in SQL, Python, Tableau, and Power BI to perform data validation, KPI tracking, and performance monitoring across diverse domains. Adept at collaborating with cross-functional teams, leading requirements gathering, and implementing data-driven solutions that improve efficiency, reduce costs, and enhance user experience. Recognized for bridging the gap between business needs and technical execution to drive measurable outcomes.

SKILLS

Data Analysis & Validation: SQL (SQL Server, PostgreSQL, BigQuery), Data Profiling, Data Cleansing, Data Mapping

Business Intelligence (BI): Tableau, Power BI, Looker Studio, Dashboard Development, KPI Tracking

Data Processing & Scripting: Python (pandas, NumPy), Excel (Pivot Tables, VLOOKUP, Data Analysis)

ETL & Data Integration: TETL Process Support, Data Transformation, Schema Mapping, Source-to-Target Mapping

Requirement Gathering & Documentation: Stakeholder Interviews, KPI Definition, Data Dictionaries, Acceptance Criteria

Testing & Quality Assurance: UAT, Test Case Creation, Data Accuracy Verification, Regression Testing

Project & Task Management: Jira, Confluence, Agile/Scrum Methodology, Workflow Tracking

Domain Knowledge: Healthcare Claims Analytics, Member Utilization Analytics, Conversational AI Analytics, Customer Journey Analytics

EXPERIENCE

United Healthcare Group, USA | Business Data Analyst

Feb 2025 – Present

- Collaborated with claims processing, provider relations, and quality teams to gather requirements and translate business needs into measurable KPIs, including PMPM cost, readmission rate, and preventive screening rate.
- Performed data extraction and validation using SQL Server to ensure claims cost, member utilization, and provider performance metrics matched source system records.
- Partnered with BI developers to design and enhance Tableau dashboards, integrating interactive filters and drill-downs for date range, service type, region, and provider.
- Supported ETL processes by mapping data fields from claims, member, and provider systems, ensuring accurate data transformation and load into the analytics warehouse.
- Delivered user training, conducted UAT, and implemented feedback loops to improve dashboard usability, reducing report generation time from 2 days to under 1 hour.

Streebo Inc, India | Business Data Analyst

Jan 2021 to July 2023

- Collaborated with customer success, chatbot design, and engineering teams to gather requirements and define KPIs such as Containment Rate, Fallback Rate, First Message Resolution, and CSAT.
- Extracted and validated chatbot event data from PostgreSQL and BigQuery using complex SQL queries to ensure metric accuracy against raw logs.
- Designed and maintained interactive Tableau and Power BI dashboards with channel, client, and intent-level filters, enabling real-time monitoring of chatbot performance.
- Utilized Python (pandas) for data cleaning, sessionization, and calculation of advanced metrics such as turns per resolved chat and fallback trends.
- Conducted A/B testing on greeting messages and quick replies, analyzing engagement and containment improvements via Tableau and Excel pivot tables.
- Documented metric definitions, acceptance criteria, and data mapping processes in Confluence, while tracking enhancement requests and defects in Jira.
- Presented weekly performance insights, highlighting top underperforming intents with related chat transcripts, resulting in a 28% reduction in agent handoffs and a 12% drop-in fallback rate.

EDUCATION

Master of Science in Business Analytics

Dec 2024

Midwestern State University, Texas, USA

Bachelor of Science

July 2022

Bhavan's New Science College, India
