## Summary

Business Analyst with 1 year of experience specializing in requirement gathering, Use Cases, and Business Requirements documentation. Skilled in analyzing data to inform decisions, collaborating with cross-functional teams, and maintaining centralized project documentation in Confluence. Proven ability to elicit and document detailed requirements, create process flow diagrams, and develop test cases to ensure project success and measurable business enhancements.

## Technical Skills

- **Business Requirements & Modeling:** Requirement Gathering (Expert in Requirement Gathering), Use Cases, Process Flow Diagrams, Facilitating Meetings
- **Stakeholder & Communication Skills:** Communication (Excellent communicator), Stakeholder Engagement (Expert in Stakeholder Engagement), Collaboration, Organization
- **Quality Assurance & Testing:** Test Case Development (Skilled in Test Case Development), Quality Assurance
- **Data Analysis & Databases:** SQL (Proficient in SQL), Python (Pandas, NumPy) (Data analysis with Python), Oracle, MySQL, Snowflake
- **Programming Languages:** Python (Programming Language), SQL (Structured Query Language), PL/SQL (Procedural Language/SQL)
- **Requirement & Documentation Tools:** JIRA, Confluence, SharePoint
- **Reporting & Visualization Tools:** Power BI, Tableau, Excel, PowerPoint
- **Collaboration & Project Management Tools:** Trello, ClickUp, Slack, Microsoft Teams, Notion
- **Development & Data Platforms:** Postman
- **Soft Skills:** Analytical Thinking (Strong Analytical Thinking), Requirement Gathering (Experienced in Requirement Gathering)

## Professional Experience

ZENTHOR IT LLC04/2025 - Present

Business AnalystRemote

- Facilitated stakeholder meetings to elicit and document detailed Business Requirements, ensuring alignment across over 15 cross-functional departments.
- Created 20+ Use Cases and process flow diagrams using MS Visio, translating business needs into clear specifications, which reduced requirement clarifications by 25%.
- Documented Business Requirements and maintained them in a centralized repository (Confluence), promoting transparency and ease of access.
- Supported the quality assurance process by drafting and executing 40+ test cases, ensuring solutions met business needs, resulting in a 15% reduction in post-deployment issues.
- Analyzed key operational data to identify trends, leading to process optimizations that increased team productivity by 10%.

HCL Technologies06/2022 - 05/2023

Software EngineerHyderabad, India

- Designed and executed 50+ unit and integration test cases to ensure software reliability, reducing defect rates by 20% and enhancing overall system quality.
- Documented system architecture and user guides, facilitating smoother onboarding and knowledge transfer across teams, which improved documentation turnaround time by 15%.

- Developed and maintained enterprise-level applications, streamlining data flow and improving data uniformity by 40% using SQL and Python.
- Engineered and optimized complex SQL queries for database management, reducing query response time by 25%, supporting timely business decisions.
- Led testing and deployment of system enhancements, reducing system downtime by 30% and increasing system reliability, directly resulting in improved client satisfaction.

## Projects

---

### Intelligent Data Analytics Platform

- Fall 2024 • Designed and developed a cloud-based data analytics platform to process and visualize large datasets, utilizing AWS and SQL for efficient data management and integration. Created Use Cases to guide development and documented all requirements in a centralized repository, improving cross-team collaboration. Implemented automated data validation, transformation pipelines, and test cases to ensure data integrity, reducing data errors by 25%. Developed interactive Power BI dashboards visualizing real-time insights, enabling stakeholders to accelerate decision-making processes by 30%, which contributed to an estimated \$50K annual savings in operational costs. Collaborated with cross-functional teams and employed QA practices to validate solution quality, supporting quicker deployment and cost savings.

### SQL-Based Data Reporting and Visualization

- Spring 2024 • Created and executed complex SQL queries to extract, analyze, and report on simulated data from an Oracle database, enhancing data retrieval efficiency by 40%. Developed Use Cases for reporting modules to ensure alignment with business needs and documented requirements in a centralized knowledge base, fostering improved team collaboration. Drafted comprehensive test cases, reviewed documentation for accuracy, and supported ongoing QA activities, leading to a 20% reduction in manual reporting efforts and saving approximately \$15K annually. Developed interactive Power BI dashboards visualizing key provider metrics and trends, increasing user satisfaction scores by 15%. Collaborated with stakeholders to refine requirements, ensuring the reports met strategic objectives and aligned with real-world reporting needs.

### Smart Inventory Management System

- Fall 2023 • Developed a comprehensive inventory management system integrating real-time stock tracking, supplier management, and order processing, with robust CRUD functionality and secure role-based access control. Documented Business Requirements and Use Cases in a centralized repository, facilitating seamless cross-team collaboration. Created process flow diagrams and user stories for feature development, improving process clarity. Implemented security best practices for data management, ensuring compliance with privacy regulations. Conducted QA testing to validate transaction accuracy, reducing inventory discrepancies by 20%, and resulted in a 15% reduction in inventory holding costs, saving approximate \$200K annually through optimized stock levels.

## Education

---

### MS in Management Information Systems (Expected Dec 2024)

Lamar University

12/2024

Beaumont, TX

### B.S. in Information Technology

Sagi Rama Krishnam Raju College

05/2022

Bhimavaram, India
