

NITISH REDDY THOUTEREDDY

Data Analyst

Location: Memphis, TN | **Phone:** (901) 501-6024 | [LinkedIn](#) | **Email:** nitishrt31@gmail.com

SUMMARY

- Data Analyst with over 4+ years of experience in data analytics, business intelligence, and data engineering across financial and technology sectors.
- Highly skilled and results-driven Data Analyst with a Master's in Information Systems and hands-on experience in data analysis, machine learning, and cloud technologies.
- Expertise in developing and optimizing data pipelines, creating dynamic dashboards, and performing advanced statistical analysis to drive data-driven decision-making.
- Proficient in SQL, Python, R, and data visualization tools such as Tableau and Power BI.
- Adept at managing large datasets and integrating them into cloud platforms like AWS, ensuring improved data accessibility and processing.
- Proven track record in optimizing business processes, reducing operational costs, and enhancing data accessibility across various domains, including financial risk monitoring and supplier performance tracking.
- Experienced in designing and implementing ETL processes, predictive modeling, and real-time data analysis.
- Strong collaboration skills in Agile environments, consistently delivering actionable insights and improving business performance.

SKILLS

- **Programming Languages:** Python, SQL, R
- **Data Visualization:** Power BI, Tableau, Advanced Excel
- **Analytical Skills:** Data Mining, Data Cleansing, Statistical Analysis, Data Visualization, Text Mining, ETL, Data Wrangling, Data Warehousing, Time Series Analysis, A/B Testing, SAP, SAS
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Plotly, Seaborn, Streamlit, FastAPI, NLTK
- **Databases & Data Warehouses:** PostgreSQL, SQL Server, MySQL, Snowflake, Teradata, BigQuery
- **Data Engineering:** Alteryx, Talend, Informatica, Apache Airflow, dbt
- **Cloud Platforms:** AWS (Redshift, DynamoDB, S3, Athena, Lambda)
- **Methodologies:** SDLC, Agile (Scrum), Waterfall
- **Version Control:** Git, GitHub
- **ML Techniques:** Regression, KNN, Decision Tree, Naive Bayes, Random Forest
- **Healthcare Tools & Technologies:** HIPAA, EMR, HER

WORK EXPERIENCE

JPMC

June 2023 – Present

Data Analyst

- Implemented a Financial Risk Monitoring System, developing data pipelines using Apache Airflow and dbt to streamline ingestion and transformation processes in Snowflake, enabling proactive risk detection. This initiative reduced fraud detection time by 25%.
- Optimized SQL queries and Python scripts to identify fraud patterns and financial anomalies, leveraging machine learning models such as KNN and Random Forest. Achieved a 30% reduction in false positive rates.
- Collaborated with stakeholders in an Agile (Scrum) environment to design and deploy dynamic dashboards using Power BI and Streamlit, supporting financial risk assessments. Increased stakeholder engagement by 40% through enhanced data visualization.
- Integrated AWS services (DynamoDB, S3, Athena) to enhance financial data processing, storage, and retrieval while ensuring regulatory compliance.
- Developed API endpoints with Fast API to enable seamless connectivity between risk models and real-time data analysis systems.
- Conducted time series analysis with Pandas and Seaborn to identify trends and deliver actionable insights for financial risk forecasting.
- Automated compliance reporting using Alteryx, improving regulatory adherence and operational efficiency.
- Applied GitHub for version control, enhancing collaboration, traceability, and workflow optimization within cross-functional teams.

Dell

February 2020 – December 2021

Data Analyst

- Orchestrated the Customer Order Fulfilment Optimization project by developing and enhancing ETL processes with Talend and Informatica, enabling seamless data integration into SQL Server and Teradata. This led to a 20% increase in order processing speed.
- Composed and optimized complex SQL scripts to analyse order processing trends, uncover inefficiencies, and drive improvements in warehouse logistics. Reduced processing errors by 15% through enhanced data accuracy.
- Built interactive dashboards using Tableau and Advanced Excel, delivering comprehensive insights into fulfilment operations and key performance indicators.
- Applied Python for data pre-processing, ensuring high-quality, structured datasets to support accurate reporting and analytics.
- Coordinated with various teams under the Waterfall model to refine fulfilment processes, ensuring alignment with business goals and operational needs.
- Performed detailed statistical assessments and implemented predictive modelling techniques such as Regression and Decision Tree to enhance inventory planning and order forecasting. Improved forecast accuracy by 25%, significantly reducing overstock and understock situations.
- Utilized AWS Redshift and S3 to efficiently manage vast order datasets, enabling quick access and performance monitoring across the supply chain.
- Maintained version control and ensured data consistency through Git, facilitating streamlined documentation and collaboration across project teams.

Blue Dart

August 2019 – January 2020

Data Analyst – Trainee

- Assisted in the collection, pre-processing, and analysis of logistics data to optimize delivery routes and minimize operational costs, contributing to a 15% reduction in delivery time.
- Analysed shipment data to identify inefficiencies, utilizing statistical techniques to improve customer service and enhance route planning.
- Conducted data cleansing and wrangling tasks using Python and SQL, ensuring data integrity and readiness for further analysis.
- Developed reports and visualizations using Advanced Excel and Matplotlib to communicate insights and track operational performance improvements.

PROJECTS

Customer Retention Analytics

- Designed a SQL-based data warehouse to consolidate customer behaviour data from multiple touchpoints, improving decision-making accuracy.
- Developed interactive dashboards using Tableau, allowing marketing teams to monitor customer churn and engagement patterns.

Supplier Performance Tracking

- Integrated supplier data into AWS Redshift, facilitating centralized storage and enabling real-time tracking of vendor performance metrics with improved data accessibility.
- Performed data cleansing and validation using R to ensure data consistency, identify anomalies, and improve data quality for accurate performance reporting.

Real-Time Fraud Detection System

- Developed a real-time fraud detection system using TensorFlow and Keras, integrating with transactional databases to monitor and flag fraudulent activities.
- Employed deep learning neural networks to analyse and identify transaction patterns, enhancing the security and efficiency of financial operations.

EDUCATION

- **Master in Information Systems**
University of Memphis, Memphis, TN | CGPA: 3.4
- **Bachelor in Computer Science**
Vardhaman College of Engineering, Telangana, India | CGPA: 3.3

January 2022 – May 2023

July 2017 – May 2021

CERTIFICATIONS

- **AWS Certified Solution Architect – Associate**
