EDUCATION

Western Governors University

Bachelor of Science in Software Engineering

Salt Lake City, UT

Aug 2025

EXPERIENCE

Housing Coordinator

Soma Community

Sep 2024 – May 2025

Bloomington, MN

- Collaborated with case managers, medical staff, and external agencies to support residents' well being and service plans.
- Maintained accurate documentation of resident progress, incidents, and service plans to ensure compliance and effective communication across teams.
- Coordinated and monitored daily operations of residential housing for individuals with varying needs, ensuring safety, cleanliness, and compliance with program policies.
- Met with clients regularly to assess their needs and provide transportation to appointments, essential services, or community resources.

Software Engineer Trainee

Coding Temple

Feb 2024 – May 2024

Remote

- Worked with developers to identify and remove software bugs.
- Built Full-Stack Applications using HTML, CSS, JavaScript, TypeScript, Python, SQL, Flask, and SQLite.
- Wrote clear, clean code for various projects.
- Engaged in team based projects using Git for version control, practicing Agile workflows to deliver features on time.

PROJECTS

Employee Management System | *Python, Flask, SQLite, HTML, CSS, Bootstrap* | [Source Code](#)

- Developed a CRUD application to manage employee records including creation, updates, deletions, and detailed views.
- Utilized Flask to build backend functionality and handle routing, form validation, and database interactions.
- Integrated SQLite for lightweight, efficient data storage and management.
- Designed a responsive user interface using HTML, CSS, and Bootstrap for accessibility across devices.
- Focused on usability and clean design to ensure a seamless experience for business users.

Workout Tracker | *Python, React, TypeScript, FastAPI, DynamoDB* | [Source Code](#)

- Developed a full-stack CRUD application to track and manage workouts, supporting create, read, update, and delete operations.
- Built a RESTful API with FastAPI, implementing secure authentication and token-based authorization.
- Designed a responsive frontend in React with TypeScript for a smooth, interactive user experience.
- Integrated AWS DynamoDB for scalable NoSQL data storage, organizing workouts by user.
- Implemented protected routes, user login/signup, and real-time updates to enhance functionality and control.

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), JavaScript, TypeScript, HTML/CSS

Frameworks: React, Node.js, Flask, FastAPI

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, AWS DynamoDB

Libraries: pandas, NumPy, Matplotlib, Boto3
