

Omid Shabgard Full-Stack Engineer | Software Quality Assurance Specialist

Cohoes, NY | omidsangar@gmail.com | (518) 417-8577 |

Summary Results-driven Full-Stack Engineer and Lead Automation Tester with extensive experience in designing, developing, and testing scalable web applications. Combining a strong foundation in Software Quality Assurance (SQA) with expertise in full-cycle development, test automation, and deployment strategies, I help companies accelerate product development, improve software quality, and streamline releases. Proficient in JavaScript (React, Node.js), Python, and automation frameworks (Cypress, Selenium, Playwright, Pytest), with additional strengths in cloud computing (Google Cloud) and API testing. Passionate about delivering high-quality, secure, and scalable solutions that enhance user experience and drive business success.

Industries Served: Healthcare, Accounting, Banking, Insurance, and E-Commerce

Technical Skills Programming Languages: JavaScript (ES6+), Python 3 Frontend: React.js, Next.js, HTML5, CSS3, Webpack, Babel Backend: Node.js, Express.js, MongoDB, RESTful APIs Testing & Automation: Cypress, Selenium, Playwright, Pytest, Jest, Postman, REST Assured Cloud & Infrastructure: Google Cloud and AWS Project Management & Agile Tools: Jira, Scrum, SDLC, STLC, HP ALM, Git, Jenkins, GitHub Actions, CI/CD pipelines

Professional Experience:

Full Stack Software and Test Automation Engineer at Tripleten: 2024 - Present

Deliver end-to-end web solutions, from building secure, scalable RESTful APIs with Node.js,

Express.js, and MongoDB to crafting dynamic, responsive frontends using React.js.

Enhance application performance and reliability by deploying projects on Google Cloud.

Create modern, engaging interfaces that provide seamless and intuitive user experiences across devices.

Develop maintainable backend architectures and dynamic frontends that adapt to evolving business needs.

Help clients elevate their digital presence with robust, cloud-integrated applications that drive efficiency and growth.

Vantage Risk Companies, Atlanta, GA | Jun 2022 – Jun 2024

Led QA automation for insurance and reinsurance platforms, increasing test coverage and accelerating releases.

Built a Python (Pytest) automation framework with reusable fixtures and parameterized tests, cutting regression time by 40%.

Performed manual and automated testing, including API validation with Postman and REST Assured to ensure data integrity and integrations.

Supported Google Cloud deployments and validated SharePoint workflows, improving platform reliability and reducing defects.

AYCO, Albany, NY | Apr 2018 – May 2022

Lead QA efforts for E-Commerce and Accounting platforms, delivering high-quality releases for financial and transaction systems.

Automated end-to-end E-Commerce workflows using Cypress, including shopping carts, payments, account management, product search, and cross-browser testing.

Built Playwright scripts for Accounting workflows, covering invoices, financial validations, reporting dashboards, role-based access, and API integrations.

Performed API testing with REST Assured and Postman to ensure reliability, data accuracy, and seamless platform integrations.

Collaborated with developers and business teams to strengthen testing frameworks and maintained QA documentation for improved traceability and defect tracking.

Hometown Bank, Morton, IL | Feb 2016 – Apr 2018

Performed functional and regression testing for banking web and mobile applications, including fund transfers, bill payments, loans, mortgages, transaction history, and user access controls.

Automated key banking workflows using Selenium, reducing manual effort and improving test accuracy.

Collaborated with developers and product teams to expand test coverage and ensure compliance with banking standards.

Documented test results and defects for better traceability and release quality.

## Education

Mulana Jalaluddin M Balkhi University, Afghanistan 2009 – 2012 | bachelor's degree in law & political science

## Certifications

React.js Certificate – W3Schools (Jun 2024)

JavaScript Certificate – W3Schools (Aug 2024)

Python 3: Functions, Files, and Dictionaries – University of Michigan (Sept 2023)

Python 3 Basics – University of Michigan (Jul 2023)

Azure REST API & Node.js Serverless Functions – Coursera (Jun 2023)

REST Assured API Testing – Coursera (Jun 2023)

Testing & Debugging in Python – SUNY Orange (Jun 2023)

Professional Scrum Master (PSM) – Scrum.org (Mar 2022)

Test Automation QA & Selenium – CREEKSIT (2021)

## Projects

News Explorer App (Full Stack) Dec 2023 – Jan 2025

Tech: JavaScript, React.js, Node.js, Express.js, MongoDB, Google Cloud Developed RESTful APIs with Express.js and MongoDB and deployed on Google Cloud. Built a fully responsive UI with React.js for seamless user experience.

WTWR (What to Wear) Tech: JavaScript, React.js, Node.js, Express.js, MongoDB Built a secure backend API with Node.js and Express.js and integrated MongoDB. Designed a dynamic frontend with React.js for an interactive user experience.

CommuniTee Communication App (frontend)

Tech: JavaScript, React, TypeScript and API Developed frontend and backend. User login, sending messages, dropdown with multiple selections, user can send messages and get notifications. Implemented notification system with reminders and configurable options
