

Pavan Sai | Data Analyst

Arlington, Texas | +1 (615) 892-7259 | pavansaiachimsetty7@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with around 4 years of experience delivering actionable insights across Financial Services, Healthcare, and HR domains. Proven ability to leverage SQL, Python, Tableau, and Machine Learning to drive business performance, improve operational efficiency, and support compliance initiatives. Skilled in developing ETL pipelines, interactive dashboards, and predictive models that enhance decision-making processes. Adept at collaborating with cross-functional teams in Agile environments to translate business requirements into data-driven solutions.

EDUCATION

Master of Science in Information Technology

University of the Cumberland

Dec 2024

Bachelor of Technology

Vellore institute of technology

May 2021

TECHNICAL SKILLS

Programming:	Python (Pandas, NumPy, Matplotlib, Seaborn), R, SQL (MySQL, PostgreSQL, T-SQL)
Methodologies:	SDLC, Agile, Waterfall
Data Analysis:	Data Mining, Statistical Analysis, Forecasting, Predictive Modeling, Hypothesis Testing
SQL & Data Manipulation:	Joins, CTEs, Window Functions, Indexing, Stored Procedures (T-SQL), ETL Processes
Data Visualization & BI:	Tableau, Power BI, Excel (Pivot Tables, VBA, Macros, Advanced Functions), Qlik Sense, Looker, Matplotlib, Seaborn, Plotly
Machine Learning & AI:	Regression, Classification, Scikit-learn, TensorFlow, NLP, Anomaly Detection, Unsupervised Learning
Big Data Technologies:	Hadoop, Spark, Hive, Airflow, Databricks, Docker,
Data Engineering:	ETL Processes, BigQuery, Data Cleaning, API Integration, Snowflake, Hadoop, Informatica
Data Wrangling & Cleaning:	Data Cleansing, Data Normalization, Data Transformation
Cloud Platforms:	AWS (S3, Redshift), Azure (Data Factory, Synapse Analytics, Azure SQL Database), GCP (BigQuery, Cloud Dataflow)
Database Technologies:	SQL Server, PostgreSQL, MongoDB, Firebase
Compliance & Tools:	HIPAA, SOC 2, GDPR, SOX Compliance, Git
Operating Systems:	Windows, Linux

EXPERIENCE

Citigroup, USA

Jun 2024 – Current

Data Analyst

- Optimized financial data processing workflows using SQL and Python, reducing report generation time by 30%.
- Developed interactive dashboards in Tableau and Power BI for senior leadership, improving financial KPIs tracking and enabling a 15% increase in data-driven decisions.
- Implemented predictive models using Scikit-learn and TensorFlow to forecast market trends, enhancing risk assessment accuracy by 20%.
- Automated ETL pipelines leveraging Airflow and Snowflake, decreasing data ingestion time by 40% and enabling near real-time data availability.
- Conducted SOX, GDPR, and HIPAA compliance audits, reducing regulatory breaches by 25%.
- Managed data workflows on Windows and Linux platforms to ensure secure, efficient healthcare data processing within Citi group's analytics systems.
- Collaborated with cross-functional teams (Risk, Compliance, IT) in an Agile environment to analyze customer transaction patterns using BigQuery and SQL, increasing fraud detection by 12%.
- Leveraged SQL Server, PostgreSQL, MongoDB, and Firebase to analyze healthcare data and support data-driven decisions in compliance with HIPAA standards

Phillips Healthcare, India

Mar 2021 - July 2022

Data Analyst

- Designed real-time dashboards in Tableau and Power BI, improving hospital patient monitoring efficiency by 25% through data-driven insights.
- Coordinated with clinical and technical teams to deploy predictive maintenance models for MRI machines, resulting in a 30% downtime reduction.
- Led a cross-functional project team of 5 to automate patient record ETL pipelines using Airflow, reducing manual processing errors by 30%.

- Conducted statistical analysis on diagnostic imaging data, identifying patterns that improved early disease detection rates by 18%.
- Ensured compliance with HIPAA and GDPR by implementing advanced data encryption and access controls, reducing data breach risks by 40%.
- Collaborated with cross-functional teams to analyze patient treatment effectiveness, leveraging BigQuery and Snowflake, leading to a 15% improvement in care outcomes.
- Applied Agile and Waterfall methodologies within SDLC to deliver compliant, data-driven healthcare solutions

Isparrow Technologies, India

Jan 2020 - Feb 2021

Data Analyst

- Developed automated dashboards in Power BI and Tableau, reducing recruitment cycle analysis time by 35% and improving hiring decision accuracy.
- Engineered Hadoop clusters for distributed data processing and designed robust Informatica ETL pipelines to efficiently integrate, cleanse, and transform large-scale recruitment and payroll datasets, optimizing data accessibility and reducing processing time by 25%.
- Analyzed 1M+ candidate records using SQL (MySQL, T-SQL) and Python (Pandas, NumPy) to optimize talent acquisition strategies, leading to a 20% improvement in candidate-job matching.
- Implemented machine learning models using Scikit-learn and NLP to analyze resume data, increasing recruitment efficiency by 25%.
- Optimized payroll processing workflows by integrating ETL pipelines (Airflow, Snowflake, BigQuery), reducing payroll errors by 30%.
- Conducted trend analysis on job market data, enabling proactive talent acquisition strategies that decreased hiring time by 15%.
- Ensured compliance with SOC 2 and GDPR by automating candidate data anonymization, reducing regulatory risks by 40%.

Certification

- **Microsoft Certified:** Data Analyst
