PROFESSIONAL SUMMARY

- 5+ years of experience as a Salesforce developer and administrator.
- Proficient in Salesforce CRM, Apex, Lightning Web Components, and Visualforce, as well as Java Spring Boot and REST APIs.
- Excellent problem-solving skills and a track record of delivering high-impact data solutions.

EDUCATION

California State University, Long Beach, CA

Master Of Science, Computer Science

Aug 2021 – May 2023

GPA: 3.6/4

Galgotias College Of Engineering & Technology, Gr Noida, India

Bachelor Of Technology, Information Technology.

Aug 2014 – May 2018

GPA 7.1/10

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, HTML, CSS, JavaScript.
- **CRM:** Salesforce, Lightning Aura Components, Lightning Web Services (LWS), Apex, SLDS, AWS, Heroku
- **Frameworks and Libraries:** Spring, SpringBoot Hibernate, Django, Flask, NumPy, Pandas, TensorFlow, Bootstrap, React.
- **Tools:** VS Code, Data loader, Workbench, ANT, JetBrains PyCharm, GIT.
- **Database/ Methodologies:** SQL, SOQL, SOSL, Postgres, Big Query, Airflow, Agile /Scrum.

WORK EXPERIENCE

Salesforce Developer, Artemis ABA

Aug 2024 – Present

- Developed and customized user interfaces using Lightning Web Components (LWC) and Aura Components to enhance the user experience and meet specific business requirements.
- Utilized JIRA for tracking and managing bugs, working closely with QA teams to identify and resolve issues.
- Provided timely solutions to critical bugs and enhancements, ensuring minimal disruption to business operations.
- Integrated Salesforce with ChatGPT via API to generate AI-driven summaries by dynamically sending prompts and data from Salesforce, enhancing automation and decision-making.
- Developed AI-powered summarization by leveraging prompt engineering techniques to generate concise insights from Salesforce data, improving user efficiency.
- Implemented practice-based restrictions for providers with expired certificates, incorporating soft and hard warnings based on a configurable control button, ensuring compliance and operational integrity.
- Managed code repositories using Git and Bitbucket, maintaining a clean and organized codebase.

Graduate Research Assistant, California State University Long Beach

Sep 2022 – July 2024

- Created the UI of a crack detection app that detects cracks on road on basis of color using HTML/CSS and JavaScript.
- Built responsive, cross-browser compatible user interfaces using Bootstrap, significantly improving the user experience.
- Hosted the crack detection app on local server using Flask and Jinja templates.
- Designed and developed microservices using Spring Boot, deployed them on Kubernetes, improving scalability & reliability.
- Developed a comprehensive bank ledger system using Java SpringBoot, adhering to Test-Driven Development (TDD) practices to ensure high-quality, reliable code.
- Implemented RESTful APIs for credit and debit transactions, allowing secure & efficient money transfers between user accounts.
- Created an API to maintain and retrieve transaction history, providing users with detailed records of their financial activities.
- Conducted unit testing using JUnit to achieve and maintain high code coverage, ensuring the robustness of the application.
- Managed database interactions using Hibernate, facilitating seamless data persistence and retrieval operations.

Programmer Analyst-Salesforce, Cognizant Technology Solution

Aug 2018 – July 2021

- Created web portal using Lightning Aura Components, JavaScript, HTML/CSS to display balance sheet & customer information.
- Implemented declarative automation tools like Process Builder and Flow to streamline and automate business processes, significantly enhancing operational efficiency for end-users.
- Leveraged Salesforce Sales Cloud and Service Cloud to set up and optimize case management, knowledge base, automation workflows, and reports/dashboards, resulting in enhanced customer support.
- Led a team of 4 professionals in migrating the HCM Consent portal from Visualforce to Lightning Aura components, resulting in a 30% increase in application responsiveness for a seamless user experience.
- Experienced in data migration using bulk API and deployment activities, with tools like Chainset, ANT, and Workbench. Maintained high data quality and system integrity (<1% defect leakage).
- Implemented CRM solution, increasing lead conversion rate by 25% and driving 15% sales revenue growth. Integrated data into Salesforce through REST and SOAP APIs using Apex classes and Triggers for actionable insights.
- Proficient in software development lifecycle, including database development and design patterns, ensuring successful project outcomes aligned with business requirements.
- Collaborated effectively with Agile development teams using SCRUM methodology, ensuring timely and budget-friendly project delivery. Fostered a positive team environment, enabling seamless coordination for efficient project execution

ACHIEVEMENTS

- Certifications
 - Salesforce Platform Developer1
 - Salesforce Administration
