SUMMARY

- Over 2+ years of experience in designing, developing, and integrating APIs and applications using MuleSoft Anypoint Platform.
- Expertise in Anypoint Studio, API Manager, Runtime Manager and CloudHub deployment.
- Hands-on expertise in DataWeave transformations, error handling and CI/CD automation.
- Eager to contribute to enterprise integration projects and grow within a dynamic team environment.

TECHNICAL SKILLS

- **Integration & API Development:** Mule ESB, Mule 4 Development, API-led connectivity, MuleSoft Anypoint Platform, Anypoint Studio, RAML, Design Center, API Manager, Runtime Manager, Anypoint Exchange, API Gateway, Dataweave 2.0, Java
- **Web Services & APIs:** RESTful APIs, SOAP Web Services, HTTP/HTTPS Protocol, JSON, XML
- **Connectors & Integrations:** HTTP/HTTPS connectors, Database connectors, Salesforce, SFTP, File Connector, Object Store, Amazon S3, Azure Service bus, Microsoft Dynamics 365
- **Databases:** MySQL, Oracle, SQL Server, MongoDB
- **Messaging & Queues:** JMS, Anypoint MQ
- **Cloud & Deployment:** CloudHub deployment, On-Premises deployment, AWS, Azure, Git, Jenkins, Maven, CI/CD pipelines
- **Monitoring & Security:** Anypoint Monitoring, Splunk, API Policies (Client ID Enforcement, JWT, OAuth 2.0, TLS/SSL)
- **Testing & Tools:** MUnit, Postman, SOAP UI

EXPERIENCE

Infosys (Hyderabad, India)

Sep 2021 – Dec 2023

Senior Systems Engineer (MuleSoft)

- Worked as an Integration Developer for the client WESCO. As a MuleSoft Developer, I worked on the design and implementation of an integrated API platform to optimize and automate data flows across WESCO's supply chain systems to enhance inventory management, order processing, and customer visibility.
- In this project, I've collaborated closely with business stakeholders and architects to understand integration requirements and prepared technical specifications, integration design documentation, and API architecture documentation.
- Experienced in developing, testing, managing, and securing REST and SOAP APIs, following API-led connectivity best practices. Skilled in using DataWeave for complex data transformations between JSON, XML, CSV and other formats.
- Implemented API security, including OAuth, JWT, and basic authentication. Hands-on experience with CI/CD tools like Jenkins, Maven, and Git for automating build and deployment processes.
- Performed unit testing through MUnit test cases for Mule flows, coordinated in all testing phases, and worked closely with the performance testing team for successful deployment and continuous integration of MuleSoft applications. Actively monitored applications and resolved integration issues promptly.

CERTIFICATIONS

MuleSoft Certified Developer Level 1

Successfully completed "MCD (MuleSoft Certified Developer) - Level 1" certification from MuleSoft Global Training.

EDUCATION

• Master of Science in Computer Science (GPA – 3.96/4) Florida Atlantic University, Florida, USA	Jan 2024 – Dec 2025
• Bachelor of Technology in Computer Science Engineering (GPA – 7.13/10) Andhra University, Visakhapatnam, India	June 2017 – June 2021
