PROFILE

Senior Data Analyst with over 7 years of experience leveraging advanced data analytics to drive strategic business decisions and improve operational efficiency. Skilled in **Python**, **SQL**, and **Power BI**, with a proven track record of optimizing machine learning models and collaborating with cross-functional teams to deliver successful project outcomes. Dedicated to fostering a data-driven culture and transforming complex insights into actionable strategies that accelerate organizational growth.

EMPLOYMENT HISTORY

Senior Data Analyst at Scholastic

August 2022 — September 2024

- Conducted in-depth analysis of company financials, retail sales, revenue growth, and product performance to drive strategic business decisions.
- Implemented machine learning models to enhance revenue forecasting accuracy, enabling more effective budgeting and sales planning.
- Analyzed product data to identify trends and growth opportunities, influencing product development and marketing strategies.
- Partnered with finance, marketing, and product teams to translate data-driven insights into actionable business strategies.
- Developed and deployed statistical models to assess customer behavior, leading to targeted marketing campaigns that increased engagement.
- Led data initiatives from requirement gathering to deployment, ensuring timely delivery of insights that aligned with business objectives.
- Streamlined data processing workflows by automating key reporting functions, reducing manual effort.
- Presented complex financial and sales insights to senior leadership, providing clear and actionable recommendations to drive company growth.

Senior Data Analyst at Aetna

December 2020 — July 2022

- Conducted deep analysis of healthcare claims and patient demographics to optimize operations for Medicare and Medicaid
- Developed reports tracking key performance indicators to ensure compliance with CMS guidelines
- Analyzed risk adjustment models to identify cost-saving opportunities, improving financial forecasting
- Provided actionable insights on patient care trends and reimbursement patterns to support policy decisions
- Worked closely with policy and claims processing teams to streamline data workflows and improve reporting accuracy
- Built predictive models to identify high-risk patient populations, aiding in targeted intervention programs

Data Analyst at Infosys

July 2018 — November 2020

- Led multiple projects from initiation to completion, ensuring alignment with business goals and stakeholder requirements
- Designed and implemented data pipelines for seamless data flow between enterprise systems
- Created dashboards and reports using data visualization tools, enabling leadership teams to make data-driven decisions
- Developed scripts and automated workflows to eliminate manual tasks, improving overall efficiency
- Collaborated with business analysts and senior stakeholders to define project scopes and ensure successful delivery
- Provided data-driven insights and recommendations to optimize business operations

EDUCATION

Bachelor's in Science, New York Institute of Technology, New York, NY

September 2014 — May 2018

COURSES & CERTIFICATIONS

Scaled Agile Framework (SAFE)

Oracle SQL Foundations, Udemy

Data Science, Massachusetts Institute of Technology

Scrum Master , Scrum Alliance
