

PRIYAM SHAH

Dallas, Texas | (669)-302-0388 | pshah20215@gmail.com | <https://www.linkedin.com/in/priyam-shah-747b77bb/>

EDUCATION:

The University of Texas at Dallas | Masters in Business Analytics Major: Data Science. GPA:3.75

MAY 2023

Gujarat Technological University | Bachelors in Computer Science & Engineering. GPA:3.50

MAY 2019

PROFESSIONAL EXPERIENCE

Endeavors Inc., Dallas Texas USA

Data Analyst

April 2024 - Present

- Engineered **scalable ETL pipelines in DOMO Data-warehouse by ingesting API data into staging layers and leveraging Python scripts for data preprocessing, cleaning, and transforming real-time data into analytics-ready formats.**
- Redesigned and **optimized DOMO data pipelines by eliminating redundant ETL executions, reducing processing credit unit costs by 18% and enhancing storage efficiency in data warehouse as well as reduction in cost & pipeline runtime.**
- Designed intuitive, **executive-level dashboards on DOMO & PowerBI platform from scratch, leveraging custom Beast Mode calculations, DAX formula & dynamic filters to drive decision-making and enhance user engagement.** Developed **tailored KPI cards** using line, bar, donut, and Sankey charts to deliver actionable insights across business functions.

American Technology Consulting, Texas USA

Sept 2023 – April 2024

Data Analyst

- Delivered data-driven solutions in the consulting environment by automating SQL Server (SSAS) data workflows developing Power BI dashboards.
- Created **sales reporting dashboards to visualize quarterly revenue forecasts, YoY growth, and region-wise sales performance, reducing manual Excel reporting** and improving efficiency.

NXP Semiconductors, Austin Texas USA

May 2022 - September 2022

Data Scientist Intern

- Led churn analysis utilizing customer survey data, leveraging NLP (tokenization, sentiment scoring) **to extract key retention drivers** from textual feedback response.
- Deployed a scalable cloud data pipeline using Amazon S3 for raw data ingestion, AWS Glue for automated extraction of schema and RDS for structured storage, streamlining data accessibility & analytics preparation,** utilized Lambda function to trigger ETL ensuring real-time updates.
- Performed root cause analysis to uncover key drivers of customer churn, identifying an 8% YoY churn rate.** Collaborated with sales, marketing, and cross-functional teams to develop retention strategies, while **visualizing churn trends and insights through AWS Quick Sight dashboards.**

The University of Texas at Dallas, Dallas Texas USA

September 2021- May 2022

Student Research Assistant

- Collaborated with cross-functional OSP research teams to automate task tracking using Power Automate, for **streamlining project monitoring, and supported delivery within Agile frameworks using JIRA—contributing to an 18% improvement in project delivery timeline.**
- Developed automated workflows using Power Automate to streamline task assignments, status updates, notifications—enhancing visibility, coordination, to ensure on-time delivery for non-technical stakeholders.
- Designed and implemented a centralized **SQL Server database to manage project records, ensuring accurate tracking & improved data governance** across historical and active initiatives.

PREAB SOFTWARE Pvt., INDIA

July 2019 - July 2021

Business Analyst

- Extracted and **migrated 10M+ sales records from Azure Data Lake to Azure Synapse SQL Data Warehouse,** enhancing data accessibility, query performance, and scalability
- Executed complex data transformations using advanced SQL techniques implementing window functions and CTEs to clean, aggregate, and filter customer review data** for high-impact analytics.
- Developed custom KPIs and designed a dynamic **Tableau dashboard to monitor quarterly sales growth, analyze regional trends, and segment customer cohorts—contributing to a 24% boost** in sales conversion rates.

PROJECTS:

Airbnb Property Pricing (Database, Pandas, NumPy, Regression, XGBoost, Data Modelling, Machine Learning, Predictive Modeling, Predictive Analysis)

- Leveraged MySQL-Python integration to analyze the Airbnb dataset for property price prediction, implementing data cleaning and preprocessing techniques, deployed regression models to forecast property prices and project profitability for the next quarter.
- Utilizing various Pandas and NumPy libraries for data extraction, conducted EDA steps, handled null values, determined feature importance and performed necessary data imputation steps to improve regression model efficiency.
- Developed and tuned an XGBoost regression model achieving 79% accuracy, predicting a 7% seasonal increase in Airbnb property prices.

TECHNICAL SKILLSET & CERTIFICATIONS

Programming Languages: Python, R programming, SQL Database, RDBMS Database, Oracle Database, Java, UNIX Shell.

Libraries: Scikit-learn, Feature Engine, NumPy, Pandas, Matplotlib, ggplot2, Tokenizer, GLM models, CART, Ensemble Methods, Regression, Clustering Classification Techniques, ETL pipelines, Hive, PySpark, Spark, Spark SQL, Map-Reduce framework, Sklearn Pipeline, NLTK, Hypothesis Testing.

Visualization Tools: Tableau Desktop, Microsoft PowerBI, DOMO, Microsoft Excel, QlikView, Looker, Google Analytics.

Cloud Services: S3 Storage, RDS Storage, CloudFormation, DynamoDB, AWS Lambda, AWS Athena, Quick Sight Reporting, AWS Glue, DOMO MagicETL.

Version Control Tools: Git, GitLab

Certifications: Essential Design Principles for Tableau, **AWS Certified Cloud Practitioner, AWS Data Engineer Associate (In prog.)**
