SUMMARY

Data Analyst with 5 years of experience delivering measurable improvements in business operations. Enhanced reporting accuracy by 20%, optimized workflows, accelerated decision-making, and strengthened enterprise processes. Skilled at translating complex datasets into actionable insights, supporting strategic initiatives, driving operational efficiency, and enabling leadership to make informed decisions that improve performance, transparency, and overall organizational effectiveness.

TECHNICAL SKILLS

Programming & Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), R, SQL, Shell Scripting, Advanced Data Manipulation
Data Visualization & BI: Tableau, Power BI, Matplotlib, Seaborn, Interactive Dashboards, KPI Reporting, Executive Reporting
Databases & Warehousing: MySQL, PostgreSQL, Snowflake, Redshift, ETL Pipelines, Data Modeling, Data Wrangling
Data Engineering & Processing: ETL Design, Data Cleaning, Data Integration, Automated Data Pipelines, Big Data Processing, Data Governance
Cloud & AI Platforms: AWS (S3, Redshift, Lambda), Azure Data Services, Google Cloud AI Tools, Cloud-based ML Model Deployment
Machine Learning & AI: Logistic Regression, Decision Trees, Random Forest, Gradient Boosting, Scikit-learn, TensorFlow, PyTorch, OpenAI GPT APIs, Generative AI Models
Advanced Analytics & AI Applications: Predictive Analytics, Churn Modeling, Recommendation Systems, Natural Language Processing (NLP), Anomaly Detection, AI-driven Insights
Collaboration & DevOps: Git, GitHub, Agile & Scrum, CI/CD for Data Pipelines, Cross-functional Team Leadership

PROFESSIONAL EXPERIENCE

Exxon Mobil, Irving, TX, USA Jan 2025 – Current
Data Analyst

- Engineered Python (Pandas, NumPy) ETL workflows, accelerating large-scale dataset processing by 30%, enhancing operational precision, streamlining analytical procedures, reducing latency, improving resource allocation across multiple business divisions.
- Constructed interactive Tableau and Power BI dashboards, increasing executive visibility by 20%, optimizing performance monitoring, enabling timely decision-making, supporting organizational transparency, and enhancing operational intelligence for energy assets.
- Implemented Scikit-learn Random Forest and Gradient Boosting models, predicting anomalies with 15% higher accuracy, minimizing system interruptions, strengthening preventive strategies, improving reliability, and reducing unforeseen operational downtime significantly.
- Deployed cloud analytics solutions on AWS S3, Lambda, Redshift, achieving 22% faster delivery of insights, enabling automation, accelerating actionable intelligence, improving decision workflows, and enhancing scalable operational analytics.

Tata Consultancy Services (TCS), Hyderabad, India May 2021 – Jun 2023
Data Analyst

- Assessed 12,000+ monthly vulnerabilities using VMS, reducing unresolved threats by 35%, strengthening cybersecurity, prioritizing risk remediation, enhancing threat visibility, improving enterprise resilience, and securing infrastructure comprehensively.
- Automated Python and SQL ETL pipelines, improving reporting accuracy by 20%, saving 15 hours per month, accelerating information flow, optimizing integration, and enhancing analytical productivity effectively.
- Evaluated security incidents, providing actionable insights that increased response speed by 25%, mitigating high-risk exposure, optimizing detection protocols, supporting compliance, strengthening governance, and reducing enterprise vulnerability systematically.
- Implemented Tableau dashboards for executive monitoring, improving clarity by 18%, enabling leadership to track remediation progress, prioritize high-risk issues, enhance transparency, and streamline critical decision-making processes.
- Collaborated with cross-functional teams using Agile methodology, executing strategies, reducing high-risk vulnerabilities by 40%, improving security posture, accelerating remediation, enhancing workflow efficiency, and strengthening enterprise risk management.

CGI, Hyderabad, India May 2019 – Apr 2021
Associate Data Analyst

- Examined complex datasets using Python, R, SQL, improving accuracy by 15%, reducing reporting errors, facilitating strategic decisions, enhancing operational efficiency, supporting objectives, and ensuring reliable insights consistently.
- Streamlined Tableau dashboards and reporting processes, saving 25 hours per month, increasing workflow efficiency by 22%, enabling actionable insights, accelerating reporting, optimizing visualizations, and supporting executive decision-making.
- Applied data cleaning and integration techniques on MySQL and PostgreSQL, improving dataset reliability by 20%, eliminating discrepancies, streamlining ETL processes, enhancing analytical accuracy, and supporting business intelligence objectives.
- Collaborated with cross-functional teams interpreting insights, accelerating project delivery speed by 10%, improving operational timelines, supporting evidence-based decisions, facilitating strategic planning, and advancing organizational efficiency consistently.
- Designed advanced visualizations using Matplotlib and Seaborn, enhancing storytelling clarity by 18%, improving stakeholder comprehension, supporting executive decisions, and strengthening data-driven operations across multiple projects.

EDUCATION

Master of Science in Information System May 2025
Wilmington University, Wilmington, DE, USA

Bachelor of Technology in Computer Science Sept 2021
Acharya Nagarjuna University, Guntur, India

PROJECTS

- AI-Powered Anomaly Detection in Financial Transactions**
- Leveraged unsupervised learning models to identify irregularities across transactional datasets, improving detection efficiency by 28%, mitigating operational risks, and strengthening financial compliance through automated monitoring pipelines.
