

Ramadevi Nakka

Data Analyst

Phone: +15134004337 | Email: ramaengg51@gmail.com

SUMMARY

- Around 4.5 years of hands-on experience in data analysis, statistical modeling, and data visualization. Proven track record of delivering high-quality insights and recommendations to management.
- Skilled in visualizing data effectively using tools like Tableau, Power BI, Microsoft Excel, and Google Analytics, Qlik enabling stakeholders to gain insights briefly.
- Demonstrated expertise in leveraging in-depth data analysis, visualization, and manipulation tasks.
- Proficient in Python, R, and SQL, adept at utilizing these languages to perform various data analysis and manipulation tasks.
- Deployed ggplot2 and Dplyr in R to create visually compelling data visualizations and perform seamless data wrangling tasks, ensuring data integrity and facilitating insightful decision-making processes
- Experience using MS Excel, SQL, and/or other applications to perform various types of analysis.
- I am skilled in Microsoft Access, PowerPoint, SQL Server, and various RDBMS.
- Installation, testing, configuration, maintenance, and troubleshooting of all SQL Server components.
- Experience with BI tools such as Tableau and PowerBI.
- Proficient in Data Analysis, System Analysis, Business Requirement Gathering, and Data Warehousing concept.
- Expert in Agile Methodology of SDLC for implementing Business projects.
- Knowledge of Power BI and Tableau to import and analyze data from various sources such as SQL Server.
- Create various filters and parameters for reports using Tableau desktop.
- I am skilled in Microsoft Excel (e.g., formulas, pivot tables, graphing).
- Experience in data migration tasks using T/SQL, SQL Loader.
- Experience in Data Migration, Data Transformation, Data Conversion, and Data loading.
- Well-versed in Agile, Waterfall, and SDLC methodologies, ensuring efficient project management and delivery of analytical solutions.
- Experienced in Jira Confluence.
- Experienced in data cleaning, wrangling, and warehousing, ensuring data quality and integrity throughout the analytics process. Well-versed in data governance practices to maintain compliance and standardization.
- Experienced with ITIL processes (Incident management, change management).

PROFESSIONAL EXPERIENCE

Raven Software Solutions CVS Pharmacy Dallas, TX

Feb 2024-Present

Data Analyst

- Conducted predictive analytics to forecast volume and resource utilization.
- Created data models to identify high-risk and optimize care coordination.
- Designed healthcare data models to identify high-risk patient populations and optimize care coordination.
- Create and run queries as necessary for project deliverables using SQL.
- Work closely with the Risk, Team Leads, and stakeholders to come up with a plan to effectively find the correlation of at-risk enrollment behaviors.
- Leveraged Python and SQL to develop custom data processing scripts, automating data extraction, transformation, and loading (ETL) tasks, enhancing efficiency and accuracy in data analysis workflows.
- Designed and developed automated reporting solutions, delivering real-time insights to support business decisions.
- Built interactive dashboards and customized reports using Tableau, Power BI, and QlikView.
- Extracted, transformed, and analyzed datasets using SQL, ensuring data accuracy and quality.
- partnered with customers to understand their data needs and provide tailored reporting solutions.
- Designed data validation scripts to ensure consistency across various reporting environments.
- Collaborated with IT teams to optimize database performance and ensure system reliability.
- Collaborated with business users to gather reporting requirements and translate them into technical specifications.
- Served as a liaison between data teams and business stakeholders to align reporting solutions with business goals.
- Develop innovative analytical approaches and predictive modeling techniques for reactive or proactive data analysis, sampling, and study design.
- Develop trend reports to identify potential program or systematic vulnerabilities
- Provide expertise and guidance to unit and corporate staff as required
- Data Profiling for accurate and better reporting and analysis.

- Designed and developed interactive reports and dashboards.
- Created visualizations using Power BI's visualization tools (tables, charts, maps, etc.).

Tata Consultancy Services Hyderabad, India
Data Analyst

June 2021-July 2022

- Coordinated statistical data analysis, design, and information flow.
- Created various Excel documents to assist with pulling metrics data and presenting information to stakeholders for concise explanations of best placement for needed resources.
- Produced monthly reports using advanced Excel spreadsheet functions.
- Participated in requirements meetings and data mapping sessions to understand business.
- Researched and resolved issues regarding integrity of data flow into databases.
- Developed tables, views and materialized views using SQL.
- Tableau is responsible for creating interactive data visualizations using Tableau from multiple data sources to support day to day company operations and client needs.
- Designed and developed Tableau visualization solutions with interactive views, trends, and drill downs
- Worked on generating various dashboards in Tableau server using various data sources.
- Prepared Dashboards using calculations, parameters, and Action Filters in Tableau.
- Responsible for automating excel sheets, flat files, CSV files to generate Tableau ad-Hoc Reporting
- Automated hourly/daily/weekly/monthly excel reports into Tableau KPI Monitoring Dashboards
- Cleaning and blending multiple data sources to allow for different views of application data in a single dashboard.

HCL Technologies Noida, India
Data Analyst

Feb 2019-May 2021

- Extracted, compiled, and tracked data, and analyzed data to generate reports
- Participated in troubleshooting, and problem resolution efforts
- Performed daily data manipulation using SQL and prepared reports on a weekly, monthly, and quarterly basis.
- Used Excel functions to generate spreadsheets and pivot tables
- Identified, analyzed, and interpreted trends or patterns in complex data sets
- Cleansing and blending multiple data sources to allow for different views on application data in a single dashboard
- An aided team in data collection to be used for Tableau visuals
- Conducted presentations to other lines of business as a meta role to show the value of Tableau as a power BI tool
- Perform data manipulation operations like import/export data from various external file formats using SQL
- Generated a variety of business reports from SQL server using excel with a pivot table and pivot chart
- Develop and implement databases, data collection systems, data analytics, and other strategies that optimize statistical efficiency and quality
- Checked for invalid/out of range data
- Develop, update, and maintain current SQL programs
- Develop and implement databases, data collection systems, data analytics, and other strategies that optimize statistical efficiency and quality
- Acquire data from primary or secondary data sources and maintain databases/ data systems

TECHNICAL SKILLS

Programming Language:	R, SQL,Python
Visualization Tools:	Tableau, Power BI, Microsoft Excel, Google Analytics, Excel, Power Point, QlikView
Databases:	Oracle, MySQL
Methodologies:	SDLC, Agile, Waterfall
Other Skills:	Data Cleaning, Data Wrangling, Data Warehousing, Data Governance, Data mining, A/B Testing, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving

EDUCATION

Master of Science in Computer Science

Aug 2022 – Dec 2023

SNHU University in New Hampshire USA

**Bachelors in Electronics communication Engineering
Bapatla Women's Engineering College**

Sept 2014- May 2018

PROJECTS

Interactive Sales Dashboard

- Designed and developed an interactive sales dashboard in Tableau to visualize key performance indicators (KPIs) for a retail company.
- Enabled real-time data exploration and trend analysis, facilitating strategic decision-making for sales teams
