EXPERIENCE

Supervisor

July 2024 – Present

Port City Java, Chapel Hill, North Carolina

- Oversee daily operations, including staff management, scheduling, training, and inventory to ensure smooth workflow and efficient service
- Handle budgeting, cost analysis, and invoice processing to maintain financial accuracy and meet profit goals
- Collaborate with upper management to monitor store performance and adjust strategies to meet business targets

Computer Science Tutor

September 2023 – May 2024

Appalachian State University, Boone, NC

- Served as a student employee for the Appalachian State University Student Learning Center
- Assisted students during drop-in tutoring sessions with the courses Intro to Computer Science I and II, Discrete Mathematics, Database, Intro to Computer Systems, Data Structures, Computer Systems I and II, and Intro to Theoretical Computer Science
- Presented material to a diverse range of students and provided constructive feedback on their work, adjusting tutoring strategies to meet individual needs

PROJECTS

Dynamic Search Portal for Academic and Study Abroad Opportunities

- Developed a web application with JavaScript for advanced searches of academic profiles and study abroad programs, using server-side scripts to indirectly access a backend database for real-time search results

Farm Management Database

- Developed a MySQL database to store, track, and manage crops, livestock, employees, and inventory, as well as sales of farm products to retailers

Pharmacy Receipt System

- Designed and developed a pharmacy receipt system in a team of four using agile practices, incorporating design patterns, inheritance, abstractions, Junit tests, and a user login with checkout and receipt generation features

Pizza Ordering System

- Designed and implemented a pizza ordering system using JavaScript, MongoDB, and Node.js, with dynamic pricing based on pizza selection, handling both front-end and back-end development, including a database to store orders upon submission
