SUMMARY

Dedicated and detail-oriented professional with a Bachelor's degree in Mathematics and Statistics, complemented by two years of experience as a software engineer. Proficient in Python, Java, and SQL with a strong curiosity for continuously learning new skills/technologies and an ability to become an immediate contributor. Motivated to take responsibility and organize when engaging in collaborative work. Seeking a data analyst role to apply technical skills and leverage data to assist in informed decision-making for important real-world applications.

EXPERIENCE

Software Engineer

Jan 2022 – Jan 2024

Steelbridge Labs

Miami, FL

- Collaborated with cross-functional team members to create a logical data model and business entities in Neo4J for NuMoola, a financial education app for children.
- Developed and maintained RESTful APIs and workflow automations for user onboarding, banking, subscriptions, content feed, and mission scheduling.
- Engineered event-based and scheduled triggers for Steelbridge's BaaS (CBE), enabling batch process automation.
- Created documentation for CBE's state machine, supporting better client adoption and smoother onboarding.
- Implemented event-driven API metadata storage in DynamoDB for dynamic API generation.
- Used Drools to build business rules automating user permission updates in NuMoola.

PROJECTS

Fotmob Data Pipeline | *Airflow, Selenium, Pandas, BigQuery, Looker*

Jul 2024 – Aug 2024

- Built an ETL pipeline using Apache Airflow to scrape soccer data from Fotmob via Selenium.
- Transformed data into a dimensional model with Pandas and loaded it into BigQuery.
- Created an integrated dashboard in Looker to visualize shot metrics for the 2023/24 EPL season.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Apr 2025

Amazon Web Services (AWS)

EDUCATION

University of Florida

Gainesville, FL

Bachelor of Science in Mathematics

Aug 2018 – Dec 2021

Bachelor of Science in Statistics

TECHNICAL SKILLS

Languages: Python (NumPy, Pandas, Selenium), R, SQL

Education: Statistics (regression analysis, probability, logistic regression), mathematics (linear algebra)

Data Engineering: ETL, Apache Airflow, Dimensional Modeling (Kimball)

Cloud & DevOps: AWS (S3, EC2, Lambda, SDK, CLI), Bash, Git

Tools & DBs: Neo4J, DynamoDB, BigQuery, beginner-level PowerBI
