

RUCHITHA REDDY MANDA

DATA ANALYST

Dallas, TX | 945-280-8477 | ruchithareddy023@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 3+ years of experience delivering business intelligence, analytics, and reporting solutions that improve business performance, streamline operations, and support executive decision-making. Skilled in SQL, Power BI, Python, and Excel, with a strong track record of partnering with cross-functional stakeholders and leadership to drive process improvements, reduce reporting turnaround time, and strengthen data accuracy across banking and pharmaceutical domains.

TECHNICAL SKILLS

Programming & Query Languages: SQL, Python

BI & Visualization: Power BI, Tableau, Microsoft Excel (PivotTables, Advanced Formulas), Dashboard Development, KPI Reporting, Ad Hoc Reporting

Data Analytics: Data Cleaning, Data Validation, Data Transformation, Data Integration, Exploratory Data Analysis (EDA), Trend Analysis, Data Visualization

Databases: SQL Server, MySQL

Cloud: AWS

Business Analysis: Requirements Gathering, Data Mapping, Root Cause Analysis, Process Improvement, Stakeholder Collaboration

Tools & Methodologies: Git, Jira, ServiceNow, Agile, SDLC

PROFESSIONAL EXPERIENCE

Data Analyst | Vision High Solutions (Client: PNC Bank)

Mar 2025 – Present

- Automated enterprise reporting by developing and optimizing 35+ SQL queries to extract, transform, and integrate data from multiple business sources, reducing report generation time by 30% and enabling faster data-driven business decisions.
- Expanded executive visibility into operational and business performance by designing and maintaining 10+ Power BI and Tableau dashboards, reducing ad hoc reporting requests by 35%.
- Strengthened alignment with business stakeholders and leadership by gathering reporting requirements and delivering standardized analytics solutions, reducing turnaround time by 20% and improving data consistency.
- Enhanced reporting accuracy and supported continuous process improvement by performing data validation, cleansing, and quality assurance checks in Excel using PivotTables and advanced formulas while generating weekly KPI reports.
- Automated data validation and reporting workflows, improving reporting data quality by 40% and streamlining reporting processes across three business workflows to support efficient and reliable business analytics.

Data Analyst | Wipro Limited (Client: IPSEN – Pharmaceutical)

Jul 2021 – Mar 2023

- Delivered operational insights that supported decision-making for 600+ enterprise users by analyzing IT service and user access data using SQL and Excel to identify trends and generate weekly and monthly KPI reports.
- Enabled business stakeholders to monitor SLA compliance, service performance, and operational trends by maintaining and enhancing 6+ Power BI dashboards that transformed operational data into actionable insights.
- Standardized data validation, transformation, and root cause analysis on incident, licensing, and user access data to support audit and compliance initiatives and improve reporting accuracy.
- Streamlined operational efficiency and data reliability by automating recurring reporting and user provisioning tasks using PowerShell, collaborating with cross-functional teams and business leadership to resolve data-related issues.

Data Analyst Intern | ICICI Bank

Jan 2021 – Jun 2021

- Queried customer account data using SQL and prepared Excel reports to support daily and weekly operational reporting for 500+ customer accounts.
- Increased report accuracy by 15% by performing data validation, data cleansing, and report preparation, helping maintain data quality.
- Maintained customer data across SQL databases and Excel, ensuring data integrity and supporting operational reporting and business analysis.

PROJECTS

Supply Chain Analytics Dashboard | SQL, Python, Power BI, Excel

- Optimized inventory planning and business reporting by analyzing inventory, sales, and demand data using SQL and Python to uncover actionable trends.
- Empowered stakeholders with data-driven inventory decisions and greater operational visibility by designing interactive Power BI dashboards to monitor KPIs, inventory turnover, and demand trends.

Data Analytics & Business Intelligence | Python, Pandas, NumPy, Excel

- Elevated data quality and decision readiness by analyzing and transforming structured datasets using Python, Pandas, and NumPy to perform data cleaning, validation, and exploratory data analysis (EDA).
- Translated key metrics into clear, actionable insights for business stakeholders by creating visualizations, including bar charts, line charts, scatter plots, and histograms, to identify anomalies.

EDUCATION

M.S. Computer and Information Science, Southern Arkansas University, Magnolia, AR

Aug 2023 – Dec 2024

GPA: 3.8/4.0

B.Tech. Electronics & Communication Engineering, Jawaharlal Nehru Technological University

Aug 2017 – Jul 2021

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03), 2025
