

# Sai Mahesh Battula

+1 (970) 657-1001 | Fort Collins, CO | sai.battula097@gmail.com | [LinkedIn](#)

## PROFESSIONAL SUMMARY

Results-driven **Business Data Analyst** with 4+ years of experience supporting analytics, technology platforms, and enterprise reporting across financial services and IT environments. Proven ability to analyze large-scale datasets to identify trends, risks, gaps, and optimization opportunities supporting **merchandise financial planning, assortment planning, allocations, replenishment, pricing, forecasting, and operational planning** across brands and regions. Experienced in collaborating with IT, Data Engineering, and Product teams to support technology enhancements, UAT testing, documentation, rollout activities, and process standardization initiatives. Skilled in leveraging **emerging generative AI tools and frontier models** (ChatGPT, Copilot, Gemini) to automate workflows, enhance analysis, and improve day-to-day efficiency in fast-paced cross-functional environments.

## PROFESSIONAL SKILLS & CORE COMPETENCIES

**Planning & Analytics:** Merchandise & Assortment Planning, Allocation & Replenishment Analytics, Operational Planning, Forecasting & KPI Reporting, EDA, Trend & Root Cause Analysis, Regression, Segmentation, A/B Testing, Ad-Hoc Analysis

**Languages & Querying:** SQL (CTEs, Window Functions, Advanced Joins, Subqueries), Python (Pandas, NumPy), DAX

**BI & Data Visualization:** Power BI (DAX, Data Modeling), Tableau, Dashboard Development, Power Pivot, Advanced Excel (Pivot Tables, Power Query, VLOOKUP, Macros, Data Validation)

**AI & Automation:** AI-Assisted Workflows, Generative AI (ChatGPT, Copilot, Gemini), Frontier Model Integration, Prompt Engineering for Business Analysis, Intelligent Reporting Automation, Automated Data Processing

**Data Engineering:** ETL Pipeline Development, Data Warehousing, Data Wrangling, Data Cleaning, BigQuery, Schema Design, Data Governance & Quality Standardization, Data Integrity, Metadata Management, Data Lineage

**Project Management:** Agile (Scrum/Kanban), SDLC, Jira, Confluence, Requirements Gathering & UAT Testing, BRD, FRD, SRS, RTM, Gap Analysis, BPMN, Visio, Multi-Workstream Management, Project Coordination, Process Improvement

**Systems & Collaboration:** Cross-Functional Collaboration, Stakeholder Management & Communication, CRM, ERP

## PROFESSIONAL EXPERIENCE

**Volunteer Research Analyst** | **Colorado State University** | Fort Collins, **Jan 2026 – Present**

- Conduct quantitative analysis and interpretation of multi-source research datasets to identify trends, gaps, risks, and analytical insights supporting academic planning, governance, and decision-making initiatives.
- Leverage AI-assisted workflows and emerging AI tools (ChatGPT, Copilot) to accelerate research data collection, source validation, and literature synthesis, improving analysis efficiency and dataset completeness.
- Translate complex analytical findings into clear, concise reports, presentations, and structured insights for non-technical stakeholders during research seminars and cross-functional planning discussions.

**Analyst** | **State Street** | USA **Aug 2024 – Jul 2025**

- Analyzed large-scale financial and operational datasets using SQL and Python to identify trends, risks, gaps, and optimization opportunities supporting forecasting, planning, and enterprise reporting.
- Developed Power BI and Tableau dashboards with KPI frameworks and DAX measures, transforming data outputs from planning and reporting tools into clear, actionable insights for global stakeholders and reducing manual reporting effort by 30%.
- Performed forecasting support, exploratory data analysis, and trend analysis on multi-source datasets, improving reporting accuracy and reducing issue resolution time.
- Built and optimized Python ETL pipelines to automate recurring planning and reporting workflows, improving operational efficiency and reducing manual processing effort.
- Leveraged emerging AI tools and frontier generative models (ChatGPT, Copilot, Gemini) to automate recurring reporting activities, enhance analysis, and improve day-to-day efficiency for planning teams.
- Supported requirements gathering, UAT testing, schema validation, data quality checks, and governance for production-ready data outputs aligned with enterprise planning requirements.
- Partnered cross-functionally with Global Planning, IT, Data Engineering, and Product teams to coordinate project tasks, track action items, flag risks, and support on-time completion of key milestones across multiple workstreams.
- Translated technical and analytical findings into clear, concise insights, dashboards, and recommendations for non-technical stakeholders, enabling informed decision-making.

**Business Data Analyst** | **Nevina Infotech (IT Services)** | India **Jan 2021 – Jan 2024**

- Led requirements gathering and lifecycle management for enterprise technology and planning projects, developing BRDs, FRDs, SRS documents, RTMs, and stakeholder-approved functional requirements.

- Queried and analyzed enterprise datasets using SQL, Python, and Advanced Excel to identify operational inefficiencies, data quality gaps, and system performance trends, improving processing efficiency.
- Performed exploratory analysis, forecasting support, data profiling, and statistical analysis on large-scale datasets to detect anomalies, operational risks, and governance inconsistencies.
- Supported technology platforms and enterprise planning processes across merchandise financial planning, assortment planning, allocation, replenishment, pricing, forecasting, and operational planning datasets, identifying trends, risks, gaps, and optimization opportunities across business units.
- Built and maintained ETL pipelines integrating data from heterogeneous systems into centralized reporting and planning environments, improving reporting turnaround time and planning visibility.
- Designed Power BI and Tableau dashboards tracking operational KPIs, planning metrics, forecasting performance, allocation/replenishment indicators, and business performance for global stakeholders.
- Assisted with requirements gathering, UAT testing, documentation, and rollout support for planning technology enhancements while coordinating with Engineering, Product, Compliance, and Analytics teams.
- Monitored multiple concurrent workstreams using Jira and Confluence, tracking milestones, managing action items, and escalating risks to ensure on-time project delivery.
- Supported governance, data quality checks, metadata standardization, and process standardization across enterprise planning and reporting environments to ensure consistent, high-quality planning data.
- Communicated complex analytical findings and business requirements to both technical and non-technical stakeholders through data storytelling, dashboards, and structured reporting solutions.

## EDUCATION

**Master’s in Computer Information Systems:** Colorado State University | GPA: 3.56/4 | 2025

**Master’s in Business Administration:** Lovely Professional University | GPA: 7.44/10 | 2021

## PROJECTS & SIMULATIONS

**Enterprise ERP & Supply Chain Simulation (HEC Montréal ERPSim)** | Colorado State University

- Simulated end-to-end business operations within a live **SAP ERP system**, managing real-time data workflows across the full Cash-to-Cash (C2C) cycle, including demand forecasting, material procurement, production execution, and final delivery.
- Analyzed real-time sales reports and market trends to dynamically adjust planned independent requirements (MD61) and optimize product pricing, directly driving a measurable increase in daily sales revenue and profit margins.
- Leveraged automated Material Requirements Planning (MRP) data loops to balance inventory stock levels against shifting customer demand, eliminating stockouts while minimizing warehouse carrying costs.
- Monitored multi-workstream operational KPIs to optimize the cash-to-cash cycle, accelerating capital turnaround times to maximize final **Company Valuation and Net Equity directly**.

**Interactive Retail Sales Analytics Solution (Power BI)**

- Developed an end-to-end Power BI sales intelligence dashboard to analyze multi-market retail data, tracking key business performance indicators including total revenue, sales volume, profitability margins, and historical trends.
- Built a robust relational data model utilizing Power Query for data cleansing, schema optimization, and transformation, seamlessly connecting disparate product, customer, and regional sales datasets.
- Formulated advanced DAX measures and calculations to generate dynamic, time-intelligence insights (YoY growth, moving averages, run rates) for executive-level performance reviews.
- Designed highly interactive, user-centric visualizations with matrix filters and slicing capabilities, enabling non-technical stakeholders to identify high-performing customer segments and product categories.

## LEADERSHIP & RECOGNITION

**President** | Indian Student Association, Colorado State University

- Led the CSU Indian Students Association, serving over 600 members, directing strategic initiatives to enhance student welfare, international cultural engagement, and community partnerships.

**Recipient of the “Rising Star Award”** | Nevina Infotech

- Formally recognized for exceptional performance in enterprise solutions delivery, stakeholder relationship management, and driving organizational revenue growth.

**President** | Disha Club, Lovely Professional University

- Executed leadership operations for the university club, planning and coordinating professional initiatives, skill-building workshops, and student engagement events centered around Human Resource concepts.
