

SUMMARY

Business Data Analyst with **5+ years of experience** in **Business Analysis, Data Analytics, Power BI, SQL, Requirements Management, Stakeholder Management**, and **Business Intelligence** across consulting, marketing, and logistics domains. Experienced in delivering reporting solutions, KPI dashboards, process improvements, data validation, and AI-assisted analytics using **Snowflake, Azure Data Factory, Python, Generative AI, LLMs**, and **RAG** technologies.

PROFESSIONAL EXPERIENCE

Business Data Analyst | Epsilon | USA**Jul 2025 – Present**

- Configured cloud reporting workflows using **SQL, Snowflake**, and **Azure Data Factory**, partnering with marketing directors to migrate transactional datasets and reducing reporting efforts by **180 hours monthly** across pipelines processing **320K+ customer activity records**.
- Developed interactive performance dashboards using **Power BI** and advanced **DAX** measures, collaborating with campaign managers to track customer engagement and conversion metrics across **14 distinct consumer business segments**.
- Translated operational requirements into comprehensive functional requirement documents (FRDs) and user stories inside **Jira**, working alongside cross-functional development teams to conduct As-Is / To-Be analysis and deploying **6 enterprise analytics modules**.
- Streamlined ETL validation and data reconciliation reviews leveraging **Python** pandas and **Azure Synapse**, coordinating with technical support squads via **ServiceNow** to audit **250K+ customer records** and resolving **340 data integration anomalies**.
- Integrated **Large Language Models (LLMs)** using **OpenAI APIs** to parse unstructured text files, training business users on prompt engineering techniques and reducing evaluation bottlenecks across historical text fields.
- Built automated text processing workflows using retrieval-augmented generation (**RAG**) pipelines, coordinating with data engineering teams to query unstructured internal knowledge sets and accelerating audit reporting from 4 business days to under **10 minutes**.

Business Analyst | KPMG | India**Apr 2021 – Jul 2023**

- Designed multidimensional data models and data visualization solutions in **Tableau** and **Excel**, utilizing **Pivot Tables** and **XLOOKUP** to monitor audit readiness metrics and resolve **45 critical regulatory compliance gaps** prior to fiscal year-end.
- Analyzed business requirements and created **BRDs, Functional Specifications**, and **Gap Analysis** documentation while supporting **SDLC** processes and **Agile** project delivery across **3 global business units**.
- Validated large-scale client transactional records using **SQL (Joins, Aggregations)** and data cleansing techniques, partnering with engineering teams to establish **Data Governance** controls that reduced manual reconciliation efforts by **22 hours weekly**.
- Performed statistical analysis and monthly variance reviews using **Python**, delivering actionable insights that supported financial decision-making across **6 high-value consulting engagements**.
- Led **User Acceptance Testing (UAT)**, test case validation, and workflow mapping activities for **CRM integration** projects, coordinating with stakeholders to secure production sign-off ahead of schedule.

BI Analyst | Adani | India**Jan 2019 – Mar 2021**

- Formulated and deployed **Power BI** dashboards using advanced **DAX** measures and **Power Query**, partnering with department heads to visualize operational KPIs across **8 business units** and support real-time reporting requirements.
- Modeled multi-source datasets from **SQL Server** and **Excel** into optimized **Star Schema** structures, collaborating with database administrators to track **120+ operational performance metrics** for executive reporting.
- Analyzed performance metrics and revenue trends across **25 regional logistics and energy facilities**, delivering analytical insights that supported procurement and asset allocation decisions valued at **₹420K annually**.
- Collaborated with cross-functional IT and finance teams to standardize reporting templates, leading the consolidation of **60 legacy reports** into a unified **Business Intelligence** environment supporting enterprise data governance.

TECHNICAL SKILLS

- Business Analysis & Requirements Management:** Requirements Gathering, BRD/FRD, User Stories, Acceptance Criteria, Stakeholder Management, UAT Coordination, SDLC, Agile, Scrum
- Business Systems & Process Analysis:** As-Is / To-Be Analysis, Gap Analysis, Workflow Mapping, Business Process Modeling, Process Improvement, Root Cause Analysis
- Data Analysis & Querying:** SQL (Joins, CTEs, Window Functions), Advanced Excel, Power Query, Data Validation, Data Reconciliation
- Business Intelligence & Visualization:** Power BI (DAX, Data Modeling), Tableau, Looker Studio, KPI Dashboards, Executive Reporting
- Statistical & Predictive Analytics:** Trend Analysis, Variance Analysis, Forecasting, Regression Analysis, Hypothesis Testing, A/B Testing
- Programming & Analytics:** Python, Pandas, Reporting Automation, AI-assisted Reporting, NLP-based Analytics
- Data Warehousing & ETL:** ETL Concepts, ETL Pipelines, Data Warehousing, Snowflake, Amazon Redshift, BigQuery, Azure Synapse, SQL
- Cloud & Analytics Platforms:** AWS (S3, Redshift), Azure (Data Factory, Synapse), GCP (BigQuery)
- AI & Intelligent Analytics:** Prompt Engineering, OpenAI APIs, ChatGPT APIs, Generative AI, LLMs, Retrieval-Augmented Generation (RAG), AI-driven Decision Support
- Reporting & Performance Metrics:** KPI Tracking, Scorecards, Business Insights, Performance Analysis, Customer Analytics

EDUCATION

M.S., Management Information Systems — University of Memphis, Memphis, TN

May 2025

PROJECTS

AI-Assisted Reporting Automation

- Developed automated audit reporting workflows using **Python, SQL**, and **OpenAI APIs**, reducing manual report preparation efforts.
- Built **Power BI** reporting solutions integrated with **LLM-powered** summary generation to streamline analytics and audit reporting processes.
