Professional Summary

Data Analyst with 4+ years of experience collecting, cleaning, validating, and analyzing large datasets to support business operations and strategic decision-making. Strong proficiency in SQL, Python, Microsoft Excel, Power BI, Tableau, statistical analysis, KPI development, ETL processes, and data warehousing. Experienced building dashboards, recurring and ad hoc reports, predictive insights, and executive-ready visualizations. Skilled at translating stakeholder requirements into accurate analytical solutions, improving data availability, and presenting complex findings in a clear and meaningful manner.

Technical Skills

Data Analysis: Exploratory Data Analysis, Trend Analysis, Pattern Identification, Statistical Analysis, Predictive Analytics

SQL and Databases: Advanced SQL, CTEs, Window Functions, Joins, Subqueries, Query Optimization, DB2, SQL Server, PostgreSQL

Business Intelligence: Power BI, Tableau, Looker Concepts, DAX, Power Query, KPI Dashboards, Executive Reporting

Microsoft Excel: PivotTables, XLOOKUP, VLOOKUP, INDEX-MATCH, Power Pivot, Advanced Formulas, Charts, Data Validation

Programming: Python, Pandas, NumPy, Matplotlib, R, PySpark, Data Automation, Statistical Computation

Data Engineering: ETL/ELT, Data Warehousing, Dimensional Modeling, Data Integration, Batch Processing, API Data

Cloud Platforms: AWS, Azure, Google Cloud, Snowflake, Databricks, Redshift, BigQuery, Cloud Storage

Governance and Delivery: Data Quality, Documentation, Metadata, Agile, Requirements Gathering, Stakeholder Communication

Professional Experience

Data Analyst | Mindstack Technologies LLC

Mar 2026 – Present

- Collect, clean, combine, and validate business data from relational databases, spreadsheets, APIs, and cloud-based sources.
- Write and optimize complex SQL queries and Python scripts for data extraction, transformation, analysis, and reporting.
- Develop Power BI and Tableau dashboards tracking operational performance, financial trends, customer activity, and business KPIs.
- Collaborate with stakeholders to gather reporting requirements and convert business questions into analytical deliverables.
- Perform statistical analysis to identify trends, patterns, correlations, anomalies, and opportunities for process improvement.
- Support data governance through quality checks, documentation, metric definitions, source mappings, and validation procedures.

Business Data Analyst | Compass Group USA, Inc.

Aug 2024 – Feb 2026

- Analyzed 50M+ customer, financial, service, policy-style, and operational records using SQL, Python, DB2, Excel, and Power BI.
- Created recurring and ad hoc reports for operational teams and leadership covering volume, exceptions, trends, and service metrics.
- Built dashboards with KPI scorecards, drilldowns, filters, variance analysis, and actionable management summaries.
- Automated 14 data preparation, reconciliation, monitoring, and reporting workflows, improving reporting speed and consistency.
- Performed completeness, accuracy, consistency, duplicate, and referential-integrity checks across high-use reporting datasets.
- Partnered with engineering and business teams to resolve data issues and improve source availability and reporting processes.

Data Analyst | Lorang Technologies Pvt Ltd

May 2021 – Jun 2023

- Extracted and analyzed sales, customer, product, inventory, marketing, and operational data using SQL, Python, Excel, and Tableau.
- Developed complex SQL queries, reusable datasets, and analytical tables supporting dashboards and business reporting.
- Created Excel and BI reports using PivotTables, lookup functions, calculated fields, trend charts, and executive summaries.
- Conducted descriptive statistics, segmentation, correlation analysis, variance analysis, and basic predictive modeling.
- Identified missing records, duplicate values, invalid formats, and inconsistent business rules through structured data profiling.
- Maintained report documentation, data dictionaries, KPI definitions, validation checklists, and user guidance.

Projects

Executive KPI and Business Performance Dashboard

- Integrated sales, financial, customer, and operational data using SQL, Python, Power Query, and dimensional modeling.
- Built Power BI dashboards tracking revenue, growth, customer retention, operational efficiency, and performance against targets.
- Developed DAX measures, drill-through views, trend analysis, and variance indicators for management decision-making.
- Automated data refresh, reconciliation, quality checks, and distribution of recurring leadership reports.

Cloud Data Quality and Predictive Analytics Solution

- Created an ETL workflow combining cloud, database, spreadsheet, and API data into an analytics-ready warehouse model.
- Applied Python and SQL validation rules for nulls, duplicates, schema consistency, outliers, and source-to-target accuracy.
- Built statistical and predictive models to identify demand trends, performance risks, and potential operational improvements.
- Presented findings through Tableau visualizations, concise recommendations, and documented assumptions and methodology.

Education

Master of Science in Computer Science

GPA: 3.7

Missouri State University, Springfield, MO
