

SUMMARY

Data Analyst with almost 3 years of experience transforming complex data into actionable insights to drive business growth and efficiency. Proficient in SQL, Python, Excel, Tableau, and Power BI for data analysis, visualization, and automation. Skilled in statistical analysis, predictive modeling, and A/B testing to optimize business performance. Adept at collaborating with cross-functional teams to streamline processes, enhance reporting accuracy, and develop data-driven strategies that improve key performance metrics. Strong track record of building dashboards, analyzing large datasets, and providing executives with critical business intelligence to support strategic decision-making.

SKILLS

Programming & Scripting: Python (Pandas, NumPy), SQL, R, Scala
Cloud Platforms: AWS (Redshift, S3, Glue, Lambda), Azure Synapse Analytics
Containerization & Orchestration: Docker, Kubernetes (K8s), Apache Airflow
DevOps & CI/CD: Git, Jenkins, Terraform, Apache Kafka
BI Tools: Tableau, Power BI, Looker
Database Management: MySQL, PostgreSQL, Snowflake, Redshift
Data Analysis & Statistical Methods: A/B Testing, Hypothesis Testing, Regression Analysis, Predictive Modeling
Data Governance & Quality: Data Cleaning, Data Wrangling, Data Integrity
ETL & Data Processing: Alteryx, Apache Spark, AWS Glue, KNIME
Business & Financial Analysis: KPI Tracking, Market & Competitor Analysis, Forecasting, ROI Analysis, Microsoft Excel (Pivot Tables, VLOOKUP, Macros), Google Sheets
Soft Skills: Problem-Solving, Technical Documentation, Stakeholders Management, Attention to Detail, Verbal & Written Communication, Best Practices, Active Listening, Data Storytelling, Troubleshooting, Continuous Learning & Continuous Improvement

EXPERIENCE

Data Analyst Intern, Charles Schwab

Jul 2024 – Present | TX

- Optimized data pipelines by designing and implementing automated ETL workflows using Python and SQL, reducing data processing time by 35% and improving overall system efficiency.
- Developed and maintained interactive Tableau dashboards to provide real-time visibility into financial KPIs, enabling executive teams to make data-driven investment decisions faster.
- Analyzed over 10 million customer transactions monthly, leveraging machine learning algorithms to detect fraudulent activities, leading to a 15% increase in fraud detection and preventing potential losses of \$2M annually.
- Integrated AWS Redshift with enterprise data warehouses to streamline reporting, reducing complex query execution time from 30 minutes to under 10 seconds, improving decision-making speed across departments.
- Led A/B testing initiatives to assess the effectiveness of digital marketing campaigns, providing actionable insights that increased conversion rates by 12% and boosted customer engagement.
- Collaborated with financial analysts and stakeholders to create predictive models for risk assessment, improving portfolio management strategies and reducing investment risk exposure.
- Automated data validation processes using SQL scripts and Python, ensuring 99% data accuracy and reducing manual data cleansing efforts by 50 hours per month.
- Enhanced compliance monitoring by building customized reporting tools, ensuring adherence to regulatory requirements and reducing compliance risk exposure by 15%.

Data Analyst, Mphasis

Jan 2021 – Dec 2022 | India

- Extracted, processed, and analyzed datasets exceeding 100 million records, uncovering inefficiencies that led to a \$500K reduction in annual operational costs through optimized resource allocation.
- Designed and implemented automated Power BI dashboards to replace manual reports, decreasing report generation time by 60% and improving accessibility for non-technical stakeholders.
- Developed machine learning models for customer segmentation, enabling personalized marketing campaigns that boosted customer retention by 22% and increased sales revenue by \$1.2M.
- Collaborated with cross-functional teams, including finance and IT, to deploy predictive analytics models, leading to a 20% improvement in customer churn prediction accuracy and proactive retention strategies.
- Enhanced data integrity by implementing real-time validation scripts, reducing data inconsistencies by 30% and ensuring more reliable reporting for business intelligence teams.
- Automated repetitive data extraction and transformation tasks using Python and SQL, saving the analytics team over 200+ hours per quarter and improving workflow efficiency.
- Led the migration of legacy reporting systems to a cloud-based environment, successfully transitioning over 500GB of data and improving system performance.
- Conducted in-depth financial forecasting and performance analysis, providing strategic insights that contributed to a 15% increase in profitability for key business units.
- Documented best practices, created data governance guidelines, and standardized reporting templates, ensuring consistency in business intelligence processes across departments.

EDUCATION

Master of Science in Computer Science

Jan 2023 – Dec 2024

University of North Texas, Denton, TX

Bachelor of Technology in Computer Science

Jul 2018 – Jul 2022

Vellore Institute of Technology | India

PROJECT

HR Workforce Analysis & Prediction
Conducted data-driven employee performance and retention analysis using Pandas and NumPy.
Created visualizations in Tableau to communicate workforce trends and insights.
Developed predictive models using machine learning techniques to optimize HR

CERTIFICATIONS

Google Data Analytics Professional Certificate
SQL for Data Science (Coursera)
Tableau Desktop Specialist Certification
