PROFESSIONAL SUMMARY

Full-stack JavaScript developer with 7+ years of experience building scalable web and mobile applications across sports technology, e-commerce, SaaS, and fintech. Specialized in React.js, React Native, and Node.js with proven expertise in cloud platforms (AWS, GCP, Azure), payment gateway integration (Stripe), and AI integration. Daily user of AI coding agents (Claude Code, Cursor) to direct multi-step implementation, review generated code, and ship features faster. Successfully delivered 10+ production applications serving thousands of users, with a strong track record in performance optimization, mentoring development teams, and leading full SDLC from requirements to deployment.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Node.js, SQL, NoSQL, Java

Frameworks & Libraries: React.js, React Native, Vue.js, Nuxt.js, Express.js, Redux, Zustand, TailwindCSS, Ant Design

Mobile Development: React Native, Expo, React Navigation, Redux Toolkit, AWS Amplify, Mobile-First Design

Databases: MongoDB, MySQL, MSSQL Server, PostgreSQL, Supabase, Redis, Azure Cosmos DB

Cloud & DevOps: AWS (S3, EC2, Amplify), Azure (Cosmos DB, Blob Storage, AI Projects), GCP, Docker, Git/GitHub, CI/CD

Tools & Methodologies: Jira, Agile/Scrum, Visual Studio Code, WebStorm, Code Reviews

AI-Assisted Development: Claude Code (daily), Cursor, Copilot — directing multi-step implementation, reviewing generated code, and iterating efficiently

AI & Integrations: Anthropic Claude API, Claude Vision API, Stripe Payments, OAuth/SSO, RESTful APIs, WebSockets, CDN, SEO

PROFESSIONAL EXPERIENCE

Independent Developer | Freelance | August 2025 – Present

- Built Zeekbook, an AI-powered document management and invoice processing application with automated data extraction — integrated Claude Vision API via Supabase Edge Functions to extract structured data (dates, amounts, references) from PDF/image receipts, with document management, PDF viewing, invoice preparation, and real-time status tracking via database triggers
- Developed and shipped Meriton Chat, a real-time AI-powered chat application with context-retaining agent conversations, secure file sharing, multi-conversation management, and Azure AD authentication, built with React 19, Vite, Tailwind CSS, Zustand, Express, and Azure (Cosmos DB, AI Projects, Blob Storage)
- Built Birthday Buddy, a cross-platform mobile app (React Native/Expo) with timezone-aware notifications and an offline-first architecture using local scheduling and AsyncStorage
- Delivered freelance projects end-to-end using Claude Code as primary coding agent — architecture decisions, feature implementation, Edge Function logic, and database schema design

Key Technologies: React, React Native, TypeScript, Supabase (PostgreSQL), Anthropic Claude Vision API, Azure, Expo, Zustand, Claude Code

Software Engineer | INFOSYS | February 2025 – July 2025

- Enhanced existing loan application mobile platform built with React Native and Expo, serving financial services clients with streamlined approval workflows
- Refactored legacy codebase improving code maintainability and reducing technical debt, implementing modern React patterns and component architecture
- Implemented Redux state management for complex approval workflows, ensuring consistent data flow across multi-step loan application process
- Collaborated with team of 4 developers in Agile environment, participating in code reviews and sprint planning to deliver features on schedule
- Optimized component structure and improved application performance through strategic refactoring of business logic and UI components

Key Technologies: React Native, Expo, Redux, TypeScript, RESTful APIs

Software Engineer | KOACH | January 2022 – February 2025

- Architected and developed Koach Hub mobile application (React Native) and Skout Hub web platform (React.js) serving 5,000+ active users across football coaching and player management ecosystem
- Improved application performance by 45% through implementing lazy loading, code splitting, CDN integration, and image optimization, reducing average page load time from 3.2 seconds to 1.8 seconds
- Integrated Stripe payment gateway processing \$15K+ monthly subscriptions, implementing secure payment flows, subscription management, and automated invoice generation for Skout Hub
- Built real-time features including live messaging, scheduling, and player progress tracking using WebSocket connections, React-Redux state management, and AWS Amplify for file storage
- Reduced React Native bundle size by 35% through dependency optimization and tree-shaking, contributing to app store rating improvement from 3.8 to 4.5 stars
- Adopted Claude Code and Cursor into daily workflow for refactors, feature scaffolding, and test generation, accelerating delivery on multi-step tasks across the React Native and React.js codebases
- Led code reviews and mentored 2 junior developers, establishing coding standards and best practices that reduced production bugs by 40%
- Collaborated with cross-functional teams in Agile/Scrum environment, participating in sprint planning, requirements gathering, and technical architecture decisions

Key Technologies: *React Native, React.js, Node.js, Redux, TypeScript, TailwindCSS, AWS Amplify, Stripe API, RESTful APIs, Claude Code, Cursor*

Software Engineer | ZONE24x7 | March 2021 – December 2021

- Developed Conarc, a comprehensive document management system for an accounting firm managing 10,000+ documents, improving user productivity by 50% through intuitive drag-and-drop interface
- Implemented Single Sign-On (SSO) authentication system enabling seamless login across 3 enterprise applications, reducing authentication-related support tickets by 60%
- Created reusable component library with paginated tables, dropdowns, and forms using Ant Design, cutting development time for new features by 40%
- Optimized REST API integration improving data synchronization performance by 30% through request batching, caching strategies, and efficient state management
- Contributed to technical planning and effort estimation for 5+ major features, collaborating with stakeholders on requirements gathering and architecture decisions

Key Technologies: *React.js, Ant Design, RESTful APIs, OAuth 2.0, Git, Jira*

Software Engineer | BLACKVT / PIKANITE | January 2018 – March 2021

- Led full-stack development of 3 major SaaS products (Kramp quiz platform, Conferli conference management, Bespoke e-commerce) from requirements to production deployment
- Designed and implemented global leaderboard system for Kramp serving 20,000+ users across 15 countries with <100ms response time using Redis caching and real-time data synchronization
- Built multilingual quiz platform supporting 5 languages with dynamic content loading and localization, increasing user engagement by 35%
- Developed Conferli conference booking platform processing \$50K+ annual revenue, integrating Stripe payments, automated invoice generation, and PDF report generation
- Created 3D product visualization interface for Bespoke custom apparel platform, increasing conversion rate by 25% and enabling real-time shirt customization
- Optimized database queries and API endpoints across all applications, reducing average load times by 40% and improving overall system scalability
- Mentored 3 junior developers through pair programming and code reviews, while participating in client meetings for technical consultation and requirements gathering

Key Technologies: *Vue.js, Nuxt.js, Node.js, Express.js, MongoDB, MySQL, Redis, Stripe, WebSockets, Docker, Git*

EDUCATION

Bachelor of Engineering (BEng) in Software Engineering

London Metropolitan University | Graduated 2021

Relevant Coursework: Data Structures & Algorithms, Software Architecture, Database Systems, Web Technologies

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Certified Cloud Practitioner (in progress)
- Advanced React & Redux - Udemy
- React Native - The Practical Guide - Udemy

ADDITIONAL INFORMATION

- US Green Card Holder - Authorized to work in the United States without sponsorship
- Open to remote, hybrid, or onsite opportunities
- Willing to relocate for the right opportunity
- Languages: English (Fluent), Tamil (Native)
- Availability: Immediate
