Career Summary

Software Engineer with 8 years in development, automation, and testing for financial platforms like audit systems and investment management. Expertise in Agile/Scrum, Java, Rest Assured API automation, ETL/SQL testing, and CI/CD pipelines. Achieved 20% defect reduction, 70% faster releases, and improved efficiency in fast-paced settings. Proficient in risk management, financial analysis, stakeholder communication, and collaboration.

Professional Competencies

- **Agile & SDLC Expertise:** Proficient across the full software development lifecycle (SDLC) with emphasis on Agile/Scrum, requirements analysis, test planning, automation, execution, and reporting.
- **Quality Engineering & Automation:** Expertise in building and maintaining robust test environments, implementing automated testing frameworks, and ensuring end-to-end software quality assurance.
- **DevOPS & CI/CD:** Proficient in architecting scalable and reliable CI/CD pipelines that accelerate delivery, improve system reliability, and support rapid release cycles.
- **Technology Adoption & Executive Communication:** Skilled at presenting complex technical solutions to executive stakeholders while driving adoption of emerging technologies and innovative practices.
- **Leadership & Program Management:** Strong track record of leading cross-functional, global teams on dynamic projects, consistently delivering within deadlines and aligning outcomes with strategic business objectives.
- **Client & Stakeholder Engagement:** Excellent communication and interpersonal skills, adept at translating complex technical deliverables into measurable business value while fostering long-term client relationships.

Education

- **Master of Business Administration (MBA Finance & Human Resources)** - R V Institutes of Management
- **Bachelor of Computer Applications** - Indira Gandhi National University

Technical Skills

- **Business & Soft Skills:** Agile/Scrum, Jira, Confluence, MS Office, Data Interpretation, Leadership, Problem-Solving, Communication, Financial Decision-Making, Risk Management, Compliance, Investment Planning, Product Management
- **Languages/Frameworks:** Java, Python, JavaScript, JUnit, TestNG, POM, Data Driven, BDD Cucumber Hybrid, Spring (basic), Microsoft SQL Server, API Testing (Postman), Git, CI/CD
- **Test Management & Automation:** Selenium WebDriver, Rest Assured, Postman, Gradle, IntelliJ IDEA, Jenkins, Git, Bitbucket, HP ALM, Zephyr, TestRail
- **Cloud & Infrastructure:** AWS (familiarity), Azure (familiarity), GCP (familiarity)
- **Databases:** Oracle, PostgreSQL, SQL, PL/SQL, Microsoft SQL
- **Software Testing:** Manual/Automation Testing, Scripted Testing, Regression Testing, Functional Testing, Performance Testing, Load Testing
- **Domain:** Financial Audit Platforms, Fund Management, Trading Systems, Risk Management

Certifications

- Risk Management Proficiency Course - R V Institutes of Management
- DevOps Foundations: Continuous Delivery and Continuous Integration - LinkedIn
- Teamwork Foundations - LinkedIn
- Certified ScrumMaster - Scrum Alliance
- Quality Assurance and Selenium Comprehensive Course (2024) - ACE IT USA
- Java 17 Masterclass Comprehensive Training in Java Programming (2024)- Udemy
- Advanced Selenium and Python Automation Fundamentals to Framework Development - Udemy

Professional Experience

Software Engineer | Consulting for Clients

2018- 2023

- Designed and developed an automation framework for critical e-commerce functionalities, reducing execution time by 70% through parallel execution of test cases, which enabled faster release cycles and improved customer satisfaction.
- Increased automation coverage by 40% by identifying test gaps in legacy modules and implementing data-driven and keyword-driven frameworks, resulting in more robust quality assurance and fewer production issues.
- Conducted functional and regression testing using Selenium WebDriver with Java and Maven, ensuring reliable user experiences across multiple platforms.
- Utilized Jenkins for periodic test execution, supporting consistent application performance on desktop, tablets, and mobile devices.
- Executed cross-browser tests on Chrome, Firefox, and Safari using TestNG and Maven, broadening accessibility for diverse customer segments.
- Implemented Rest Assured for API automation and leveraged BDD Cucumber for behavior-driven development, enhancing stakeholder communication and clarity of test scenarios.
- Collaborated closely with developers on UI module automation, driving higher efficiency and smoother integration between QA and engineering teams.

Associate Analyst | KPMG

2015- 2017

KPMG Asset Management Audit Platform (AMAP) is part of KPMG's Clara automated end-to-end audit system, streamlining audits for funds and investment advisers with automation and advanced analytics.

- Designed and optimized automation frameworks for AMAP Converged products, reducing production defects by 20%.
- Built API automation with Rest Assured to validate HTTP responses and data accuracy.
- Integrated automation into CI/CD pipelines with Jenkins and Git, boosting deployment speed and reducing bugs.
- Developed reusable frameworks using Selenium, TestNG, Java, SQL, and Cucumber/BDD for efficient test coverage.

Analyst | HBJ Capital Services Pvt. Ltd.

2014- 2015

- Automated financial services product testing for equity fund management using Selenium WebDriver, Java, BDD, and Maven.
- Delivered end-to-end testing for fund management and trading platforms, improving reliability and operational efficiency.
- Led UI and backend test automation, reducing testing lifecycle and enhancing application quality.
- Executed comprehensive database testing to ensure data accuracy and system integrity.
- Managed defect tracking with Jira and communicated progress reports to stakeholders.
