

Shan Borelly

Data Analyst

Email: borellyshan@gmail.com | Phone: +1 (305)575- 1045 | Location: Florida, USA

[LinkedIn](#)

Summary

Data Analyst with 5+ years of experience in manipulating, analyzing, and visualizing large datasets to derive actionable insights and support data-driven decision-making. Skilled in Python (Pandas, Numpy), SQL, and R, with extensive experience in cleaning, transforming, and wrangling data. Proficient in creating interactive dashboards using Tableau and Power BI to present complex data stories. Adept at implementing data pipelines, optimizing data workflows, and collaborating with cross-functional teams to solve business problems.

Professional Experience

Humana, USA

Data Analyst

Feb 2024 – Present

- Automated data cleaning and preparation processes using Python (Pandas, Numpy), reducing manual effort by 40% and improving data quality for downstream analysis.
- Designed ETL pipelines in SQL and PySpark, ensuring seamless data integration and reducing processing time by 50%.
- Conducted exploratory data analysis (EDA) on large datasets to identify trends, outliers, and actionable insights, leading to improved marketing campaign strategies.
- Built interactive Tableau dashboards that visualized customer demographics and campaign KPIs, empowering stakeholders with real-time insights.
- Utilized statistical methods like hypothesis testing and ANOVA to validate findings and recommend business actions.
- Developed predictive models (logistic regression, random forest) to improve audience targeting, achieving 75% accuracy in predictive outcomes.
- Played a key role in data governance, ensuring data integrity and consistency through validation processes using SQL.
- Implemented audience segmentation using K-means clustering, providing a granular understanding of customer behaviors for targeted marketing campaigns.

Capital One Financial

Data Analyst

Feb 2023 – Jan 2024

- Executed end-to-end ETL workflows using SQL and Python (Pandas, NumPy) to cleanse and transform 15M+ structured/unstructured records, improving data readiness by 30% for descriptive analytics and stakeholder reporting.
- Automated financial dashboards in Power BI with DAX measures and drill-through filters, reducing manual reporting time by 20 hours/month and enabling real-time KPI tracking for executive decision-making.
- Collaborated with data engineers to validate AWS Redshift pipelines, ensuring data integrity through quality checks and error logging, reducing pipeline failures by 25%.
- Designed A/B tests for marketing campaigns using statistical hypothesis testing (t-tests, p-values), resulting in a 12% lift in customer conversion rates and \$500K+ incremental revenue.
- Optimized Snowflake SQL queries via query plan analysis and indexing, accelerating data retrieval for monthly sales reports by 35% and reducing cloud costs by 15%.
- Developed regression models in Python (Scikit-Learn) to forecast quarterly sales trends, achieving 85% accuracy and improving inventory planning efficiency by 20%.
- Documented data lineage and metadata in Confluence, aligning with data governance policies and enabling audit compliance for cross-functional teams.
- Translated business requirements into technical specifications for Agile sprints, prioritizing backlog tasks in Jira to deliver BI solutions 15% ahead of deadlines.

Mphasis, India

Data Analyst

June 2018 – Aug 2021

- Analyzed and transformed raw datasets exceeding 10 million records into structured formats using SQL and Python, supporting critical business reporting needs.
- Automated recurring data preparation tasks, reducing report turnaround times by 30% through Python scripting and advanced SQL queries.
- Created dashboards in Power BI to monitor operational metrics and client KPIs, improving decision-making efficiency.
- Conducted data triaging using JIRA, resolving data inconsistencies and ensuring clean datasets for analysis.
- Engineered datasets for machine learning models, enabling 89% success rate in customer segmentation and behavior analysis.
- Collaborated with cross-functional teams to optimize data pipelines using AWS RDS and PostgreSQL, improving data accessibility by 40%.
- Performed time-series analysis and forecasting, providing actionable insights for resource allocation and financial planning.
- Achieved a 10% improvement in reporting efficiency through enhanced data visualization techniques.

Skills

- **Data Analytics & Processing:** SQL, Python (Pandas, NumPy), R, Excel, Data Wrangling, ETL Pipelines, Data Cleaning, Transformation, Data Warehousing
- **Statistical Analysis:** Exploratory Data Analysis (EDA), Hypothesis Testing, ANOVA, Regression Analysis, Feature Engineering
- **Data Science:** Predictive Modeling (Logistic Regression, Random Forest), K-Means Clustering, CART, Machine Learning Pipelines
- **Visualization & Reporting:** Tableau, Power BI, Interactive Dashboards, KPI Reporting, Data Storytelling, Excel, Microsoft Office, Data Mining, Data Modelling, Jupyter, VS Code
- **Data Engineering:** PySpark, Databricks, Snowflake, AWS (RDS, S3), PostgreSQL, Big Query
- **Project Tools & Methodologies:** JIRA, Agile (Scrum, Kanban), Stakeholder Collaboration, Reporting Automation
- **Cloud Platforms:** Azure, AWS
- **Database Management:** SQL, MySQL, SQL Server, Oracle SQL, Query Optimization, Database Design
- **Analytics and Statistics:** Hypothesis Testing, A/B Testing, Statistical Analysis

Education

Florida International University | Miami, Florida
MS in Data Science and Artificial Intelligence

Osmania University | Hyderabad, India
BE in Computer Science and Engineering

Certifications

- **Azure Enterprise Data Analyst Associate (Power BI) | Microsoft Corporation**
- **Python for Data Science | Udemy**
- **Database Programming with SQL | Oracle Academy**
- **Python | Hacker Rank**
- **SQL (Advanced) | Hacker Rank**
