

Shantanu Gaikwad

Data Analyst

Open to Relocate(USA) | (425) 477-9537 | shantanu@jobrequires.com | [LinkedIn](#)

SUMMARY:

Data Analyst with around 3 years of experience transforming complex datasets into actionable business insights across **healthcare** and **enterprise environments**. Proficient in **SQL, Python, Power BI, Tableau, Snowflake** and **advanced analytics**, with expertise in **data modeling, dashboard development, KPI reporting, data validation** and **statistical analysis**. Demonstrated success in improving reporting efficiency, enhancing data quality, and automating analytics processes to **support strategic decision-making**. Skilled at leveraging **data-driven methodologies** to optimize operational performance and streamline reporting workflows.

SKILLS:

Data Analysis & Analytics: Data Analysis, Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning, Data Validation, Data Profiling, Data Interpretation, Business Analytics, KPI Reporting, Root Cause Analysis

Programming & Querying: Python, SQL, Pandas, NumPy, PySpark, R, Advanced SQL Queries, Data Manipulation, Data Wrangling

Data Visualization & BI: Power BI, Tableau, Interactive Dashboards, Data Storytelling, Executive Reporting, Self-Service Analytics, Dashboard Automation, Performance Metrics Reporting

Databases & Data Warehousing: Snowflake, Amazon Redshift, SQL Server, Relational Databases, Data Modeling

Cloud & Big Data Technologies: AWS, Azure, Databricks, Cloud Data Platforms, Distributed Data Processing

Machine Learning & Advanced Analytics: Predictive Analytics, Forecasting Models, Feature Engineering, Model Evaluation, Time Series Analysis, Anomaly Detection, Customer Segmentation

Generative AI & Emerging Technologies: Generative AI, Large Language Models (LLMs), Prompt Engineering, AI-Powered Analytics, Conversational Analytics, Agentic AI Applications

Tools & Platforms: Git, GitHub, Streamlit, Jupyter Notebook, Microsoft Excel, CI/CD, REST APIs, Version Control Systems

EDUCATION:

Master of Science in Information Systems

May 2026

Stevens Institute of Technology, Hoboken, NJ

Bachelor of Engineering in Computer Engineering

Dec 2023

Savitribai Phule Pune University, India

EXPERIENCE:

Johnson & Johnson, WA | Data Analyst

Feb 2026 – Current

- Analyzed enterprise datasets using **SQL, Python** and **Power BI** to uncover **operational trends**, enabling stakeholders to improve **KPI performance** by 11% through data-driven decision-making.
- Developed interactive **Power BI dashboards** integrating **multiple data sources**, reducing manual reporting effort by 30% and accelerating **executive reporting cycles**.
- Optimized **data validation** and **profiling workflows** using **Python** and **Pandas**, improving data quality accuracy by 14% and minimizing reporting inconsistencies.
- Implemented **advanced SQL querying** and **data wrangling processes** across **Snowflake environments**, decreasing **report generation** time by 18% for business users.
- Automated **recurring analytics workflows** through **Python-based solutions** and **dashboard automation**, reducing manual intervention by 25% while improving reporting consistency.

Infinite Infolab, India | Data Analyst

Apr 2022 - Aug 2024

- Engineered **scalable data models** and **reporting solutions** using **SQL Server, Python** and **Power BI**, improving reporting efficiency by 28% across multiple business functions.
- Conducted **exploratory data analysis** and **statistical assessments** on **large datasets**, uncovering **actionable insights** that increased process effectiveness by 16%.
- Designed **KPI tracking dashboards** with **Tableau** and **Power BI**, enhancing **leadership visibility** into business performance and reducing reporting turnaround time by 35%.
- Streamlined data cleaning and transformation pipelines using **Pandas** and **NumPy**, improving dataset reliability by 22% and supporting more accurate analytics outcomes.
- Leveraged **predictive analytics** and **forecasting models** to support **business planning initiatives**, improving forecast accuracy by 17% for key operational metrics.
- Integrated data from relational databases and cloud platforms into **centralized reporting environments**, increasing **data accessibility** and **reducing analysis preparation** time by 24%.
- Delivered customer segmentation and anomaly **detection analyses** using **Python** and **statistical techniques**, helping stakeholders **improve targeted decision-making effectiveness** by 13%.
