

PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Analyst with over 3 years of experience in data science, data analytics, and business intelligence. Proven track record of leveraging data-driven insights to drive strategic decisions and operational efficiencies. Proficient in Python, SQL, and various data visualization tools, with strong expertise in data modeling, data preprocessing, machine learning, and performing complex data analysis. Adept at collaborating cross-functionally to enhance business outcomes and streamline processes in fast-paced environments. Strong understanding of cloud platforms (AWS, GCP), data wrangling, customer segmentation, and statistical modeling. Exceptional communication skills with a focus on usability and innovative solutions to technical problems.

TECHNICAL SKILLS

**Programming Languages:** Python, R, SQL  
**IDEs:** Visual Studio Code, Anaconda, Jupyter Notebook, Google Colab, PyCharm, Spyder, IDLE  
**Packages and Libraries:** Pandas, NumPy, Matplotlib, SciPy, Scikit-learn, PyTorch, TensorFlow, Seaborn, ggplot, Plotly, dplyr  
**Data Visualization Tools:** Tableau, Power BI, Looker, Amazon QuickSight, MS Excel, Advanced Excel (Pivot Tables, VLOOKUP)  
**Cloud Technologies:** AWS, Google Cloud Platform, Spark, Hadoop  
**Databases:** MySQL, NoSQL, SQL Server, Oracle  
**Techniques:** A/B Testing, Predictive Modeling, Statistical Modeling, Customer Segmentation, Data Cleaning, Data Wrangling, Data Preprocessing  
**Soft Skills:** Process Improvement, Continuous Improvement, Interpersonal Skills, Communication, Data-Driven Strategy, Collaboration, Vision Development

PROFESSIONAL EXPERIENCE

Data Analyst

JP Morgan Chase, Wilmington DE

January 2024 – Present

- Developed and maintained advanced analytics dashboards and reports using Power BI and Tableau, providing actionable insights into financial performance and risk management.
- Conducted detailed analyses on customer transactions and loan performance, resulting in a 15% increase in customer retention through targeted financial products.
- Automated data extraction and processing using Python and SQL, reducing data preparation time by 50% and improving reporting accuracy.
- Collaborated with marketing and product teams to analyze the effectiveness of banking campaigns, contributing to a 20% increase in ROI on marketing spend.
- Implemented machine learning models for predictive analytics, enhancing fraud detection capabilities and reducing financial losses by 25%.
- Engaged in data science projects to improve the bank's data platform and data-driven decision-making processes.
- Demonstrated leadership in addressing technical issues and providing innovative solutions.

Data Analyst

Macy’s, Atlanta GA (Remote)

August 2022 – December 2023

- Partnered with business stakeholders to gather and report requirements, ensuring alignment with organizational goals across various teams.
- Conducted comprehensive analyses to define business needs based on historical and current data, providing actionable insights to stakeholders.
- Collaborated with sales, finance, operations, and supply chain teams to enhance product analytics, achieving a 90% increase in operational efficiencies.
- Developed data-driven omnichannel marketing strategies with merchandising and marketing teams, boosting online-to-store conversion rates by 10% and enhancing brand visibility.
- Created detailed reports using Excel and Looker on customer purchase data and loyalty program analytics, identifying trends with complex SQL queries and Python, resulting in a 15% increase in targeted product sales.
- Designed operational dashboards using Tableau, Power BI, and QuickSight, focusing on Key Performance Indicators (KPIs) to drive data-driven decisions, improving product and marketing strategies by 50%.
- Led a team of four global members (three offshore and one onshore) for reporting and analysis, achieving accuracy levels exceeding 95% with Python automation scripts.
- Demonstrated strong analytical and problem-solving skills, addressing technical issues promptly and effectively.

Data Analyst

Deloitte, Hyderabad Telangana

May 2020 – July 2021

- Spearheaded the analysis and transformation of complex datasets, enhancing efficiency through automated data pipelines in SQL and Python, reducing processing time by 60%.
- Designed and deployed interactive dashboards and reports using Power BI and Tableau, increasing stakeholder engagement and informed decision-making by 40%.
- Utilized data-driven analysis techniques like linear regression and A/B testing to improve project outcomes by 80%.
- Applied analytical models using R and Python, contributing to 100% data-driven decision making.
- Identified business opportunities and aligned client needs with tailored data-driven solutions, boosting business development activities by 20%.
- Ensured seamless collaboration with internal teams, improving data quality and project success, leading to a 20% reduction in project turnaround time.
- Assisted in documenting and updating process workflows and procedures, ensuring compliance and efficiency.
- Leveraged cross-functional communication skills to resolve issues and enhance project usability.

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera
- Tableau Desktop Specialist – Tableau
- AWS Certified Cloud Practitioner – In Progress
- IBM Data Science Professional Certificate – Coursera (if completed)

EDUCATION

M.S. Business Analytics

University of Colorado Denver

August 2021 – May 2023

B.Tech. Electrical and Electronics Engineering

CVR College of Engineering

August 2016 – April 2020
