

SHEETAL KANDHARE

Seattle, WA

+1 206-771-7426 sheetalkandhare71@gmail.com [LinkedIn](#) [GitHub](#)

Summary

Software engineer with hands-on experience across backend development, data quality/reporting, testing, and business systems support. Skilled in Python, SQL, Power BI, and requirements gathering, with a track record of building reliable systems, improving data accuracy, automating manual workflows, and translating business needs into technical solutions across cross-functional teams.

Experience

Software Development Engineer

Sep 2025 – Current

LMP (Live Music Proj.)

Seattle, WA

- Cut testing cycle time by 65% as measured by regression-suite runtime, by designing and validating backend testing infrastructure with Python, Django, & SQL.
- Reduced manual email/report processing by 70% as measured by weekly staff hours saved, by building an automated data-driven email and reporting system.
- Shortened new-hire onboarding time by 50% as measured by ramp-up duration, by authoring internal documentation for system setup, data workflows, and known issues.
- Improved environment consistency and setup reliability, as measured by reduced configuration defects, by containerizing services with Docker for repeatable validation environments.

Software Developer

Oct 2023 – Jun 2025

Seattle University

Seattle, WA

- Improved data visibility for facility operations by 55% as measured by stakeholder-reported dashboard usability, by building SQL-driven Power BI reporting pipelines and reviewing outputs for accuracy.
- Increased UI responsiveness and load efficiency by 40% as measured by page-load benchmarks, by refactoring React components and validating API integration outputs.
- Enabled reliable task allocation and scheduling by building Python-based backend microservices with SQL-backed persistence, verified through integration testing.

Software Development Engineer

Nov 2021 – Aug 2023

Accenture

Pune, India

- Reduced fraud risk by 60% as measured by flagged-transaction audits, by engineering and validating secure payment-authorization data flows for DTE Energy using token-based authorization and SQL services.
- Improved system stability and data reliability as measured by reduced recurring incidents, by conducting root-cause analysis, log review, and distributed-service debugging.
- Strengthened code and data quality standards across the team as measured by peer-review defect rates, by presenting system designs and leading technical reviews.
- Ensured production release quality as measured by post-deployment issue rate, by supporting deployment validation and configuration management.

Software Development Engineer (Data)

May 2021 – Nov 2021

Incentius

Pune, India

- Reduced manual data processing by 50% as measured by analyst hours saved, by building Python/Pandas/SQL pipelines with rules-based validation for large-scale incentive computation and data-quality checks.
- Improved dashboard query performance by 45% as measured by report load time, by designing and tuning SQL data models feeding Tableau reporting.
- Increased operational efficiency by 30% as measured by user adoption, by building an NGO web platform with React Native, TypeScript, and AWS featuring validated data and donation workflows.

Projects

Campus Meetups – Networking Platform | *TypeScript, Node.js, Express, MongoDB, Agile Methodology*

Jan 2025

- Increased user engagement by 30% as measured by active-session data, by building and testing Node.js/Express APIs on Azure-based cloud infrastructure with secure backend architecture.

Rental Booking Platform | *.NET, REST API, SQL, JavaScript, HTML, CSS*

Nov 2024

- Delivered a validated, defect-free booking workflow as measured by UAT pass rate, by implementing layered multi-tier architecture with SQL persistence guided by SOLID design principles.

Education

Seattle University

Sep 2023 – Jun 2025

Master of Science in Computer Science

GPA: 3.7/4

Savitribai Phule Pune University

Aug 2018 – Jun 2021

Bachelor of Science in Computer Science

GPA: 9.3/10

Skills

Business Analysis & Data Quality: Requirements gathering, UAT, data validation, data profiling, process documentation, stakeholder communication

Reporting & SQL: SQL, Power BI, Tableau, dashboard development, business intelligence reporting

Databases: SQL, PostgreSQL, MySQL, MongoDB

Testing: JUnit, Selenium, Unit/Integration/Regression Testing, User Acceptance Testing (UAT)

Languages: Python, C#, C++, Java, TypeScript, PHP

Frameworks: .NET Core, ASP.NET MVC, Node.js, Express.js, React, Django

DevOps & Tools: Git, Docker, CI/CD, Visual Studio, Postman, Excel

Cloud & APIs: AWS (EC2, S3, RDS, IAM, SQS, DynamoDB), Azure, RESTful APIs, GraphQL, JSON

Coursework: Data Structures, Software Engineering, Testing & Debugging, Computer Networks, Software Architecture, Machine Learning, UI/UX Design
