

SHREYA KALE

Data Analyst

+1 (315) 924-2311 | shreyarahulkale@gmail.com | LinkedIn | GitHub | New York, NY

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience working with large-scale healthcare operational and business datasets to support reporting, performance monitoring, and strategic decision-making. Experienced in SQL, Python, Power BI, Tableau, Snowflake and cloud-based data platforms for data analysis, dashboard development, ETL automation and KPI reporting. Strong background in translating complex data into actionable insights, building scalable reporting solutions, and partnering with cross-functional stakeholders to improve operational efficiency and business outcomes. Familiar with healthcare data standards, population health analytics, value-based care programs, and HIPAA-compliant data environments.

TECHNICAL SKILLS

Data Analysis & Reporting: SQL, Python (Pandas, NumPy), Power BI, Tableau, Excel, KPI Reporting, Data Visualization, Dashboard Development, Data Storytelling

Databases & Cloud: Snowflake, SQL Server, Azure Data Factory, Microsoft Azure, AWS, BigQuery

Data Engineering & ETL: ETL Development, Data Modeling, Data Validation, Data Cleansing, Data Governance, Workflow Automation

Analytics & Statistics: Forecasting, Predictive Analytics, A/B Testing, Root Cause Analysis, Trend Analysis, Statistical Modeling

Healthcare Analytics: Claims Data Analysis, Population Health Analytics, HEDIS, MIPS, HIPAA, Revenue Cycle Management (RCM), ICD-10, CPT, FHIR APIs, Epic, Cerner, Value-Based Care

Collaboration & Tools: Agile, Jira, Confluence, Stakeholder Management, Business Requirements Documentation, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

HCA Healthcare | USA

Data Analyst

Mar 2025 – Present

- Developed and maintained 12+ Power BI dashboards tracking patient volume, resource utilization, quality measures, and operational KPIs, enabling leadership teams to monitor performance across multiple facilities.
- Analysed datasets containing over 5 million healthcare records using SQL, Snowflake, and Python to identify utilization trends, care gaps, and operational bottlenecks that informed strategic planning initiatives.
- Automated reporting workflows using Azure Data Factory and SQL, reducing manual report preparation time by approximately 40% and improving reporting consistency across departments.
- Partnered with clinical, operational, and business stakeholders to define KPI requirements and deliver scalable reporting solutions used in monthly and quarterly performance reviews.
- Built forecasting models in Python to support patient volume and workforce planning, improving forecast accuracy by 20% compared to previous spreadsheet-based methods.
- Analysed clinical, claims, and population health data to monitor HEDIS performance, identify high-risk patient populations, and support value-based care initiatives across provider networks.
- Integrated EMR and FHIR-based datasets into centralized analytics platforms while enforcing HIPAA-compliant data governance standards, improving data accessibility for reporting teams.
- Collaborated with business stakeholders and leadership teams to translate reporting requirements into scalable analytics solutions and actionable insights.

Mphasis | India

Data Analyst

Apr 2020 – Jul 2023

- Analysed large healthcare and operational datasets exceeding 3 million records using SQL, Python, and Excel to identify performance trends, uncover business insights, and support data-driven decision-making across cross-functional teams.
- Designed and maintained 15+ Power BI and Tableau dashboards, KPI scorecards, and self-service reporting solutions that improved visibility into operational performance, patient outcomes, revenue cycle metrics, and key business objectives.
- Developed and optimized ETL workflows, data models, and reporting datasets using SQL Server and Python, reducing manual reporting effort by 35% while improving data accessibility, consistency, and dashboard performance.
- Performed data validation, reconciliation, trend analysis, and root cause investigations to improve data quality and reporting accuracy by 25%, enabling stakeholders to make more confident business decisions.
- Partnered with business, operations, and healthcare stakeholders to gather requirements, define reporting metrics, and deliver actionable insights from claims, billing, and operational data that supported strategic planning and process improvement initiatives.

EDUCATION

Master of Science in Computer Science

May 2025

Syracuse University, USA

Bachelor of Technology in Information Technology

Jun 2022

Savitribai Phule Pune University, India

PROJECTS

LLM-Powered Fraudulent Job Detection

- Deployed a fraud classifier using BERT (Hugging Face) embeddings and XGBoost, reaching 98.5% accuracy across 17,000+ records by capturing complex semantic patterns in unstructured text.
- Improved model recall by 15% via ADASYN class balancing and GridSearch CV tuning while maintaining 91% precision.

Hit Song Prediction in Indian Popular Music

- Spotify API and Librosa to extract 150+ acoustic features from raw audio and MIDI. Validated SVM and Random Forest models through cross-validation and presented the methodology at an international peer-reviewed conference.

CERTIFICATIONS

- Python 3 Specialization | University of Michigan
- Generative AI Agents Intensive | Google
