

PROFESSIONAL SUMMARY:

- Around 3 years of hands-on experience as a Full Stack Java Developer at Infosys, delivering scalable enterprise-grade applications using Java, Spring Boot, React, Microservices, and REST APIs.
- Proficient in leveraging front-end and back-end technologies such as HTML, CSS, Bootstrap, Hibernate, Kafka, and cloud platforms like AWS and Azure to build high-performing and secure systems.
- Contributed to full SDLC phases including analysis, design, development, testing, and deployment of robust web applications, while ensuring continuous integration and containerized deployment.
- Completed a Bachelor's in Computer Science from Georgia State University and earned certifications in Python, Java, CI/CD, and DevOps practices, with deep knowledge of cloud-native and API-first development.
- Authorized to work in the U.S. and open to relocation for full-time opportunities across the country.

TECHNICAL SKILLS:

Programming Languages: Java/Java 8/11/17, Python 3.x, JavaScript (ES6+), TypeScript, HTML5, CSS3

Algorithms & Data Structures: OOP, Linked Lists, Hash Tables, Queues, Stacks, Graphs, Sorting & Searching Algorithms

Web Technologies: HTML5, CSS3, Bootstrap 4/5, JavaScript (ES6), AngularJS, AngularTS, React.js, Node.js

Tools & Frameworks: Spring Boot 2.x/3.x, Spring MVC, Hibernate, Flask, Struts, Express.js, Heroku, MVC Architecture

Databases: MySQL, PostgreSQL, Oracle, MongoDB (basic), Basic SQL

Web/App Servers: Apache Tomcat 8/9/10, Nginx

Build Automation: Maven, Gradle

Containerization Tools: Docker, Kubernetes (basic knowledge)

Development Tools: Git, GitHub, IntelliJ IDEA, Visual Studio Code, Postman

Testing Tools: JUnit, Mockito, Manual Testing, REST Assured

Platforms: Windows, Linux (Ubuntu, CentOS), macOS

Cloud Technologies: AWS (EC2, S3, RDS, Lambda), Azure (App Service, Blob Storage), Heroku

Messaging Tools: Kafka, RabbitMQ (basic), REST API, WebSockets

EDUCATION:

- Bachelor of Science in Computer Science | Georgia State University – Atlanta, GA | Jan 2017 – Jul 2022

WORK EXPERIENCE:

Full Stack Java Developer**Infosys McCamish Systems, LLC – Atlanta, GA****July 2022 – Present**

- Developed and maintained microservices architecture using Java 11, Spring Boot, Hibernate, Kafka, and RESTful APIs.
- Crafted dynamic and responsive UIs with React.js, HTML5, CSS3, and Bootstrap 5, enhancing user experience and usability.
- Orchestrated deployments using AWS EC2 and Azure App Services, ensuring system scalability and fault tolerance.
- Authored and integrated backend services enabling seamless communication between client and server systems.
- Facilitated end-to-end SDLC including requirement analysis, design, coding, testing, and production release.
- Collaborated cross-functionally with DevOps, QA, and product teams to streamline CI/CD using GitHub and Jenkins.
- Refactored legacy systems into modular microservices, reducing response time and improving maintainability.
- Executed performance tuning and application optimization for APIs and database operations in MySQL and PostgreSQL.
- Accomplished integration of Kafka-based event-driven architecture for secure and real-time data processing.
- Participated in Agile ceremonies, sprints, and retrospectives, contributing to iterative product development.

Environment: Java 11, Spring Boot, Hibernate, React.js, HTML5, CSS3, Bootstrap 5, Kafka, REST API, Microservices, AWS EC2, AWS S3, Azure App Service, MySQL, PostgreSQL, GitHub, Jenkins, Docker, Maven, JUnit, Mockito, Agile, CI/CD, Apache Tomcat, Visual Studio Code, IntelliJ IDEA, Linux, Windows
