

PROFILE:

Process oriented data analyst, proficient in creating data visualizations, managing data pipelines, and building dashboards that drive strategic decision-making.

PROFESSIONAL EXPERIENCE:

Data Analyst, Numpy Ninja

Dec 2024 – Present

Detail-oriented and results-driven Data Analyst with 1+ years of experience in transforming raw data into actionable insights using Tableau, Power BI, Python, and PostgreSQL.

- Proficient in creating data visualizations, managing data pipelines, and building dashboards that drive strategic decision-making.
- Quick learner and master new technology, equally successful in both team and self-directed settings; and proficient in database management, requirement analysis, software development, database security, and troubleshoot malfunctions.
- Demonstrated abilities in collecting business data, analyzing information, developing improvement and enhancement solutions based on their findings, and working with other departments, including the Client Management teams to accomplish responsibilities.
- Worked with clinical dataset for designing a KPI dashboard (Length of stay, throughput etc.) for ICU Sepsis patients using Tableau calculated field, Level of Detail (include, exclude, fixed), filters, parameters, sets which will help to improve ICU operational efficiency by 30%
- Created visually impactful dashboards in Excel and Tableau for data reporting by using pivot tables and VLOOKUP. Extracted, interpreted, and analyzed data to identify key metrics and transform raw data into meaningful, actionable information.
- Determined SIRS using advanced Tableau visualization features and created a dashboard for the identified SIRS patients using vitals - HR, temperature, Respiration and clinical parameters

EDUCATION

- Master of Science, Nagarjuna University, Hyderabad, India, December 2006
- Bachelor of Science from Osmania University, Hyderabad, India, March 2004

PROFESSIONAL CERTIFICATION

- Post Graduate Diploma in Computer Application
- ITIL V4 Foundation Course
- Certified scrum master
- Financial Advisor – certified Texas insurance agent

- Identified the dominant biomarkers - WBC, Platelets, base Excess and lactate which plays a significant role in the incidence of Sepsis by using RELEVANT SKILLS
- concepts of advanced Tableau like Dual axis, Blended axes, control charts, spark line charts, funnel charts, pareto charts, correlation charts in addition to basic charts like Bar plots, Box plots, scatter plots, heat map and thus requires regular monitoring by the clinicians.
- Used python pandas / numpy library for data cleaning, data wrangling and missing data analysis.
- Adept in Python visualization libraries like matplotlib and seaborn for deriving insights through exploratory data analysis.
- Data preparation from relational database using PostgreSQL by using SQL queries.
- Applied weighted hyperparameter feature for improving the data imbalance to 90 % and hence model performance by 70%.
- Used Stratified k-fold cross-validation to evaluate the performance of the model.

SKILLS:

PROFESSIONAL EXPERIENCE

- Junior Scientist at BioChem, May 2010 – April 2014
- Substitute Teacher at Frisco Independent School District, August 2023 – May 2024
- Data Analyst – Numpy Ninja, Dec 2024 to till date
