

Snithika Reddy Mamidi
Network Engineer
Worcester, MA | +1 774-307-9130 | mamidisnithika@gmail.com

SUMMARY

- Obtained 4+ Years of hands-on experience in planning, implementing, maintaining, and improving the state of the network infrastructure enterprise consisting of Switches, Routers, Network appliances, Wireless Access Points, SD Wan
- Managed on-premises/cloud-based, enterprise firewall services and security products/infrastructure
- Enthusiastic to explore and implement innovative ideas in Network Automation in configuration, documentation, troubleshooting, workflow integration, and API integration with multiple tools using Python and Ansible

WORK EXPERIENCE

Syneos Health, Worcester, MA

Network Engineer

August 2024 - present

- Upgraded the company's checkpoint firewall infrastructure to NGX R75 and migrated gateways to the IPSO 6.2 platform in the first 30+ days
- Migration of ASA firewalls to PA next-gen Firewalls using migration tool in PA. Migrated all IPSEC tunnels, ACLs, NAT rules, and policies
- Efficiently scale network capacity continuously to meet user requirements, successfully meeting the 99% uptime target
- Proposed and implemented updated security policies resulting in a 20% decrease in security breaches
- Assigned VLANs to specific Switch Interfaces. Configured VLAN with inter-VLAN routing
- Championed migration to cloud-based architecture, achieving scalability and reducing operational costs by 18%
- Collaborated with a 10-member team to upgrade network switches from CatOS to IOS and deployed Cisco MDS 9140-based storage network (SAN)

Value Momentum, India

Network Engineer

December 2020 - December 2022

- Planned and Implemented Network activities (migrations, expansions, hardware, and software upgrades) during maintenance windows both physically and remotely
- Engaged with stakeholders and senior directors internally to articulate the challenges and potential risks associated with planned maintenance activities
- Provided L2/L3 support for all network devices, routers/switches/firewalls. Troubleshooting with IT Services toolset including problem tracking/resolution, change management, ticket tracking/resolution
- Launched a comprehensive network optimization project leading to a 15% efficiency increase in data transfer speeds
- Automated network provisioning and configuration tasks using ACI REST API and Ansible, reducing manual errors and improving efficiency
- Assisted in Migrating Physical panorama M-500 to Virtual Appliance (Palo Alto VMware-ESXI)
- Experience in Network Security that includes perimeter security for the Internet, Extranet, DMZ, Web-traffic security with Proxies, and Web Application Firewalls. Worked and migrated multi-vendor equipment and Next generation firewall technologies
- Responsible for the IPAM (IP Address management) system for a large WAN/LAN network (QIP) using SolarWinds IPAM, Infoblox DNS, and DHCP servers. Experience with DHCP scopes, IP reservations, DNS host entries, pointers, delegations, Zones, DNS Sec, etc.
- Configured OSPF on CISCO devices with multiple routing processes and redistributed them. Tested and hands-on experience in multi-area OSPF topologies
- Worked on Cisco ASR 9K, Nexus 7K, 9K, N9K-C937, N2K-C2248. Configured and designed OSPF, EIGRP, and BGP at the Distribution and Core layers. I have configured an OTV layer 2 connection between Data centers on Nexus

TECHNICAL SKILLS

Project Management: Trello, Webex, Jira,

Firewall: Checkpoint R65/R70/R75, Cisco PIX, Cisco ASA, Juniper SSG, Juniper SRX, Net screen, Junos and Fortigate Firewalls.

VPN: IPsec, Remote access SSL, VPN, access lists, Regular expressions, content-based filtering, Failover, Load Balancing IDS, IPS, PPTP L2TP, Packet filtering

Routing / Switching: BGP, MPLS, configuration, OSPF, RIP

Networking: NAT, ACCESS-LIST, MPLS, DHCP Server Failover, Load Balancing

Protocols: TCP/IP, UDP, POP3, IMAP, SMTP, NTP, FTP

Cloud Platforms: Azure, AWS

Query/Programming languages and Scripting: SQL, Python, Ansible, Bash, Shell

CERTIFICATIONS

- Certified Entry Level Python Programmer - <https://verify.openedg.org/?id=6z0B.okg7.Dz6S>
- Tableau Desktop Specialist - https://www.credly.com/badges/b59d6a60-20b2-4240-92c4-b17b66316f02/public_url

EDUCATION

Clark University | Boston, USA. Master of Science, Business Analytics

December 2024

Jawaharlal Nehru Technological University | India. Bachelor of Technology in Computer Science

May 2021

PROJECT

- **Network Troubleshooting Simulation:** Created a simulated network with intentional faults or misconfigurations. The project involves diagnosing and resolving these issues using network-troubleshooting techniques
- **Wireless Network Optimization:** Designed and optimized a wireless network considering coverage, capacity, and interference factors. Tools like Wireshark are used for packet analysis and optimization
- **Network Security Analysis:** Performed a security assessment on a network, identifying vulnerabilities and proposing solutions. This includes firewall configurations, intrusion detection systems, and encryption protocols
