

Soham Kalse

Software Engineer

San Francisco, CA | +1 (415)-740-7820 | soham.k@mymailwork.com | [Linkedin](#)

SUMMARY

- Software Engineer with around 4 years of experience in developing high-performance applications using Java, Spring Boot, and React.js.
- Good knowledge of Spring modules like Spring IoC, Spring MVC, Spring Web Flow, Spring AOP, Spring DAO, and Spring Forms.
- Extensive experience in developing web interfaces using HTML, CSS, JavaScript, TypeScript, jQuery, and Bootstrap.
- Experience with ReactJS for creating user interfaces using one-way data flow with Redux and React Native for mobile environments.
- Strong professional experience in core Java, J2EE, Swing, Servlets, Java Server Pages (JSP), JavaBeans, JDBC, and MVC architecture.
- Experience working with Node.js to set up Web APIs using JavaScript.
- Proficient in using Spring DI and Spring MVC for REST APIs and Spring Boot for microservices development.
- Familiar with container-based technologies like Docker, and Kubernetes, along with the development of microservices architecture using Spring Boot.
- Experience following iterative methodologies like Agile, and Waterfall in multi-project implementations using Jira and JUnit.
- Expertise in database modeling, administration, and development using SQL, T-SQL, and PL/SQL in Oracle and SQL Server environments.
- Experience with build tools like Ant, Maven, and Gradle for building and deploying applications across different environments.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Languages: Java, C, C#, C++, Python, Golang, Protobuf, gRPC

Web Technologies: React.JS, Node.JS, Express.JS, Angular, GraphQL, Next.JS, HTML, CSS, JavaScript, TypeScript, jQuery, JSON, Redux

Java/J2EE Technologies: Servlets, JSP, JDBC, Struts2.

Frameworks: Spring Boot, Spring MVC, Spring Core, Spring Batch, Spring Data JPA, Spring Cloud, Spring Security, Hibernate, Jetty, Servlets

Messaging Services: Apache Kafka

Cont. & Orch. Technologies: Docker, Kubernetes.

Web Servers: WebSphere, WebLogic, Apache Tomcat

Cloud Providers: AWS (EC2, EMR, EKR, S3, ELK Stack, Lambda, CloudWatch), Azure, GCP

Databases: Oracle, MySQL, PostgreSQL, SQL Server, MongoDB

IDE(s) & Build Tools: Eclipse, Spring Tool Suite (STS), Visual Studio Code, IntelliJ, Maven, Gradle

Testing Tools: Junit, Jenkins, Jasmine, Mockito, Splunk, Selenium, Cucumber, Log 4j2

Version Controls & Others: Git, GitHub, Bitbucket, Jira, Figma, Bootstrap, OOP, Postman, LLM, Claude AI, GPT 4,

Operating System: Windows, Linux

EXPERIENCE

SumatoSoft, USA | Software Engineer

Jan 2024 - Current

- Participated in all phases of SDLC using Agile methodology, breaking tasks into SCRUM increments with minimal planning.
- Created the Application using React.js and Node.js libraries NPM, gulp directories to generate desired view and flux to root the URL's properly.
- Worked with React.js to build Bootstrap components for a responsive UI and linked them with API data to dynamically render the virtual DOM.
- Designed and developed a single-page application (SPA) using Vue.js components such as Router and Vue core components.
- Generated User Interface Templates using JSP, HTML5, NodeJS, JavaScript, Ajax, Bootstrap, and CSS.
- Migrated SOAP web services to Spring RESTful web services using Spring REST API with Spring Boot.
- Deployed the frontend application using AWS S3 and configured CORS to consume RESTful services from another domain.
- Utilized Apache Kafka, a highly durable messaging system, for asynchronous exchange of critical business information.
- Worked with NoSQL databases like MongoDB for data storage and retrieval.
- Conducted unit testing of developed product features using JUnit and Mockito frameworks as part of the development cycle.
- Utilized Docker for environment provisioning and containerized deployments.
- Configured and maintained Jenkins to implement the CI/CD pipeline.

Mphasis, India | Software Developer

Dec 2019 - July 2022

- Implemented Waterfall methodology for structured planning and strict specification adherence.
- Developed the Java/J2EE based multi-threaded application, which is built on top of the struts framework.
- Written JS components to consume REST API which is written in Spring REST.
- Leveraged Virtual DOM modules and constant DOM manipulations through WebSocket's listening to REST API through React JS.
- Created Microservices as part of Lambda function development using Node.js Serverless architecture.
- Implementation of AJAX, JavaScript and jQuery on the Front-end side to implement the dynamic DOM manipulation.
- Developed the application using Struts, Servlets and JSP for the presentation layer along with JavaScript for the client-side validations.
- Extensively worked with Spring framework which includes several modules like MVC, Security, IOC, AOP, Hibernate Template, JDBC Template.
- Experience in using Junit writing the test cases and build with Gradle.
- Implementation of SOAP Template and REST Template to consume the third-party endpoints and to process the XML and JSON data.
- Used Angular JS and React JS for Data Analytics App to process from the different Data sources and exposing it as REST API.
- Implementation of POC using the Angular JS and Spring REST API connecting to the Mongo DB using Spring Data.

EDUCATION

Master of Science in Computer Science | University of San Francisco, San Francisco, USA

Bachelor of Engineering in Computer Engineering | Savitribai Phule Pune University, Pune, India

CERTIFICATIONS

Microsoft Technology Associate - Introduction to Programming using Java

Microsoft Technology Associate - Introduction to Programming using JavaScript

Automation Anywhere Certified Advanced RPA Professional (Automation 360) Certificate
